Pérez-Latre,Alfonso Sánchez-Tabernero,2022-03-03 The media are at the end of a cycle and at the beginning of a new model that is still unpredictable For decades the industry enjoyed solid profits a certain tranquillity and clear rules The presence of high barriers to entry hindered the progress of competitors and several key markets were in fact oligopolies This book tells how a stable industry was buffeted by winds that seriously threatened its essential pillars Free access and Internet development caused a dramatic drop of the value of the contents The public could often find information and entertainment at no cost therefore beginning to move away from the media that were poorly differentiated and predictable in terms of subjects and approaches The authors do not restrict themselves to writing a chronicle of those transformations they deepen the causes and propose solutions In their view companies in the sector have lacked the discipline necessary to keep pace with innovation adapt to change and make learning a constant and priority activity The industry needs better leaders managers with vision who can take risks and break the monotonous cycle of systematic imitation of success formulas that already belong to the past

Digital Technologies and the Evolving African Newsroom Hayes Mabweazara, 2016-04-14 African newsrooms are experiencing the disruptive impact of new digital technologies on the way they generate and disseminate news Indeed newsrooms are being forced to adapt in various ways and there are clear dimensions of localized creativity and adaptations by journalists to the digital revolution In the same way the influences of digitization Internet and social media are changing the informational needs of readers including how they engage with news These developments nonetheless remain on the margins of mainstream journalism research very few researchers have sought to qualitatively capture the implications of developments in digital technologies on the routine practices of African journalists especially in their natural habitat the newsroom In this light this edited volume interrogates the changing ecology of newsmaking in Africa in the context of rapid technological changes in newsrooms as well as in the wider social context of news production It brings together six contributions drawn from five countries Egypt Mozambique South Africa Nigeria and Zimbabwe to explore practices challenges and professional normative dilemmas emerging with the adoption and appropriation of new technologies While the studies point to dimensions of localised new technology appropriations as defined by the complex socio political structures in which African journalists operate they are not rigidly confined to Africa They are expressly in dialogue with theoretical observations largely emerging from Western scholarship In this sense the book goes beyond simply mainstreaming African perspectives it engages directly with dominant theoretical observations and
