Objects Of Knowledge New Research In Museum Studies

Alf Hatton, Francis P. MacManamon

Objects Of Knowledge New Research In Museum Studies:

Objects of Knowledge Susan Pearce, 2010-07-15 Volume 1 in a series designed to act as a forum for the dissemination and discussion of new research currently being undertaken in the field of Museum Studies The series aims to cover the whole museum field and to broadly address the history and operation of the museum as a cultural phenomenon The papers published are of a high academic standard and are also intended to relate directly to matters of immediate museum concern The publication aims to fill a major gap in the present scope of museum based literature This volume is concerned with the ways in which meaning is created through museum objects and the processes which this involves The papers however adopt a wide diversity of stances ranging widely across the field some take a broadly theoretical line and others examine specific areas like museum education and the relationship of museums to native peoples The volume concludes with a Review Section covering recent books exhibitions and conferences *A Bibliography of Museum Studies* Simon J. Knell, 2016-12-05 A comprehensive bibliographic reference for students and others wishing to investigate the contemporary literature on museums and collections The references are systematically arranged into sections including collections management communication and exhibitions museum education material culture the museums profession and museum management Compiled from the research and teaching materials of the Department of Museum Studies at the University of Leicester it provides an essential resource for anyone studying or working in museums Containing more than 4 000 references this new bibliography provides ready access to the literature whether you are developing a disaster plan or visitor survey or studying the history of museum education *Handbook of Material Culture* Christopher Y. Tilley, 2006-01-26 Provides a critical survey of the theories concepts intellectual debates substantive domains and traditions of study characterizing the analysis of things This handbook charts an interdisciplinary field of studies that makes a fundamental contribution to an understanding of what it means to be human *Introduction to Museology* I. Maroevic, 1998 *Routledge Companion to Museum Ethics* Janet Marstine, 2011 Recent social economic political and technological shifts have presented novel ethical challenges and opportunities across all areas of museum activity This book will elucidate contemporary museum ethics providing a resource to students researchers and museum professionals worldwide who are grappling with these matters **Museums and Popular Culture** Kevin Moore, 2000-04-01 Museums and Popular Culture seeks to unravel the paradox that to adequately reflect popular culture museums may need to abandon their traditional form This is a book which no one interested in museums can afford to ignore *Museum Basics* Tim Ambrose, Crispin Paine, 1993 Drawing from a wide range of experience the authors propose the simple ideas which should underpin all professional museum training courses Organised on a modular basis Museum Basics provides a basic guide to best practice in every aspect of museum work from museum organisation through collections management and conservation to marketing and security It is designed for training courses to be supplemented by case studies project work and group discussion **From Knowledge to Narrative** Lisa C.

Roberts,2014-07-15 From Knowledge to Narrative shows that museum educators professionals responsible for making collections intelligible to viewers have become central figures in shaping exhibits Challenging the traditional scholarly presentation of objects educators argue that rather than transmitting knowledge museums displays should construct narratives that are determined as much by what is meaningful to visitors as by what curators intend Lisa C Roberts discusses museum education in relation to entertainment as a tool of empowerment as a shaper of experience and as an ethical responsibility The book argues for an expanded role for museum education based less on explaining objects than on interpreting narratives **International Encyclopedia of Information and Library Science** John Feather,Paul

Sturges,2003-09-02 This eagerly awaited new edition has been fully revised and updated to take full account of the many and radical changes which have taken place since the Encyclopedia was originally conceived Manifesting Medicine Robert Bud,Bernard S. Finn,Helmuth Trischler,1999 Increasingly historians museum curators are using technological artifacts as expressions of human culture Reflecting the broad scope of interaction between science technology society they can help us see not just machines but also imaginative worlds of the past Building on this growing interest three of the world s greatest depositories of material heritage in the history of technology the Deutsches Museum in Munich the Science Museum in London the Smithsonian Institution in Washington are cooperating in the new series of publications which explores the use of objects as resources in the study of the history of science technology medicine Each volume will examine a wide range of uses of objects but will focus on a particular area of study With its focus on modern technology Manifesting Medicine is a history of medicine with a difference The authors have striven to show that those who today encounter the artifacts of this book in its pages even perhaps in the flesh will be confronting big subjects blood life danger conception All those interested in how medicine affects the culture of the healthy well as the fate of the sick will find this volume of interest Cultural Resource Management in Contemporary Society Alf Hatton,Francis P. MacManamon,2003-05-20 This innovative collection of essays from an international range of contributors describes various means of preserving protecting and presenting vital cultural resources within the context of economic development competing claims of ownership of particular cultural resources modern uses of structures and space and other aspects of late twentieth century life *Interpreting Objects and Collections* Susan Pearce,2012-10-12 This volume brings together for the first time the most significant papers on the interpretation of objects and collections and examines how people relate to material culture and why they collect things The first section of the book discusses the interpretation of objects setting the philosophical and historical context of object interpretation Papers are included which discuss objects variously as historical documents functioning material and as semiotic texts as well as those which examine the politics of objects and the methodology of object study The second section on the interpretation of collections looks at the study of collections in their historical and conceptual context Many topics are covered such as the study of collecting to structure individual identity its affect on time and space and the construction of

gender There are also papers discussing collection and ideology collection and social action and the methodology of collection study This unique anthology of articles and extracts will be of inestimable value to all students and professionals involved in the interpretation of objects and collections **Curating Difficult Knowledge** E. Lehrer,C. Milton,M.

