New Ideas On Development After The Financial Crisis Forum On Constructive Capitalism:

New Ideas on Development after the Financial Crisis Nancy Birdsall, Francis Fukuyama, 2011-05-15 The global financial crisis of 2008-9 has changed the way people around the world think about development. The market friendly, lightly regulated model of capitalism promoted by the United States is now at risk and development thinking worldwide is at something of an impasse. Editors Nancy Birdsall and Francis Fukuyama bring together leading scholars to explore the implications of the global financial crisis on existing and future development strategies. In addressing this issue, the contributors contemplate three central questions: What effect has the crisis had on current ideas in development thinking? How has it affected and how will it affect economic policy and political realities in Latin America and Asia, including China and India? Will the financial collapse reinforce shifts in geopolitical power and influence and in what form? Essays answering these questions identify themes that are essential as economic and political leaders address future challenges of development. To help move beyond this time of global economic turmoil, the contributors, the foremost minds in the field of international development, offer innovative ideas about stabilizing the international economy and promoting global development strategies.
