*North Country* Jon K. Lauck, Gleaves Whitney, 2023-05-04 Travel north from the upper Midwest's metropolises and before long you're Up North, a region that's hard to define but unmistakable to any resident or tourist. Crops give way to forests, mines or their remains mark the landscape and lakes multiply becoming ever clearer until you reach the vastness of the Great Lakes. How to characterize this region as distinct from the agrarian Midwest is the question North Country seeks to answer. As a congenial group of scholars, journalists and public intellectuals explores the distinctive landscape, culture and history that define the northern margins of the American Midwest. From the glacial past to the present day, these essays range across the histories of the Dakota and Ojibwe people, colonial imperial rivalries and immigration and conflicts between the economic imperatives of resource extraction and the stewardship of nature. The book also considers literary treatments of the area and arguably makes its own contributions to that literature as some of the authors search for the North Country through personal essays while others highlight individuals who are identified with the area like Sigurd Olson, John Barlow Martin and Russell Kirk. From the fur trade to tourism, fisheries to supper clubs, Finnish settlers to Native treaty rights, the nature of the North Country emerges here in all its variety and particularity as clearly distinct from the greater Midwest as it is part of the American heartland.

In spite of its geographical extent and diversity and the size and importance of several Siouan speaking tribes, this family has received relatively little attention in the linguistic literature and many of the individual Siouan languages are severely understudied. This volume aims to make work on Siouan languages more broadly available and to encourage deeper investigation of the myriad typological, theoretical, descriptive and pedagogical issues they raise. The 17 chapters in this volume present a broad range of current Siouan research focusing on various Siouan languages from a variety of linguistic perspectives: historical, genetic, philological, applied, descriptive, formal, generative and comparative.
