Learning the Brainstem Edison K. Miyawaki M.D., 2019-01-16 Hard to master even for those who have studied it for years the human brain stem is a fascination and a consternation fascinating in its complexity and disconcerting to the beginner for precisely the same reason Intended for medical or neuroscience students Learning the Brainstem adopts

an approach that the author has cultivated over twenty five years of classroom and hospital teaching His goal is to arrive at knowledge like that of a local based on a carefully narrated tour of axial sections of anatomy Along the way he also examines relevant clinical data in all their subtlety at the bedsides of patients

The Autumn Brain Seminars Edison K. Miyawaki M.D.,2022-02-02 In 2019 and 2020 a teacher penned monographs whose aim was to instruct neuroanatomy not as textbooks do but rather by exploring questions students and trainees often ask altogether innocently but the answers aren't straightforward What have we learned lately about the anatomy of memory How much of cerebral cortex serves vision Cortex and subcortex are linked how are they linked and what is the functional significance of the connectivity In this second of two volumes Miyawaki addresses those three questions in a revised edition of his prior work The Autumn Brain Seminars is a summation of his decades of teaching

Information and Innovation Jean P. Shipman,Barbara A. Ulmer,2017-08-01 As academic health sciences centers look toward innovative product development as their new income source with the decline of clinical income and research dollars health sciences librarians and libraries can partner with these revenue generating innovators to offer invaluable services evidence training dissemination venues and attractive collaborative physical spaces equipped with the latest tools such as 3 D printers body scanners models and video monitors This book uses case examples including perspectives from both librarians and innovators to illustrate how various health sciences libraries have partnered with innovators by offering valuable services and creative products and spaces especially innovators who create medical digital therapeutics devices and apps Many health sciences libraries are transforming their physical spaces into collaboration or maker spaces to spark innovation and discoveries Key health sciences libraries that have done so to enable others to learn more about what professional benefits result from such collisions of information and innovation are highlighted here Also included in the book are chapters that describe various innovation competitions and products that help to showcase the unique scholarly output that is generated by innovators Transferring the knowledge of librarians who have progressed down this path to others is the key goal of this book

Sashank Prasad &,2017-08-14 The effective practice of neuro ophthalmology requires obtaining a detailed history and physical examination which form the foundation to diagnose the complex visual disorders that can be caused by disease that affects the eye or the brain While a dedicated neuro ophthalmologist has specialized training it is also extremely important for general neurologists ophthalmologists and primary care practitioners to have familiarity with this examination in order to facilitate effective patient care To develop these skills it has been traditional to depend on neuro ophthalmology textbooks However most textbooks rely on still figures or possibly separate supplemental digital resources which necessarily constrain the ability to fully convey the principles that guide nuanced clinical decision making We are creating the Modern Neuro Ophthalmology iBook because we believe that this format has the potential to revolutionize didactic methods creating a completely new experience with fully integrated seamless interactive multimedia Our goal is for this resource to be clear comprehensive illustrative easy to navigate and enjoyable to use Advances in Neuro-ophthalmology North American
