Networking Arguments:

Networking Arguments Rebecca Dingo, 2012-04-22 Networking Arguments presents an original study on the use and misuse of global institutional rhetoric and the effects of these practices on women particularly in developing countries Using a feminist lens Rebecca Dingo views the complex networks that rhetoric flows through globally and nationally and how it is often reconfigured to work both for and against women and to maintain existing power structures To see how rhetorics travel Dingo deconstructs the central terminology employed by global institutions mainstreaming fitness and empowerment and shows how their meanings shift depending on the contexts in which they are used She studies programs by the World Bank the United Nations and the United States among others to view the original policies then follows the trail of their diffusion and manipulation and the ultimate consequences for individuals To analyze transnational rhetorical processes Dingo builds a theoretical framework by employing concepts of transcoding ideological traffic and interarticulation to uncover the intricacies of power relationships at work within networks She also views transnational capitalism neoliberal economics and neocolonial ideologies as primary determinants of policy and arguments over women's roles in the global economy Networking Arguments offers a new method of feminist rhetorical analysis that allows for an increased understanding of global gender policies and encourages strategies to counteract the negative effects they can create

How to Belong Belinda A. Stillion Southard, 2018-10-05 In *How to Belong* Belinda Stillion Southard examines how women leaders throughout the world have asserted their rhetorical agency in troubling economic social and political conditions Rather than utilizing the concept of citizenship to bolster political influence the women in the case studies presented here rely on the power of relationships to create a more habitable world With the rise of global capitalism many nation states that have profited from invigorated flows of capital have also responded to the threat of increased human mobility by heightening national citizenship's exclusionary power Through a series of case studies that include women grassroots protesters a woman president and a woman United Nations director Stillion Southard analyzes several examples of women all as embodied subjects in a particular transnational context pushing back against this often violent rise in nationalist rhetoric While scholars have typically used the concept of citizenship to explain what it means to belong Stillion Southard instead shows how these women have reimagined belonging in ways that have enabled them to create national regional and global communities As part of a broader conversation centered on exposing the violence of national citizenship and proposing ways of rejecting that violence this book seeks to provide answers through the powerful rhetorical practices of resilient and inspiring women who have successfully negotiated what it means to belong to be included and to enact change beyond the boundaries of citizenship
