Neoliberalism And Applied Linguistics John Gray:

Neoliberalism and Applied Linguistics David Block, John Gray, Marnie Holborow, 2013-03-01 This book explores neoliberalism a view of the world that puts the market at its centre from the perspective of applied linguistics Neoliberalism and Applied Linguistics argues that while applied linguistics has become more interdisciplinary in orientation it has ignored or downplayed the role of political economy namely the way in which social political and economic factors relate to one another within the context of a capitalist economy The authors take the view that engagement with political economy is central to any fully rounded analysis of language and language related issues in the world today and their collaboration in this volume represents an initial attempt to redress what they perceive to be an imbalance in the field The book begins with a discussion of neoliberalism and an analysis of the ways in which neoliberal ideology impacts on language This is followed by a discussion of how globalization and identity have been conceptualised in applied linguistics in ways which have ignored the political centrality of class a concept which the authors see as integral to their perspective The book concludes with an analysis of the ways in which neoliberal ideology plays out in two key areas of applied linguistics language teaching and language teacher education Neoliberalism and Applied Linguistics is essential reading for advanced undergraduates

postgraduates and researchers in applied linguistics **Social Class in Applied Linguistics** David Block, 2013-12-04 In this ground breaking new book David Block proposes a new working definition of social class in applied linguistics Traditionally research on language and identity has focused on aspects such as race ethnicity nationality gender religion and sexuality Political economy and social class as an identity inscription have been undervalued This book argues that increasing socioeconomic inequality which has come with the consolidation of neoliberal policies and practices worldwide requires changes in how we think about identity and proposes that social class should be brought to the fore as a key construct Social Class in Applied Linguistics begins with an in depth theoretical discussion of social class before considering the extent to which social class has been a key construct in three general areas of applied linguistics sociolinguistics bi multilingualism and second language acquisition and learning research Throughout the book Block suggests ways in which social class might be incorporated into future applied linguistics research A critical read for postgraduate students and researchers in the areas of applied linguistics language education and TESOL

In Pursuit of English Joseph Sung-Yul Park, 2021-08-13 Tracing how anxieties insecurities and moral desire about English instilled through South Korea s neoliberal transformation led to the country s heated pursuit of English in the 1990s and 2000s this book presents subjectivity as a theoretical and analytical perspective for studying the intersection of language and political economy

Culture and Identity through English as a Lingua Franca Will Baker, 2015-07-01 The use of English as a global lingua franca has given rise to new challenges and approaches in our understanding of language and communication One area where ELF English as a lingua franca studies both from an empirical and theoretical orientation have the potential for significant developments is in our understanding of

the relationships between language culture and identity ELF challenges traditional assumptions concerning the purported inexorable link between a language and a culture Due to the multitude of users and contexts of ELF communication the supposed language culture and identity correlation often conceived at the national level appears simplistic and naïve However it is equally naïve to assume that ELF is a culturally and identity neutral form of communication All communication involves participants purposes contexts and histories none of which are neutral Thus we need new approaches to understanding the relationship between language culture and identity which are able to account for the multifarious and dynamic nature of ELF communication

Neoliberalism and Language Shift Ben Ó Ceallaigh, 2022-11-07 While economic forces are often cited as being a key cause of language loss there is very little research that explores this link in detail This work based on policy analysis and ethnographic data addresses this deficit It examines how neoliberalism the dominant economic orthodoxy of recent decades has impacted the vitality of Irish in the Republic of Ireland since 2008 Drawing on concepts well established in public policy studies but not prominent in the subfield of language policy the neoliberalisation of Irish language support measures is charted including the disproportionately severe budget cuts they received It is argued that neoliberalism's antipathy towards social planning and redistributive economic policies meant that supports for Irish were inevitably hit especially hard in an era of austerity Ethnographic data from Irish speaking communities reinforce this point and illustrate how macro level economic disruptions can affect language use at the micro level Labour market transformations emigration and the dismantling of community institutions are documented along with many related developments thereby highlighting an issue of relevance to communities around the world the fundamental tension between neoliberalism and language revitalisation efforts

The Discourse of Culture and Identity in National and Transnational Contexts Christopher Jenks, Jackie Lou, Aditi Bhatia, 2017-10-02 This collection examines and uses discourse to promote a better understanding of culture and identity with the primary goal of advancing an understanding of how discourse can be used to examine social and linguistic issues Many of the contributions explore how the formation of culture and identity is shaped by national and transnational issues such as migration immigration technology and language policy The collection contributes to a better understanding of the process of intercultural communication research as each author takes a different theoretical or methodological approach to examining discourse Although different aspects of discourse are analyzed in this collection each contribution examines issues and concepts that are central to understanding and carrying out intercultural communication research e.g structure and agency static and dynamic cultural constructs sociolinguistic scales power and discourse othering and alienness native and non native This book was originally published as a special issue of Language and Intercultural Communication

The Multilingual Turn Stephen May, 2013-07-24 Drawing on the latest developments in bilingual and multilingual research The Multilingual Turn offers a critique of and alternative to still dominant monolingual theories pedagogies and practices in SLA TESOL and bilingual education Critics of the

monolingual bias argue that notions such as the idealized native speaker and related concepts of interlanguage language competence and fossilization have framed these fields inextricably in relation to monolingual speaker norms. In contrast, these critics advocate an approach that emphasizes the multiple competencies of bi/multilingual learners as the basis for successful language teaching and learning. This volume takes a big step forward in re-situating the issue of multilingualism more centrally in applied linguistics and in so doing making more permeable its key sub-disciplinary boundaries, particularly those between SLA/TESOL and bilingual education. It addresses this issue head-on, bringing together key international scholars in SLA/TESOL and bilingual education to explore from cutting-edge interdisciplinary perspectives what a more critical multilingual perspective might mean for theory, pedagogy and practice in each of these fields.

Language, Capitalism, Colonialism Monica Heller, Bonnie McElhinny, 2017-10-25. Providing an original approach to the study of language by linking it to the political and economic contexts of colonialism and capitalism, Heller and McElhinny reinterpret sociolinguistics for a twenty-first century audience. They map out a critical history of how language serves as a terrain for producing and reproducing social inequalities. The book is organized chronologically and beginning in the period of colonial expansion in the sixteenth century, covers the development of the modern nation state and then the fascist, communist and universalist responses to the inequities such nations created. It then moves through the two World Wars and the Cold War that followed, as well as the shift to liberal democracy, the welfare state and decolonization in the 1960s, ending with the contemporary period characterized by a globalized economy and neoliberal politics since the 1980s. Throughout, the authors ask how ideas about language get shaped and by whom, unevenly across sites and periods, offering new perspectives on how to think about language that will both excite and incite further research for years to come.
