Worldwide renowned experts share their experience and cutting edge research in *Advanced Therapies in Pediatric Endocrinology and Diabetology* which makes it a useful and interesting resource for every pediatric endocrinologist not only those active in clinical research but also those involved in the management of children with endocrine diseases in daily practice.

Yearbook of Pediatric Endocrinology 2013 K. Ong, Z. Hochberg, 2013-09-05. The body of knowledge in most medical specialties is rapidly expanding making it virtually impossible to follow all advances in clinical and basic sciences that are relevant to a given field. This is particularly true in pediatric endocrinology at the cross road of pediatrics, endocrinology, development and genetics. Providing abstracts of articles that report the year's breakthrough developments in the basic sciences and evidence based new knowledge in clinical research and clinical practice that are relevant to the field, the *Yearbook of Pediatric Endocrinology 2013* keeps busy clinicians and scientists, pediatric endocrinologists and also pediatricians and endocrinologists informed on new advances. Twelve Associate Editors and their co-authors selected from several thousand papers those that brought the most meaningful new information, summarized them and provided comments to put them into perspective. The papers are classified into those that identify new genes involved in diseases, new hormones, concepts revised or re-centered, important observations for clinical practice, large scale clinical trials, new mechanisms, new paradigms, important review articles, new fears and new hopes. Because the *Yearbook* is endorsed by the European Society for Paediatric Endocrinology (ESPE), its publication is linked to the annual meeting of the ESPE. The *Yearbook of Pediatric Endocrinology 2013* covers the medical and scientific literature from June 2012 through May 2013.

Consumer Health: Making Informed Decisions - BOOK ALONE Butler, 2011-07. *Consumer Health: Making Informed Decisions* is a concise current text with the most up to date information about health care reform and insurance. It is devoted to the most important issues relative to consumer health issues including advertising, dietary supplements, herbal remedies, weight management and medications. There are in depth analyses of the American health care system, insurance options and consumer protection. The text also takes a critical look at complementary and alternative therapies. Throughout the text there are guidelines for making decisions that can benefit the individual. A comprehensive list of learning objectives precede each chapter and a list of study questions conclude each chapter. The questions are designed to help the student summarize the major points of the chapter, prepare for exams and critically analyze the material contained in the chapters.
