**Patient-Subject Constructions in Mandarin Chinese** Xiaoling He, 2019-06-15 As a distinctive syntactic structure in Mandarin Chinese the Patient Subject Construction PSC is one of the most interesting but least well understood structures in the language This book offers a comprehensive account of the history structure meaning and use of the PSC Unlike previous descriptions which were framed in terms of pre-existing grammatical notions such as topicalization passivization and ergativization this book offers a fresh look at the PSC in which its syntactic and semantic as well as its discourse functions are examined within the system of major construction types of the language as a whole The PSC being low in transitivity serves primarily the function of backgrounding in discourse Typologically the PSC bears a resemblance to middle constructions in Indo-European and other languages raising interesting questions about ways to understand
