New State Spaces Urban Governance And The Rescaling Of Statehood:

New State Spaces Neil Brenner, 2004-09-09 Simultaneously analysing the restructuring of urban governance and the transformation of national states under globalising capitalism *New State Spaces* is a mature analysis of broad interdisciplinary interest

New Urban Spaces Neil Brenner, 2019-05-24 The urban condition is today being radically transformed Urban restructuring is accelerating new urban spaces are being consolidated and new forms of urbanization are crystallizing In *New Urban Spaces* Neil Brenner argues that understanding these mutations of urban life requires not only concrete research but new theories of urbanization To this end Brenner proposes an approach that breaks with inherited conceptions of the urban as a bounded settlement unit the city or the metropolis and explores the multiscalar constitution and periodic rescaling of the capitalist urban fabric Drawing on critical geopolitical economy and spatialized approaches to state theory Brenner offers a paradigmatic account of how rescaling processes are transforming inherited formations of urban space and their variegated consequences for emergent patterns and pathways of urbanization The book also advances an understanding of critical urban theory as radically revisable key urban concepts must be continually reinvented in relation to the relentlessly mutating worlds of urbanization they aspire to illuminate

The Making of Grand Paris Theresa Enright, 2016-07-22 A critical examination of metropolitan planning in Paris the Grand Paris initiative and the building of today's networked global city In 2007 the French government announced the Grand Paris initiative This ambitious project reimaged the Paris region as integrated balanced global sustainable and prosperous Metropolitan solidarity would unite divided populations a new transportation system the Grand Paris Express would connect the affluent city proper with the low income suburbs streamlined institutions would replace fragmented governance structures Grand Paris is more than a redevelopment plan it is a new paradigm for urbanism In this first English language examination of Grand Paris Theresa Enright offers a critical analysis of the early stages of the project considering whether it can achieve its twin goals of economic competitiveness and equality Enright argues that by orienting the city around growth and marketization Grand Paris reproduces the social and spatial hierarchies it sets out to address For example large expenditures for the Grand Paris Express are made not for the public good but to increase the attractiveness of the region to private investors setting off a real estate boom encouraging gentrification and leaving many

residents still unable to get from here to there Enright describes Grand Paris as an example of what she calls grand urbanism large scale planning that relies on infrastructural megaprojects to reconfigure urban regions in pursuit of speculative redevelopment Democracy and equality suffer under processes of grand urbanism Given the logic of commodification on which Grand Paris is based these are likely to suffer as the project moves forward *Capital Cardiff 1975-2020* Alan Hooper, John Punter, 2006 Examining how the city of Cardiff has managed to transform itself in recent years this book analyses the way in which its local governments have promoted an economic social cultural physical and environmental transformation through a wide range of policy initiatives and partnerships with governments agencies and enterprises
