topography that enables research and investigation

Media, Technology, and Literature in the Nineteenth Century

Margaret Linley, 2016-04-29 Operating at the intersection where new technology meets literature this collection discovers the relationship among image sound and touch in the long nineteenth century The chapters speak to the special mixed media properties of literature while exploring the important interconnections of science technology and art at the historical moment when media was being theorized debated and scrutinized Each chapter focuses on a specific visual acoustic or haptic dimension of media while also calling attention to the relationships among the three Famous works such as Wordsworth's I wandered lonely as a cloud and Shelley's Frankenstein are discussed alongside a range of lesser known literary scientific and pornographic writings Topics include the development of a print culture for the visually impaired the relationship between photography and narrative the kaleidoscope and modern urban experience Christmas gift books poetry painting and music as remediated forms the interface among the piano telegraph and typewriter Ernst Heinrich Weber's model of rationalized tactility and how the shift from visual to auditory telegraphic instruments amplified anxieties about the place of women in nineteenth century information networks Full of surprising insights and connections the collection offers new impetus for stimulating historical conversations and debates about nineteenth century media while also contributing fresh perspectives on new media and re mediation today

Histories offers new empirical research which engages critically with key concepts in media history today *Architecture and the Image at the Turn of the 21st Century* Sanja Rodeš, 2024-06-28 This book examines architecture image and media relationships as productive for architecture and architectural discourses By arguing that the relationships between architecture and media cannot be dismissed via linear criticism of architecture and media or image these relations are instead seen as a part of a sphere a mediasphere of complex relationships In lieu of anything like a consensus on the contemporary condition of architecture referring to the late twentieth and the twenty first centuries the starting point of this book is that the relationships between architecture media and images continue to multiply owing to continuous technological advancements Contemporary architecture considered in this book is related to the selected circumstances of high visibility where architectural images are propelled into visibility and conflated with non architectural images This takes architecture outside of architectural only discourse and into the public realm By granting higher visibility to both the architectural images and architecture in the public realm architecture can also be influenced by the various perceptions of the general public and can enter public consciousness via non architectural media With increased visibility architecture s far reaching presence calls for more structured analysis of its nature and potential As the analysed architecture in this book is associated with the discourses outside of architecture some of which relate to terrorism natural disaster and branding and consumption the limits of contemporary architectural discipline are questioned and extended This book is written for academics and students in architectural history theory and criticism particularly those interested in visual and media studies **The Builders**

Association Shannon Jackson, Marianne Weems, 2015-10-23 A lavishly illustrated history and critical appraisal of The Builders Association an award winning intermedia performance company with detailed accounts of its major productions This book begins with the building of a house and the building of a company while building the house It expands to look at the ideas found in various rooms some of which expanded into virtual space while they still were grounded in the lives of the artists in the house from the preface by Marianne Weems The Builders Association an award winning intermedia performance company founded in 1994 develops its work in extended collaborations with artists and designers working through performance video architecture sound and text to integrate live performance with other media Its work is not only cross media but cross genre fiction and nonfiction unorthodox retellings of classic tales and multimedia stagings of contemporary events This book offers a generously illustrated history and critical appraisal of The Builders Association written by Shannon Jackson a leading theater scholar and Marianne Weems the founder and artistic director of the company It also includes critical meditations from such artists and scholars as Elizabeth Diller Pico Iyer Saskia Sassen Kate Valk and many others Technological wizardry in the theater has a long history going back to the deus ex machina of ancient Greek drama The Builders Association makes its technological dependence visible putting backstage technologies center stage and presenting architectural assemblies of screens and bodies Jackson and Weems explore a series of major productions from

MASTER BUILDER Ibsen by way of Gordon Matta Clark to SUPERVISION an exploration of dataveillance to HOUSE DIVIDED the foreclosure crisis juxtaposed with the Joads of Steinbeck s The Grapes of Wrath Each work is described through a series of steps including R D Operating Systems Storyboard and Rehearsal Assembly The Builders Association not only traces the evolution of an intermedial aesthetic practice but also tells a story about how a group makes the risky decision to make art in the first place

From Voice to Influence Danielle Allen, Jennifer S. Light, 2015-06-19 How have online protests like the recent outrage over the Komen Foundation s decision to defund Planned Parenthood changed the nature of political action How do Facebook and other popular social media platforms shape the conversation around current political issues The ways in which we gather information about current events and communicate it with others have been transformed by the rapid rise of digital media The political is no longer confined to the institutional and electoral arenas and that has profound implications for how we understand citizenship and political participation With From Voice to Influence Danielle Allen and Jennifer S Light have brought together a stellar group of political and social theorists social scientists and media analysts to explore this transformation Threading through the contributions is the notion of egalitarian participatory democracy and among the topics discussed are immigration rights activism the participatory potential of hip hop culture and the porous boundary between public and private space on social media The opportunities presented for political efficacy through digital media to people who otherwise might not be easily heard also raise a host of questions about how to define good participation Does the ease with which one can now participate in online petitions or conversations about current events seduce some away from serious civic activities into slacktivism Drawing on a diverse body of theory from Hannah Arendt to Anthony Appiah From Voice to Influence offers a range of distinctive visions for a political ethics to guide citizens in a digitally connected world

Digital Memory and the Archive Wolfgang Ernst,2012-12-20 In the popular imagination archives are remote largely obsolete institutions either antiquated inevitably dusty libraries or sinister repositories of personal secrets maintained by police states Yet the archive is now a ubiquitous feature of digital life Rather than being deleted e mails and other computer files are archived Media software and cloud storage allow for the instantaneous cataloging and preservation of data from music photographs and videos to personal information gathered by social media sites In this digital landscape the archival oriented media theories of Wolfgang Ernst are particularly relevant *Digital Memory and the Archive* the first English language collection of the German media theorist s work brings together essays that present Ernst s controversial materialist approach to media theory and history His insights are central to the emerging field of media archaeology which uncovers the role of specific technologies and mechanisms rather than content in shaping contemporary culture and society Ernst s interrelated ideas on the archive machine time and microtemporality and the new regimes of memory offer a new perspective on both current digital culture and the infrastructure of media historical knowledge For Ernst different forms of media systems from library catalogs to sound recordings have influenced the content and understanding of the archive and other institutions of memory At the same time digital archiving has become a contested site that is highly resistant to curation thus complicating the creation and preservation of cultural memory and history
