SEC Docket United States. Securities and Exchange Commission,1995 The TensorFlow Workshop Matthew Moocarme,Anthony So,Anthony Maddalone,2021-12-15 Get started with TensorFlow fundamentals to build and train deep

learning models with real world data practical exercises and challenging activities

Key Features

Understand the fundamentals of tensors neural networks and deep learning
Discover how to implement and fine tune deep learning models for real world datasets
Build your experience and confidence with hands on exercises and activities

Book Description

Getting to grips with tensors deep learning and neural networks can be intimidating and confusing for anyone no matter their experience level The breadth of information out there often written at a very high level and aimed at advanced practitioners can make getting started even more challenging If this sounds familiar to you The TensorFlow Workshop is here to help Combining clear explanations realistic examples and plenty of hands on practice it ll quickly get you up and running You ll start off with the basics learning how to load data into TensorFlow perform tensor operations and utilize common optimizers and activation functions As you progress you ll experiment with different TensorFlow development tools including TensorBoard TensorFlow Hub and Google Colab before moving on to solve regression and classification problems with sequential models Building on this solid foundation you ll learn how to tune models and work with different types of neural network getting hands on with real world deep learning applications such as text encoding temperature forecasting image augmentation and audio processing By the end of this deep learning book you ll have the skills knowledge and confidence to tackle your own ambitious deep learning projects with TensorFlow

What you will learn

- Get to grips with TensorFlow s mathematical operations
- Pre process a wide variety of tabular sequential and image data
- Understand the purpose and usage of different deep learning layers
- Perform hyperparameter tuning to prevent overfitting of training data
- Use pre trained models to speed up the development of learning models
- Generate new data based on existing patterns using generative models

Who this book is for This TensorFlow book is for anyone who wants to develop their understanding of deep learning and get started building neural networks with TensorFlow Basic knowledge of Python programming and its libraries as well as a general understanding of the fundamentals of data science and machine learning will help you grasp the topics covered in this book more easily

and it isn't slowing down yet. Rock solid reliability and new support for parallel programming make Fortran an essential language for next generation high performance computing. Simply put the future is in parallel and Fortran is already there. Purchase of the print book includes a free eBook in PDF, Kindle and ePub formats from Manning Publications. About the book: Modern Fortran teaches you to develop fast, efficient, parallel applications using twenty-first century Fortran. In this guide you'll dive into Fortran by creating fun apps including a tsunami simulator and a stock price analyzer. Filled with real world use cases, insightful illustrations and hands-on exercises, Modern Fortran helps you see this classic language in a whole new light. What's inside: Fortran's place in the modern world, Working with variables, arrays and functions, Module development, Parallelism with coarrays, teams and events, Interoperating Fortran with C. About the reader: For developers and computational scientists. No experience with Fortran required. About the author: Milan Curcic is a meteorologist, oceanographer and author of several general purpose Fortran libraries and applications. Table of Contents: PART 1: GETTING STARTED WITH MODERN FORTRAN 1. Introducing Fortran 2. Getting started: Minimal working app. PART 2: CORE ELEMENTS OF FORTRAN 3. Writing reusable code with functions and subroutines 4. Organizing your Fortran code using modules 5. Analyzing time series data with arrays 6. Reading, writing and formatting your data. PART 3: ADVANCED FORTRAN USE 7. Going parallel with Fortran coarrays 8. Working with abstract data using derived types 9. Generic procedures and operators for any data type 10. User defined operators for derived types. PART 4: THE FINAL STRETCH 11. Interoperability with C 12. Exposing your app to the web 13. Advanced parallelism with teams, events and collectives. *Intelligent Computing* Kohei Arai, 2023-08-31. This book is a collection of insightful and unique state-of-the-art papers presented at the Computing Conference which took place in London on June 22-23, 2023. A total of 539 papers were received, out of which 193 were selected for presenting after double-blind peer review. The book covers a wide range of scientific topics including IoT, Artificial Intelligence, Computing, Data Science, Networking, Data security and Privacy, etc. The conference was successful in reaping the advantages of both online and offline modes. The goal of this conference is to give a platform to researchers with fundamental contributions and to be a premier venue for academic and industry practitioners to share new ideas and development experiences. We hope that readers find this book interesting and valuable. We also expect that the conference and its publications will be a trigger for further related research and technology improvements in this important subject.
