Neoliberal Australia And Us Imperialism In East Asia:

Neoliberal Australia and US Imperialism in East Asia E. Paul, 2012-10-23 A critical analysis of Australia's neoliberal state and role in the American imperial project in Asia. In exposing the causal mechanisms for violence and prospects for more wars, it argues for emancipatory alternatives to the existing dominant and anti-democratic neoliberal governmentality.

Neoliberal Australia and US Imperialism in East Asia E. Paul, 2012-10-23 A critical analysis of Australia's neoliberal state and role in the American imperial project in Asia. In exposing the causal mechanisms for violence and prospects for more wars, it argues for emancipatory alternatives to the existing dominant and anti-democratic neoliberal governmentality.

Australian Imperialism Erik Paul, 2021-06-07 In his critical study of Australian imperialism, Erik Paul analyses the making, character and contours of the geopolitical state from the time of the British invasion and colonisation to the present, expanding the country's continental political and economic power. War is the crucible for its hegemonic power, nationalism and politics. The book exposes and dissects capitalist imperialism to control and manage a growing population and to impose the grand strategy of a US client state. The geopolitics in the partitioning of the earth and the exploitation of people and the biosphere continue to create major conflict, inequality and human suffering. Australia plays an important role in the intensification of the struggle among major powers and in the outcome of an expanding global ecological and hegemonic crisis. But the existing Australian state of exception constitutes a major obstacle to a reconciliation with China and to a peaceful regional and world order.

Australia in the US Empire Erik Paul, 2018-04-27 This book argues that Australia is vital to the US imperial project for global hegemony in the struggle among great powers and why Australia's deep dependency on the US is incompatible with democracy and the security of the country. The Australian continent is increasingly a contestable geopolitical asset for the US grand strategy and for China's economic and political expansionism. The election of Donald Trump to the US presidency is symptomatic of the US hegemonic crisis. The US is Australia's dangerous ally and the US crisis is a call for Australia to regain sovereignty and sever its military alliance with the US. Political realism provides a critical paradigm to analyse the interactions between capitalism, imperialism and militarism as they undermine Australian democracy and shift governmentality towards new forms of authoritarianism.

Australia in the Anthropocene Erik Paul, 2023-01-01 The book is a study on planetary realism in a critical analysis of Australia in the age of the Anthropocene. It contextualises Australia in the degradation of the biosphere, deeply harmful to humanity's wellbeing, accelerating the threat of nuclear war and the tensions of a declining democracy. The Anthropocene is a critical period threatening the viability of the Australian nation-state. It involves the decarbonisation of the economy driven by domestic and foreign corporate power and the geopolitics of world domination as a close ally of the US. Australia's militarisation for war against China must be contested in the pursuit for a green and just new deal framed in the foreign policy of reconciliation with Asia, including a fully cooperative entente with China.

Australian Political Economy of Violence and

Non-Violence Erik Paul, 2016-05-13 This book is the first to establish the nature and causes of violence as key features in the political economy of Australia as an advanced capitalist society Australia's neoliberal corporate security state is seen to represent the emergence of a post democratic order whereby minds and bodies are disciplined to the dominant ideology of market relations Locating questions of the democracy and of the country's economy at the heart of Australia's political struggle the author elaborates how violence in Australia is built into a hegemonic order characterized by the concentration of private power and wealth Identifying the commodification of people and nature the construction and manipulation of antagonisms and enemies and the politics of fear as features of a new authoritarianism and one party political state Erik Paul explores alternatives to the existing neoliberal hegemonic order Positing that democratization requires a clearly defined counter culture based on the political economy of social economic and political equality the book draws out the potential in non violent progressive social movements for a new political economy

