Nice Beyond Philosophy Subject Educational Post Structuralist:

Beyond the Philosophy of the Subject Michael A. Peters, Marek Tesar, 2015-11-19 This first volume focuses on a collection of texts from the latter twenty years of Educational Philosophy and Theory selected for their critical status as turning points or important awakenings in post structural theory In the last twenty years the applications of the postmodern and poststructuralist perspectives have become less mono focused less narrowly concerned with technical questions and also less interested in epistemology and more interested in ethics This book covers questions of genealogy ontology the body and the institution giving examples of theoretical applications of post structural theory that testify to the generative and endlessly applicable potential of this work to different fields and avenues of thought While informed by Foucault's thinking of the political subjugation of docile bodies to individuals as self determining beings the chapters in this book culminate in amalgamations of different schools of educational philosophy which explore poststructuralist approaches to education Beyond the Philosophy of the Subject will be key reading for academics researchers and postgraduate students in the fields of philosophy of education philosophy education educational theory post structural theory the policy and politics of education and the pedagogy of education Poststructuralism and Educational Research Michael A. Peters, Nicholas C. Burbules, 2004-10-26 Poststructuralism and its implications for something called postmodernism is a major topic of discussion in social theory and research generally including educational research The works of the major authors in this tradition Foucault Lyotard Cixous Derrida Haraway to name a few are challenging and difficult Yet more and more theorists and researchers in educational scholarship use this term to describe their work What does poststructuralism mean for these authors and what significance does it have for educational inquiry This book takes on these central questions and explores the impact of poststructuralism in language that makes the basic issues at stake accessible for a broad readership Michael Peters and Nicholas C Burbules highlight the implications of a poststructuralist stance for the conception of the research subject and examine its standards of validity and methods of investigation They also lay out the distinguishing characteristics of this approach to educational inquiry using as examples the particular ways in which writers including Giroux McLaren Lather and Ball have tried to incorporate the poststructuralist perspective into their investigations of educational issues The emphasis throughout this book will be on making these complex theoretical issues tangible and salient for the educational researcher **Critical Readings in Teacher Education**, 2008-01-01 Like other fields of study teacher education defines itself both by what it includes and by what it excludes Teacher educators and researchers have spent a great deal of time seeking and attempting to eradicate the flaws in existing structures and practices but significantly less time learning to perceive the absences The premise of this book is that until we can identify and begin to address what is absent teacher education will be constrained by a perennial recycling of concerns that have characterized so much of research policy and practice to date If teacher education is to have a different future we need to ask different and difficult questions This book

with contributions from theorists in Australia Canada and the United States addresses the challenges we face in establishing a more hopeful future for teacher education The authors provocative contributions identify what is missing in teacher education while providing critical counterpoints to existing frames of reference in the field In writing against the grain they open up new conceptual spaces and exciting trajectories for a different teacher education Philosophical Perspectives on Compulsory Education Marianna Papastephanou,2013-09-12 From antiquity to the present schools of some form have in one way or other been involved in the material and symbolic reproduction of societies Such diachronic resilience along with the synchronic omnipresence of schooling often makes schools appear as natural self evident and unavoidable This naturalization of schooling is then extended to its modern specification as compulsory in a universalist fashion This book does not only seek to explore what is left of older debates on compulsory education in the years hindsight but also to associate the discussion of schooling with new theoretical developments and new emphases It contains a first part which operates primarily at the conceptual and justificatory level and reserves a more or less qualified welcome to a revisited notion of compulsory And it supplements this first part with a second more applied one that focuses on specific aspects of compulsory schooling and or education From Luther down to John Stuart Mill and John Dewey compulsory education has been heralded either as a vehicle of social coordination and individual well being or as a vehicle of democratization and progress or as a means for protecting the rights of the young and of society and so on and so forth But there have also been periods of challenge and denaturalization of compulsory education producing a range of interesting and spirited debates not only on matters of educational legality but also on matters that boil down to broader philosophical questions about the self and the world Without neglecting the lasting significance of older debates argumentation over schooling its character and its scope can be recast in the light of current philosophical educational debates Given the fact that failure adequately to mine such connections leads to a lack in philosophical educational engagement with one of the most central pedagogical practices of the contemporary world namely the school the book aspires to remedy this lack and to put together work that addresses those connections through the highly original and innovative work of its contributors The subtext in all contributions is a vision of educational transformation in one way or other All chapters from the most theoretical to the most practice related promote a version of a recast or redirected compulsory schooling Feminist Critique of Education Christine Skelton,Becky Francis,2005-11-18 This book provides a valuable route map to the development of thinking in gender and education over the last fifteen years It includes over thirty five seminal articles from the journal Gender and Education written by many of the leading authors in the field from the UK the USA Australia and Europe Compiled by the current editors of the journal to show the development of the field the book is divided into six sections Gender Identities Theory and Method Policy and Management Sexuality Ethnicity Social Class The specially written introduction by the editors contextualises the selection and introduces students to the main issues and current thinking in the field Available in one easy to access place this

authoritative reference book provides a collection of articles that have lead the field It should find a place in every library and on every departmental bookshelf **Wellbeing, Education and Contemporary Schooling** Malcolm Thorburn,2017-08-08

Malott, John M. Elmore, Mike Cole, 2013-05-01 We are in the midst of yet another global crisis in capitalism In the UK we have the most right wing and ideologically driven government since Thatcher a ruthless cabal of millionaires intent on destroying the welfare state In the US President Obama whose initial record did not live up to the expectations of many on the Left is increasingly driven by right wing republicanism and other corporate interests At the same time there are developments in Latin America in particular Venezuela which are heralding the dawn of a new politics and recovering the voice of Marx but with a twenty first century socialist focus thus giving hope to the lives of millions of working people throughout the world This is why the world media is intent on discrediting President Hugo Chavez and insisting that ordinary people have to pay the cost of the crisis in capitalism The Arab Spring and the Occupy movement also show signs of an anti capitalist movement in embryo In Greece perhaps more than anywhere else in Europe even France the austerity stricken working classes are pushing for real existing socialism It is therefore not surprising that the ruling class of Greece is increasingly supporting the neo Nazi fascist Golden Dawn party threatening civil war should they lose power as a class Now is a prescient time to bring twenty first century socialism to the educational institutions of the world to teach Marx across the curriculum and across the globe Through this volume our goal was to contribute to the literature by concretely demonstrating the practical implications of Marx's theory to curriculum However while this book provides concrete examples of how Marx can and has informed a revolutionary critical education it is not intended to be prescriptive That is the chapters should not be read as a how to guide but they should be taken as inspiration for new creative approaches to Teaching Marx and interpreting and posing The Socialist Challenge **Feminists Researching Gendered Childhoods** Jayne Osgood, Kerry H.