Patterson,2011-10-04 This volume inscribes an innovative domain of inquiry bringing museum and heritage studies to bear on questions of transitional justice memory and post conflict reconciliation As practitioners artists curators activists and academics the contributors explore the challenges of bearing witness to past conflicts **Academic Anthropology and the Museum** Mary Bouquet,2001 The museum boom with its accompanying objectification and politicization of culture finds its counterpart in the growing interest by social scientists in material culture much of which is to be found in museums Not surprisingly anthropologists in particular are turning their attention again to museums after decades of neglect during which fieldwork became the hallmark of modern anthropology so much so that the social and the material parted company so radically as to produce a kind of knowledge gap between historical collections and the intellectuals who might have benefitted from working on these material representations of culture Moreover it was forgotten that museums do not only present the pastness of things A great deal of what goes on in contemporary museums is literally about planning the shape of the future making culture materialize involves mixing things from the past taking into account current visions and knowing that the scenes constructed will shape the perspectives of future generations However the re invention of museum anthropology presents a series of challenges for academic teaching and research as well as for the work of cultural production in contemporary museums issues that are explored in this volume *Applying Performance* N.

Shaughnessy,2012-07-06 This book draws upon cognitive and affect theory to examine applications of contemporary performance practices in educational social and community contexts The writing is situated in the spaces between making and performance exploring the processes of creating work defined variously as collaborative participatory and socially engaged Encyclopedia of Library and Information Sciences John D. McDonald,Michael Levine-Clark,2017-03-15 The Encyclopedia of Library and Information Sciences comprising of seven volumes now in its fourth edition compiles the contributions of major researchers and practitioners and explores the cultural institutions of more than 30 countries This major reference presents over 550 entries extensively reviewed for accuracy in seven print volumes or online The new fourth edition which includes 55 new entire and 60 revised entries continues to reflect the growing convergence among the disciplines that influence information and the cultural record with coverage of the latest topics as well as classic articles of historical and theoretical importance **Introducing Museum Studies** Gordon Fyfe,2025-06-17 Introducing Museum Studies is the first introductory textbook for museum studies Providing a wide ranging and original overview of museums from a historical and contemporary perspective it covers key topics such as the history of the museum the museum as a public space visitors and communities The book shows how museums far from being neutral collections exhibit objects which

convey powerful symbolic meanings This cultural turn away from the object as a thing in itself has placed museums at the centre of debates about public culture citizenship inclusion and repatriation Museums are becoming increasingly reflexive given the awareness of the social and political role they serve and their ability to reflect the problems of our time Gordon Fyfe shows how and why this reflexivity creates a need for historical perspective on current practices on the one hand museums are enmeshed in a changing world and on the other hand they exhibit change At their best museums help us to see that everything is on the move and that change is the natural order of things Accessibly written this is the go to introduction for scholars and students of museum studies arts and cultural management and heritage studies

Object Lessons and the Formation of Knowledge Kerstin Barndt, Carla M. Sinopoli, 2017-09-19 Comprehensive overview of the University of Michigan's Museums Libraries and collections

Foundations of Museum Studies Kiersten F. Latham, John E. Simmons, 2025-09-02 A holistic introduction to museum theory and practice this second edition is designed to be the core introductory text for any foundational museum studies course being taught in any discipline You'll examine the evolution divergence definition and legal organization of museums in the context of collections of objects and how museums perform the basic functions of preservation communication and research Through the lens of museological theory and a systems approach you'll learn how museum objects are managed by professionals and used by the public and scholars You'll get an overview of contemporary museums worldwide and think through the future of museums Useful as an introductory text for any foundational museum studies course whether in library and information science museum studies or a related area this text's unique perspective approaches museums as communicative knowledge systems that deal with people objects and ideas The second edition includes new material on museum careers legal issues globalization climate change positive museology and museums and sustainability This foundational text is adaptable to a broad range of courses and disciplines when paired with supplementary readings

Luxury and Legitimation Allison Karmel Thomason, 2017-03-02 Utilizing a variety of ancient sources including cuneiform texts images and archaeological finds *Luxury and Legitimation* explores how the collecting of luxury objects contributed to the formation of royal identity in one of the world's oldest civilizations ancient Mesopotamia modern Iraq Allison Thomason makes a significant and timely contribution to the subjects of collecting and material culture studies by bringing a new understanding to the political cultural and social institutions of an important pre-Classical non-Western civilization
