## **New Syllabus Additional Mathematics Textbook:**

**New Syllabus Additional Mathematics Textbook** Dr Joseph Yeo, Teh Keng Seng, Loh Cheng Yee, Ivy Chow, 2013-01-01  
New Syllabus Additional Mathematics NSAM is an MOE approved textbook specially designed to provide valuable learning experiences to engage the hearts and minds of students sitting for the GCE O level examination in Additional Mathematics. Included in the textbook are Investigation Class Discussion Thinking Time and Alternative Assessment such as Journal Writing to support the teaching and learning of Mathematics. Every chapter begins with a chapter opener which motivates students in learning the topic. Interesting stories about mathematicians, real life examples and applications are used to arouse students' interest and curiosity so that they can appreciate the beauty of Mathematics in their surroundings and in the sciences. The use of ICT helps students to visualise and manipulate mathematical objects more easily, thus making the learning of Mathematics more interactive. Ready to use interactive ICT templates are available at <http://www.shinglee.com.sg/StudentResources>. The chapters in the textbook have been organised into three strands: Algebra, Geometry and Trigonometry, and Calculus. The colours purple, green and red at the bottom of each page indicate these. **New Syllabus Additional Mathematics** Keng Seng Teh, 2007

**New Syllabus Additional Mathematics Workbook** Dr Joseph Yeo, Teh Keng Seng, Loh Cheng Yee, Ivy Chow, 2013-01-01  
New Syllabus Additional Mathematics NSAM is a series of textbooks and workbooks designed to prepare students for the Singapore Cambridge GCE O level examination in Additional Mathematics. Together with the textbook, the workbook will provide students with ample practice to apply the various skills and concepts learnt to solving problems in both examination and real life situations. The workbook contains the following features:  
**REVISION NOTES** Revision Notes are found at the start of each chapter. They emphasise the important concepts and formulae in the chapter.  
**PRACTICE QUESTIONS** Practice Questions provide students with a wide range of questions for further practice. The questions are classified into three levels of difficulty: questions require students to use specific skills and concepts in the chapter; questions require students to apply their skills and concepts to solve problems; questions require students to apply various skills and concepts, including the use of problem solving skills, to solve problems.  
**Revision Exercise** The Revision Exercise is found after every few chapters to help students to recall and consolidate all the concepts learnt in these chapters.  
**Mid Year Specimen Papers and End of Year Specimen Papers** The Mid Year Specimen Papers and End of Year Specimen Papers have been written to follow closely to the format of school's Mid Year and End of Year examinations. It is hoped that when students use this book to reinforce the concepts that they are weak in, they will eventually gain success in Additional Mathematics. **New Syllabus Additional Mathematics Workbook** Keng Seng Teh, Ban Har Yeap, 2007

through many Additional Mathematics syllabuses and examination papers He has taught for many years as a teacher and tutor He understands the difficulties many students face That is why the book is a very comprehensive summary of all the topics the student needs to learn and covers almost every area where questions will most likely be asked Use it as a reference book to supplement textbooks and teachers teachings or as a guide for quick revision Mastering mathematics taught in secondary schools does not require a genius The most important secret in learning mathematics is in understanding as much as possible what is being taught Your reasoning mind must be convinced You must refuse to be force fed Concepts definitions theorems procedures and symbols must be understood and not accepted blindly only to be regurgitated in homework and examinations They must not be scattered like fallen leaves on the soil of a sterile mind They must be connected to each other like luscious fruits in a bunch of grapes That is how the materials in this book are organized Many topics and methods which are not found elsewhere are explained in detail but a lot of what can already be found in every textbook is excluded Standard forms of formulae are grouped together for easy reference Study each chapter thoroughly before going to the next omitting chapters which are not included in your syllabus This book is a great help to students but it can never replace their relentless efforts If any student refuses to exert his mind then his failure is expected but it is entirely self inflicted Food must be ingested digested and then absorbed assimilated and metabolized Mathematics topics once learned ingested and understood digested must be memorized absorbed associated and integrated with what one has learned before assimilated and put to use by constant practice metabolized Procedures which have already been justified to an inquiring mind must now become automatic in execution Mathematics is not a haphazard collection of formulas and theorems put together for the purpose of setting examination questions It is a supreme achievement of human creativity and ingenuity It is interesting challenging and useful It repays generously every one of its diligent students Passing examination is the least of its rewards
