Going the Distance Ron Harris, 2020-02-11 A historical look at the early evolution of global trade and how this led to the creation and dominance of the European business corporation Before the seventeenth century trade across Eurasia was mostly conducted in short segments along the Silk Route and Indian Ocean Business was organized in family firms merchant networks and state owned enterprises and dominated by Chinese Indian and Arabic traders However around 1600 the first two joint stock corporations the English and Dutch East India Companies were established *Going the Distance* tells the story of overland and maritime trade without Europeans of European Cape Route trade without corporations and of how new large scale and impersonal organizations arose in Europe to control long distance trade for more than three centuries Ron Harris shows that by 1700 the scene and methods for global trade had dramatically changed Dutch and English merchants shepherded goods directly from China and India to northwestern Europe To understand this transformation Harris compares the organizational forms used in four major regions China India the Middle East and Western Europe The English and Dutch were the last to leap into Eurasian trade and they innovated in order to compete They raised capital from passive investors through impersonal stock markets and their joint stock corporations deployed more capital ships and agents to deliver goods from their origins to consumers *Going the Distance* explores the history behind a cornerstone of the modern economy and how this organizational revolution contributed to the formation of global trade and the creation of the business corporation as a key factor in Europe's economic rise

Shadow Networks Francisco Louçã, Michael Ash, 2018 Many accounts of the financial crisis focus on renegade activity in marginal financial sectors This book argues that far from this pervading view the shadow finance that initiated the crisis is tightly networked with bank based finance It traces these networks to explain how the now decade long crisis took shape

Capitalisms Kaveh Yazdani, Dilip M. Menon, 2020-01-02 Conventional accounts often conceive the genesis of capitalism in Europe within the conjunctures of agricultural commercial and industrial revolutions Challenging this widely believed cliché this volume traces the history of capitalism across civilizations tenth century onwards and argues that capitalism was neither a monolithic entity nor exclusively an economic phenomenon confined to the West Looking at regions as diverse as England South America Russia North Africa and East South West and Southeast Asia the book explores the plurality of developments across time and space The chapters analyse aspects such as historical conjunctures commodity production and distribution circulation of knowledge and personnel and the role of mercantile capital small producers and force all the while stressing

the necessity to think beyond present day national boundaries The book argues that the multiple histories of capitalism can be better understood from a trans regional intercontinental and interconnected perspective **The Interwar World**

Andrew Denning, Heidi J.S. Tworek, 2023-08-29 The Interwar World collects an international group of over 50 contributors to discuss analyze and interpret this crucial period in twentieth century history A comprehensive understanding of the interwar era has been limited by Euro American approaches and strict adherence to the temporal limits of the world wars The volume's contributors challenge the era's accepted temporal and geographic framings by privileging global processes and interactions Each contribution takes a global thematic approach integrating world regions into a shared narrative Three central questions frame the chapters First when was the interwar Viewed globally the years 1918 and 1939 are arbitrary limits and the volume explicitly engages with the artificiality of the temporal framework while closely examining the specific dynamics of the 1920s and 1930s Second where was the interwar Contributors use global history methodologies and training in varied world regions to decenter Euro American frameworks engaging directly with the usefulness of the interwar as both an era and an analytical category Third how global was the interwar Authors trace accelerating connections in areas such as public health and mass culture counterbalanced by processes of economic protectionism exclusive nationalism and limits to migration By approaching the era thematically the volume disaggregates and interrogates the meaning of the global in this era As a comprehensive guide this volume offers overviews of key themes of the interwar period for undergraduates while offering up to date historiographical insights for postgraduates and scholars interested in this pivotal period in global history
