Seifert,James A. Vornberg,2002-10-16 Veteran educators Seifert and Vornberg utilize the six standards created by the Interstate School Leaders Consortium ISLLIC and used in developing and redesigning preparation programs and state certification examinations to discuss those issues faced by practicing elementary and secondary school principals Each chapter begins with a short case study emanating from a fictitious school district and culminates with student activities that address the concepts discussed in the chapter Questions and activities follow and provide the reader with an opportunity to apply the concepts discussed This design makes it an ideal text for use with principal certification programs offered by higher education units and other alternative certification programs The practice of the principalship is viewed by the authors as a systematic process that addresses the operation of a school as a set of interrelated parts and skills that work together to create a self correcting model of student learning teaching and stakeholder participation An instructor's manual is available as a separate publication Action Research into Teaching English in Russia's Professional Context Natalia A. Gunina,2015-10-13 This book is a result of the investigative attempts of linguistics professionals to identify and meet the challenges of developing communicative competence in future engineers economists and other such specialists The unifying feature of all the contributions brought together here is the active involvement of the authors in practical instruction of English for specific professional purposes at the tertiary bachelors and masters programs level in Russia This volume covers a number of relevant areas in this field including new developments in methodology approaches to course and materials design and the contribution of language theory to foreign language teaching in a professional context The unique teaching approach advocated in this book denounces the traditional practice of transferring classical methodology of communicative oriented teaching to language classes for students with a non linguistic or non teaching professional orientation The underlying idea of this volume is that a change in professional context implies a change in language teaching methodology

including materials techniques and target competences The ideas and experiences analysed here will appeal to anyone interested in the current trends in foreign language teaching and learning and particularly to educationalists Who's who in America John W.
