New Zealand Us Security Cooperation And The Us Rebalancing To Asia Strategy:

The New US Strategy towards Asia William T Tow, Douglas Stuart, 2014-12-17 Barack Obama's rebalancing or pivot strategy intended to demonstrate continued US commitment to the Asia Pacific region in a variety of military economic and diplomatic contexts was launched with much fanfare in 2011 Implicit in the new strategy is both a focus on China engagement with and containment of and a heavy reliance by the United States on its existing friends and allies in the region in order to implement its strategy This book explores the impact of the new strategy on America's regional friends and allies It shows how these governments are working with Washington to advance and protect their distinct national interests while at the same time avoiding any direct confrontation with China It also addresses the reasons why many of these regional actors harbour concerns about the ability of the US to sustain the pivot strategy in the long run Overall the book illustrates the deep complexities of the United States exercise of power and influence in the region Asia Pacific Countries and the US Rebalancing Strategy David W.F. Huang, 2016-06-29 This book examines the success of the US rebalancing or pivot strategy towards Asia placing the US pivot in a historical context while highlighting its policy content and management dilemmas Further the contributors discuss the challenges and opportunities that each regional state confronts in responding to the US rebalancing strategy In 2011 President Barack Obama laid out the framework for a strategic pivot of US policy towards the Asia Pacific region Writers in this volume focus specifically on Asian perception of the strategy Among the topics they explore are China's desire to be seen as equal to the US while maintaining foreign policy initiatives independent of the US strategic rebalance the strengthening of Japan's alliance with the US through its security policies the use of US China competition by South Korea to negotiate its influence in the region and Australia's embrace of the strategy as a result of foreign direct investment that provides economic benefits to the country **Lost Decade** Robert D. Blackwill, Richard Fontaine, 2024 Across the political spectrum there is wide agreement that Asia should be at the center of US foreign policy But this worldview the Pivot to Asia announced by the Obama Administration in 2011 is a dramatic departure from the entire history of American grand strategy Ten years on we now have some perspective to evaluate it in depth In *The Lost Decade* Robert Blackwill and Richard Fontaine take this long view They conclude that there are few successes to speak of and that we lack a coherent approach to the Indo Pacific region They examine the Pivot through various lenses situating it historically in the context of America's global foreign policy revealing the inside story of how it came about assessing the effort thus far identifying the ramifications in other regions namely Europe and the Middle East and proposing a path forward

Rebalance to Asia II United States. Congress. Senate. Committee on Foreign Relations. Subcommittee on East Asian and Pacific Affairs, 2014 *Rebalancing U.S. Forces* Andrew Sven Erickson, Carnes Lord, 2014-05-15 As the U S military presence in the Middle East winds down Asia and the Pacific are receiving increased attention from the American national security community The Obama administration has announced a rebalancing of the U S military posture in the region in

reaction primarily to the startling improvement in Chinese air and naval capabilities over the last decade or so This timely study sets out to assess the implications of this shift for the long established U S military presence in Asia and the Pacific This presence is anchored in a complex basing infrastructure that scholars and Americans generally too often take for granted In remedying this state of affairs this volume offers a detailed survey and analysis of this infrastructure its history the political complications it has frequently given rise to and its recent and likely future evolution American seapower requires a robust constellation of bases to support global power projection Given the rise of China and the emergence of the Asia Pacific as the center of global economic growth and strategic contention nowhere is American basing access more important than in this region Yet manifold political and military challenges stemming not least of which from rapidly improving Chinese long range precision strike capabilities complicate the future of American access and security here This book addresses what will be needed to maintain the fundamentals of U S seapower and force projection in the Asia Pacific and where the key trend lines are headed in that regard This book demonstrates that U S Asia Pacific basing and access is increasingly vital yet increasingly vulnerable It demands far more attention than the limited coverage it has received to date and cannot be taken for granted More must be done to preserve capabilities and access upon which American and allied security and prosperity depend

Raja Mohan,2025-09-23 Few regions have transformed as consequentially as Asia in the twenty first century In recent decades China has risen faster than its neighbours and today outranks its major proximate competitors India and Japan on economic and defence indices by huge margins The United States interest in balancing against China is especially significant

for India because the contradictions between New Delhi and an increasingly assertive Beijing are the sharpest in the region In this Adelphi book C Raja Mohan delineates the prospects for an Indian role in structuring a new Asian geopolitical order Grounding his analysis in the often neglected evolution of modern Indian foreign and security policies from the colonial era to the twenty first century Mohan argues that China s rise has compelled India to discard its traditional ambivalence about Chinese power and counter Beijing by strengthening its own national power and developing partnerships with other states primarily the US In addition to considering potential challenges to the emerging US India strategic relationship the book evaluates India s likely contributions to a new Asian security political and economic order in the light of both New Delhi s enduring regional interests and the policy changes envisioned by the second Trump administration
