Strategy 70: Offsetting Offsetting is a strategy that involves the use of a derivative instrument to offset the risk of a position in a security.	Example 70: Offsetting A company holds a position in a security. To offset the risk of this position, the company enters into a derivative contract that has the opposite risk profile to the security.	Advantages/Disadvantages: Offsetting can be used to reduce the risk of a position in a security, but it also involves the use of a derivative instrument, which can be costly and complex.
