*The Toxicant Induction of Irritant Asthma, Rhinitis, and Related Conditions* William J. Meggs, 2014-01-24 Untoward reactions to environmental chemicals particularly when a subject reports difficulties with exposures to chemicals of diverse classes involving more than one organ system have been poorly understood and an area of great controversy Studies of airway inflammation induced by respiratory irritants have established neurogenic inflammation as the mechanism for irritant asthma and rhinitis Remodeling of the airway after an acute irritant exposure can lead to a heightened sensitivity to irritants that persists Recognition that rhinitis while sometimes regarded as a trivial disease is associated with extra airway manifestations such as fatigue and disturbances of sleep mood and cognition further elucidates how chemical exposures can be serious for susceptible individuals This book reviews current scientific understanding of irritant airway inflammation and related conditions including cardiovascular effects of particulate exposures airborne contact dermatitis and irritant dermatitis and the brain as a target organ for both allergic and irritant reactions It is essential reading for physicians and other healthcare workers caring for patients with environmental intolerances Allergists toxicologists occupational and environmental physicians and pulmonologists will find the materials particularly valuable Patients and advocates for those with chemical intolerances will also find the book of interest

*Mast Cells United: A Holistic Approach to Mast Cell Activation Syndrome* Amber Walker, 2019-03-16 At 542 pages and referencing over 1200 academic articles this book is the longest and most thorough resource on mast cell activation syndrome MCAS to date Allergies and anaphylaxis are on the rise alongside gastrointestinal problems skin issues fatigue orthopedic pain neurological symptoms and just about everything in between Patients are coming out of the woodwork with chronic debilitating often invisible illness Recent research estimates that 14% 17% of the population may have mast cell activation disease Much of the medical community has never heard of the condition and existing mainstream treatment tends to focus predominantly on pharmacological management However once a patient has reached a stable baseline there are a number of other individualized approaches that can guide patients to successfully address the underlying root issues This book includes 1 an in depth overview of mast cell activation disease with a focus on mast cell activation syndrome MCAS 2 a patient story describing life with MCAS 3 a

detailed literature review and current hypotheses for disease origins 4 a practical guide of clinical considerations for diagnosis 5 a chapter devoted to comorbid conditions including Ehlers Danlos syndrome POTS Lyme disease and much more 6 several chapters devoted to mainstream and natural treatment options dietary considerations and strategies for holistic healing 7 content from dozens of interviews with prominent MCAS experts including specialists in allergy immunology hematology functional medicine naturopathy psychology nutrition gastroenterology physical therapy clinical research and more Whether a patient medical practitioner or family member friend this book empowers readers and provides patients with concrete steps to move forward in the diagnosis and comprehensive treatment of mast cell activation syndrome