The Festival Cities of Edinburgh and Adelaide

Sarah Thomasson, 2022-08-20 The Festival Cities of Edinburgh and Adelaide examines how these cities world famous arts events have shaped and been shaped by their long term interaction with their urban environments While the Edinburgh International Festival and Adelaide Festival are long established prestigious events that champion artistic excellence they are also accompanied by the two largest open access fringe festivals in the world It is this simultaneous staging of multiple events within Edinburgh's Summer Festivals and Adelaide's Mad March that generates the visibility and festive atmosphere popularly associated with both places Drawing on perspectives from theatre studies and cultural geography this book interrogates how the Festival City as a place myth has developed in the very different local contexts of Edinburgh and Adelaide and how it is challenged by groups competing for the right to use and define public space Each chapter examines a recent performative event in which festival debates and controversies spilled out beyond the festival space to activate the public sphere by intersecting with broader concerns and audiences This book forges an interdisciplinary comparative framework for festival studies to interrogate how festivals are embedded in the social and political fabric of cities and to assess the cultural impact of the festivalisation phenomenon

to propose an innovative conceptualisation of journalistic epistemology in which social truths can be identified as the basis for the journalistic remit of factual reporting If the world cannot be accessed as it is then it can be assembled as agreed so long as consensus on important meanings is kept under constant review These propositions are tested by extensive fieldwork in four countries Australia the Philippines South Africa and Mexico

Migrant Rights at Work Laurie Berg, 2015-06-26 Public debates about the terms of membership and inclusion have intensified as developed economies increasingly rely on temporary migrant labour While most agree that temporary migrant workers are entitled to the general protection of employment laws temporary migrants have by definition restricted rights to residence full social protections and often to occupational and geographic mobility This book raises important ethical questions about the differential treatment of temporary and unauthorised migrant workers and permanent residents and where the line should be drawn between exploitation and legitimate employment Taking the regulatory reforms of Australia as a key case study Laurie Berg explores how the influence of immigration law extends beyond its functions in regulating admission to and exclusion from a country Berg examines the ways in which immigration law and enforcement reconfigure the relationships between migrant workers and employers producing uncertain and coercive working conditions In presenting an analytical approach to issues of temporary labour migration the book develops a unique theoretical framework contending that the concept of precariousness is a more fruitful way than equality or vulnerability to evaluate and address issues of temporary migrant labour The book will be of great interest to scholars and practitioners of immigration law and employment law and policy

Bauzon, 2019-11-11 This book looks at facets in the history of capitalism from the Enlightenment period through the emergence of the American Empire in the Pacific and to the contemporary era of neoliberal globalization This re-telling of history is done by drawing from the works of E San Juan Jr henceforth San Juan considered arguably one of the great contemporary cultural and literary critics of our time In this author's view San Juan's lifetime of works offer a living documentation of among others the history and thought of the modern world highlighted by the rise of capitalism through the contemporary era of neoliberal globalization and shepherded to its hegemonic status by what stands today as the preeminent empire of the United States The book underscores the symbiosis between contemporary capitalism as an economic system based on accumulation on the one hand and the American imperial state on the other just as it revisits the colonial project that was carried out in capitalism's wake the violence and subjugation inflicted on its victims and how this colonial project has morphed into a new form of colonialism or neocolonialism maintained and enforced through the rules and institutional mechanisms of what is popularly known as neoliberal

globalization that also provides the ideological and legal rationale for the commodification and the ultimate grab of the global commons reminiscent of the classical albeit cruder form of colonialism **The Anatomy of Neoliberalism and Education**

Maria Nikolakaki, 2022-01-01 This book is about the Anatomy of Neoliberalism and Education from a Marxist perspective It is the dialectical materialism of neoliberal ideas examining the material conditions of how these ideas and practices emerged and under what conditions Each of these elements is related to the other and can only be properly understood as part and parcel of the whole system of capitalism which links them together This book investigates neoliberalism's political cultural and financial tools It goes deep in the forces who have supported neoliberalism and how it became common sense It explores the imperialist outcomes and the social devastation it created It then goes to see how these ideas and policies have been implemented in education In short it is the materialist conception of the history of the American empire It then uses the analytic tools developed through this investigation to re-read the neoliberal educational reforms *Contradictions and*
