## **Occupational Labor Shortages Concepts Causes Consequences And Cures:**

*Occupational Labor Shortages* Burt S. Barnow, 2013 Barnow Trutko and Piatak focus on whether persistent occupation specific labor shortages might lead to inefficiencies in the U S economy They describe why shortages arise the difficulty in ascertaining that a shortage is present and how to assess strategies to alleviate the shortage Four occupations are used as test cases 1 special education teachers 2 pharmacists 3 physical therapists and 4 home health and personal care aides For each of these occupations the authors summarize evidence that reveals whether it is currently or has recently experienced a labor shortage and suggest possible ways to alleviate the shortage if it is present The authors close with a chapter discussing their conclusions and potential uses for occupational shortage data including in helping determine immigration policy They also discuss the limited nature of the occupational data currently collected by the Bureau of Labor Statistics and how the federal and state governments could expand their data collection efforts to assist policy formation Publisher s website

**Sustainable and Resilient Infrastructure Development in Africa's Changing Climate** Emmanuel Adinyira, Clifford Amoako, Titus Ebenezer Kwofie, Clinton Aigbavboa, Kofi Agyekum, Michael Addy, 2024-10-11 This book contains the proceedings of ICIDA 2023 The conference is a platform for deliberating the delivery and management of infrastructure in Africa in the face of a changing climate It helped to engage various stakeholders in the continent and beyond on how to develop and deliver sustainable and resilient infrastructure against climate variabilities This book brings together the experiences of participants gathered through many years of research and practice across various fields of infrastructure development that can help shape the future of the African continent Falling Behind? Michael S. Teitelbaum, 2014-03-30 How the fear of a shortage in American science talent fuels cycles in the technical labor market Is the United States falling behind in the global race for scientific and engineering talent Are U S employers facing shortages of the skilled workers that they need to compete in a globalized world Such claims from some employers and educators have been widely embraced by mainstream media and political leaders and have figured prominently in recent policy debates about education federal expenditures tax policy and immigration *Falling Behind* offers careful examinations of the existing evidence and of its use by those involved in these debates These concerns are by no means a recent phenomenon Examining historical precedent Michael Teitelbaum highlights five episodes of alarm about falling behind that go back nearly seventy years to the end of World War II In each of these episodes the political system responded by rapidly expanding the supply of scientists and engineers but only a few years later political enthusiasm or economic demand waned Booms turned to busts leaving many of those who had been encouraged to pursue science and engineering careers facing disheartening career prospects Their experiences deterred younger and equally talented students from following in their footsteps thereby sowing the seeds of the next cycle of alarm boom and bust *Falling Behind* examines these repeated cycles up to the present shedding new light on the adequacy of the science and engineering workforce for the current and future needs of the United States **Issues for**

**Market Entry and Competition Law in Latin America** Francisco Eduardo Beneke Avila, 2021-01-13 This book explores the relationship between market entry analysis in competition law and the study of the determinants of aggregate investment Macroeconomic and social characteristics such as widespread corruption political instability and low levels of education are associated with lower investment rates Progress on these indicators on the other hand is also strongly associated with sustained growth and higher investment rates This book analyzes the interaction between these macro variables and the market specific analysis typical in antitrust cases Against this background representative decisions of four Latin American competition authorities Mexico El Salvador Colombia and Chile on unilateral conduct are analyzed focusing on market power assessment The analysis shows that there is little to no explicit or implicit consideration of the impact of the macroeconomic environment on market dynamism and therefore on market power This book also explores the influence that EU and US competition law have in the standards to prove ease of market entry developed by the Latin American authorities Although most of the Latin American authorities share a lack of reliance on market forces which is characteristic of EU competition law this book argues that market entry analysis still needs to be adjusted to fit the socio economic context that affects investment within the country and the degree to which each particular market is affected Finally the book proposes a framework on how the macro characteristics covered can be incorporated into competition law enforcement
