Design and Implementation of Higher Education Learners' Learning Outcomes (HELLO) Barua, Kuntal,Radwan, Neyara,Singh, Virendra,Figueiredo, Ronnie,2023-12-22 The Higher Education Learners Learning Outcomes HELLO project offers a comprehensive solution to the challenge of creating comparative metrics of learning outcomes that are valid across various cultures languages and higher education institution types Traditional methods of assessing learning

outcomes in higher education have limited institutions abilities to compare student performance to that of their peers hindering efforts to improve teaching practices and enhance student learning This project creates learning outcome measures that are culturally and linguistically appropriate for different types of higher education institutions enabling institutions to compare student performance to that of their peers as part of efforts to improve teaching practices and enhance student learning Design and Implementation of Higher Education Learners Learning Outcomes HELLO edited by Kuntal Barua Neyara Radwan Mohammed Virendra Singh and Ronnie Figueiredo provides a persuasive account of the HELLO project and is intended for all students teachers administrations and higher education institutions interested in improving teaching practices and enhancing student learning outcomes The book presents the challenges in traditional methods of assessing learning outcomes the limitations of diverse attempts to fill the quality information gap and the rationale for HELLO beyond collegial approaches and student centered learning The book also explores key challenges in developing and executing HELLO such as the risks of ranking and value added methodologies By offering a comprehensive overview of the HELLO project this book provides higher education institutions with the information and motivation they need to participate in the project and enhance their students learning outcomes *FET Colleges South Africa. Department of Education,2007* *Proceedings of the International Conference on Education Research* Reza Hosseini, Multiplex Biomarker Techniques Paul C. Guest,2022-07-15 This detailed volume explores the application of multiplex biomarker methods in the critical area of COVID 19 research through state of the art technologies in the fields of genomics proteomics transcriptomics metabolomics and imaging The book features a series of protocols from labs across the globe employing multiplex molecular approaches which can be applied to accelerate progress in the research of SARS CoV 2 and other infectious illnesses Written for the highly successful Methods in Molecular Biology series chapters include introductions to their respective topics lists of the necessary materials and reagents step by step readily reproducible laboratory protocols and tips on troubleshooting and avoiding known pitfalls Authoritative and essential Multiplex Biomarker Techniques Methods and Applications for COVID 19 Disease Diagnosis and Risk Stratification serves as a vital resource for researchers in the areas of virology metabolic diseases respiratory disorders as well as to clinical scientists physicians pharmacologists and the healthcare services Recalibrating teacher training in African higher education institutions Sifiso Sibanda,Gideon (Deon) P. van Tonder,Washington T. Dudu,2023-03-01 This book critically examines the role of governments in promoting parity during and in post pandemic education This comes from the realisation that the pandemic has deepened the crisis by depleting the meagre resources that African countries might have devoted to normative educational practices where those on the margins would have been pushed further behind while the privileged would have been further initiated into the cultural and capital flows of private schools and historically research intensive institutions of higher learning This has far reaching implications for the education of underprivileged citizens and education particularly modes and modalities of delivery has to

be reimagined to subvert the challenges wrought by the pandemic This book significantly bridges the gap between the pre and post COVID 19 pandemic pedagogical practices and the erstwhile modalities that have been resilient over time The book focuses on ways to stave off pedagogical challenges that face countries as the global pandemic makes its mark *Working with indigenous knowledge* Fhumulani M. Mulaudzi, Rachel T. Lebesse, 2022 The aim of the book is to assist both local and international scholars in articulating the scholarly discourse on indigenous health attitudes practices and experiences The indigenous lens that was used to generate and disseminate indigenous knowledge in this book will strengthen indigenous scholarship thus making it accessible to a wider audience In addition the information shared in this book will add value for scholars and assist them with the indigenous knowledge needed to address sustainable development goals This book is timely and topical as the discourse on the decolonisation of the curriculum is widely debated in the higher education space The discourse on the scholarship of indigenous knowledge as the tacit local knowledge that stems from cultural practices within communities has not been well articulated in the current health science education milieu Indigenous knowledge has remained overlooked and undermined for a very long time and the information remains untapped in local communities The scholars who conducted the research on which this book is based unearthed a wealth of knowledge which was tacit in nature and translated it into implicit knowledge that can be documented and shared with other scholars globally This knowledge will assist health care scholars in benefiting from knowledge practices and cultural beliefs that will assist them in health care planning teaching evidence based practice and further research The South African Development Directory ,2001
