work of James W Carey the founding father of cultural studies in the United States The contributors map how these important concepts including Carey s own work with them have evolved over time and how these concepts intersect The result is a coherent volume that redefines the still emerging field of critical cultural studies Contributors are Stuart Allan Jack Zeljko Bratich Clifford Christians Norman Denzin Mark Fackler Robert Fortner Lawrence Grossberg Joli Jensen Steve Jones John Nerone Lana Rakow Quentin J Schultze Linda Steiner Angharad N Valdivia Catherine Warren Frederick Wasser and Barbie Zelizer

Histories of Postmodernism Mark Bevir, Jill Hargis, Sara Rushing, 2020-09-19 Histories of Postmodernism reexamines the history of the constellation of ideas and thinkers associated with postmodernism The increasingly dominant historical narrative depicts a relatively smooth development of ideas from Friedrich Nietzsche and Martin Heidegger through a range of French theorists most notably Jacques Derrida and Michel Foucault to contemporary American thinkers such as Richard Rorty Edward Said and Judith Butler Histories of Postmodernism challenges this narrative by highlighting the local contexts of relevant theorists and thus the crucial distinctions that divide successive articulations of the themes and concepts associated with postmodernism As postmodern ideas traveled from nineteenth century Germany to mid twentieth century France and on to the contemporary United States so the relevant theorists transformed that heritage within the context of particular intellectual traditions and specific political and aesthetic issues

Re-Thinking the Cogito Christopher Norris, 2010-08-12 Re Thinking the Cogito seeks to combine a strongly naturalistic with a distinctively rationalist perspective on some nowadays much discussed issues in philosophy of mind Against the common view that they involve downright incompatible conceptions of mind knowledge and ethics it seeks to unite a naturalism that draws on recent advances in neurophysiology and cognitive science with an outlook that gives full weight to those normative values at the heart of rationalist thought True to the book s constructive spirit Norris offers various detailed proposals for bringing the two

approaches into a mutually enhancing though also mutually provocative relationship He finds that claim strikingly prefigured in Spinoza's working out of a non-reductive yet metaphysically uncompromising mind-body monism Moreover he suggests how a thoroughly naturalised approach might yet become a locus of productive engagement with the work of an ultra-rationalist thinker such as Alain Badiou Thus Norris puts the case that physically embodied human thought has cognitive intellectual and creative powers that cannot and need not be accounted for in terms of conscious let alone self-conscious reflection

Gramsci's Politics of Language Peter Ives, 2004-01-01 Antonio Gramsci and his concept of hegemony have permeated social and political theory cultural studies education studies literary criticism international relations and post-colonial theory The centrality of language and linguistics to Gramsci's thought however has been wholly neglected In Gramsci's Politics of Language Peter Ives argues that a university education in linguistics and a preoccupation with Italian language politics were integral to the theorist's thought Ives explores how the combination of Marxism and linguistics produced a unique and intellectually powerful approach to social and political analysis To explicate Gramsci's writings on language Ives compares them with other Marxist approaches to language including those of the Bakhtin Circle Walter Benjamin and the Frankfurt School including Jürgen Habermas From these comparisons Ives elucidates the implications of Gramsci's writings which he argues retained the explanatory power of the semiotic and dialogic insights of Bakhtin and the critical perspective of the Frankfurt School while at the same time foreshadowing the key problems with both approaches that post-structuralist critiques would later reveal Gramsci's Politics of Language fills a crucial gap in scholarship linking Gramsci's writings to current debates in social theory and providing a framework for a thoroughly historical materialist approach to language

Philosophies of Place Peter D. Hershock, Roger T. Ames, 2019-06-30 Humanity takes up space Human beings like many other species also transform spaces What is perhaps uniquely human is the disposition to qualitatively transform spaces into places that are charged with distinctive kinds of intergenerational significance There is a profound felt difference between a house as domestic space and a home as familial place or between the summit of a mountain one has climbed for the first time and the same rock pinnacle celebrated in ancestral narratives Contemporary philosophical uses of the word place often pivot on the distinction between space and place formalized by geographer philosopher Yi fu Tuan who suggested that places incorporate the experiences and aspirations of a people over the course of their moral and aesthetic engagement with sites and locations While spaces afford possibilities for different kinds of presence physical emotional cognitive dramatic spiritual places emerge as different ways of being present fuse over time and saturate a locale with distinctively collaborative patterns of significance This approach to issues of place however is emblematic of what Edward S Casey has argued are convictions about the primacy of absolute space and time that evolved along with the progressive dominance of the scientific imagination and modern imaginations of the universal The recent reappearance of place in Western philosophy represents a turn away from abstract and a priori reasoning and back toward phenomenal experience and the primacy of embodied and emplaced intelligence Places are enacted through the sustainably shared practices of mutually responsive and mutually vulnerable agents and are as numerous in kind as we are divergent in the patterns of values and intentions The contributors to this volume draw on resources from Asian European and North American traditions of thought to engage in intercultural reflection on the significance of place in philosophy and of the place of philosophy itself in the cultural social economic and political domains of contemporary life The conversation of place that results explores the meaning of intercultural philosophy the critical interplay of place and personal identity the meaning of appropriate emplacement the shared place of politics and religion and the nature of the emotionally emplaced body

Talking Politics A. W. Sparkes, 2006-06-19 Talking Politics is a philosophical examination of some of the basic concepts of political discourse Its primary focus is on the ordinary on what is said by politicians in newspapers and by people in pubs rather than on the works of political theorists This is a work of but not on political theory Talking Politics is Invaluable as a source of reference for students and contains a detailed index Arranged thematically around topics such as Nation Each entry has copious cross references and suggestions for further reading A W Sparkes is uniquely qualified to write such a book combining some thirty years teaching as a philosopher with wide experience of and a life long fascination with politics His attitude is that of a critical but uncynical observer
