Dick Umberto Rossi, 2014-01-10 Philip K Dick was one of the most popular science fiction novelists of the 20th century but the contradictory and wily writer has troubled critics who attempt encompassing explanations of his work This book examines Dick's writing through the lens of ontological uncertainty providing a comparative map of his oeuvre tracing both the interior connections between books and his allusive intertextuality Topics covered include time travel alternate worlds androids and simulacra finite subjective realities and schizophrenia Twenty novels are explored in detail including titles that have received scant critical attention Some of his most important short stories and two of his realist novels are also examined providing a general introduction to Dick's body of work

repositioned Asian culture in relation to the science fiction genre in the period Underpinning this study Sang Keun Yoo argues that Speculative Orientalism emerged in American science fiction during the 1950s and 60s This concept adopted various aspects of Asian religions to envision alternative worlds unburdened by the constraints of colonialism totalitarianism racism and sexism present in contemporary American society Bringing fresh perspectives to the works of William S Burroughs Philip K Dick Ursula K Le Guin and Samuel R Delany this book offers an insightful examination of the role of Asian religions in American science fiction and their impact on the genre s history US American Expressions of Utopian and Dystopian Visions Saskia Fürst,Yvonne Kaisinger,Ralph Poole,2017 This collection takes stock of current discourses in American studies on the political valence of American utopias be they as religious diasporas or as socialist experiments fantastic or realist successful or failed The included essays take into account the spatiality of utopias especially in their visionary scope analyze currents in literary utopias and look at dystopian visions in literature This volume strives to keep alive the long tradition of writers artists and scholars who warned against imminent disasters and envisioned ways to counter such ruinous bearings Series American Studies in Austria Vol 17 Subject Sociology Literary Studies *The Once and Future Turing* S. Rickels,2010 Aside from its perfect fit of critic and subject Laurence A Rickels s book provides the most thorough and exhaustive reading of Philip K Dick s literary work that exists He goes through all the novels literally both the science fiction works and the so called mainstream novels Dick did not publish in his lifetime The reader of science fiction should welcome a book like this which is both knowledgeable of the SF tradition tradition and creatively analytical I could not put this book down once I began to read it George Slusser University of California Riverside *The World According to Philip K. Dick* A.

Dunst,S. Schlensag,2015-04-05 As the first essay collection dedicated to Philip K Dick in two decades this volume breaks new ground in science fiction scholarship and brings innovative critical perspectives to the study of one of the twentieth century s most influential authors **Urban Crime Control in Cinema** Vladimir Rizov,2023-02-11 This book uses popular films to understand the convergence of crime control and the ideology of repression in contemporary capitalism It focuses on the cinematic figure of the fallen guardian a protagonist who in the course of a narrative falls from grace and becomes an enemy of the established social order The fallen guardian is a figure that allows for the analysis of a particular crime control measure through the perspective of both an enforcer and a target The very notion of justice is challenged and questions are posed in relation to the role that films assume in the reproduction of policing as it is In doing so the book combines a historical far reaching perspective with popular culture analysis At the core remains the value of the cinematic figure of the fallen guardian for contemporary understandings of urban space and urban crime control and how films are clear examples of the ways in which the ideology of repression is reproduced This book questions the justifications that are often given for social control in cities and understands cinema as a medium for offering critique of such processes and justifications Explored are the crime control measures of private policing in relation to RoboCop 1987 preventative policing and Minority Report 2002 mass incarceration in The Dark Knight Rises 2012 and extra judicial killing in Blade Runner 2049 2017 The book speaks to those interested in crime control in critical criminology cultural criminology urban studies and beyond *The Boundaries of the Criminal Law* R.A. Duff,2010-11-11 This is the first book of a series on criminalization examining the principles and goals that should guide what kinds of conduct are to be criminalized and the forms that criminalization should take The first volume studies the scope and boundaries of the criminal law asking what principled limits might be placed on criminalizing behaviour The Minority Report Philip K. Dick,1991 This collection Vol 4 covers the years 1954 1964 and includes such fascinating stories as Service Call Stand By The Days of Perky Pat and many others *Infoglut* Mark Andrejevic,2013-06-26 Today more mediated information is available to more people than at any other time in human history New and revitalized sense making strategies multiply in response to the challenges of cutting through the clutter of competing narratives and taming the avalanche of information Data miners sentiment analysts and decision markets offer to help bodies of data speak for themselves making sense of their own patterns so we don t have to Neuromarketers and body language experts promise to peer behind people s words to see what their brains are really thinking and feeling New forms of information processing promise to displace the need for expertise and even comprehension at least for those with access to the data Infoglut explores the connections between these wide ranging sense making strategies for an era of information overload and big data and the new forms of control they enable Andrejevic critiques the popular embrace of deconstructive debunkery calling into question the post truth post narrative and post comprehension politics it underwrites and tracing a way beyond them **The Moral Conflict of Law and Neuroscience** Peter A. Alces,2018-01-24 Law relies on a conception

of human agency the idea that humans are capable of making their own choices and are morally responsible for the consequences But what if that is not the case Over the past half century the story of the law has been one of increased acuity concerning the human condition especially the workings of the brain The law already considers select cognitive realities in evaluating questions of agency and responsibility such as age sanity and emotional distress As new neuroscientific research comprehensively calls into question the very idea of free will how should the law respond to this revised understanding Peter A Alces considers where and how the law currently fails to appreciate the neuroscientific revelation that humans may in key ways lack normative free will and therefore moral responsibility The most accessible setting in which to consider the potential impact of neuroscience is criminal law as certain aspects of criminal law already reveal the naiveté of most normative reasoning such as the inconsistent treatment of people with equally disadvantageous cognitive deficits whether congenital or acquired But tort and contract law also assume a flawed conception of human agency and responsibility Alces reveals the internal contradictions of extant legal doctrine and concludes by considering what would be involved in constructing novel legal regimes based on emerging neuroscientific insights

Contemporary Masculinities in Fiction, Film and Television Brian Baker, 2016-07-28 While masculinity has been an increasingly visible field of study within several disciplines sociology literary studies cultural studies film and tv over the last two decades it is surprising that analysis of contemporary representations of the first part of the century has yet to emerge Professor Brian Baker evolving from his previous work *Masculinities in Fiction and Film Representing Men in Popular Genres 1945-2000* intervenes to rectify the scholarship in the field to produce a wide ranging readable text that deals with films and other texts produced since the year 2000 Focusing on representations of masculinity in cinema popular fiction and television from the period 2000-2010 he argues that dominant forms of masculinity in Britain and the United States have become increasingly informed by anxiety trauma and loss and this has resulted in both narratives that reflect that trauma and others which attempt to return to a more complete and heroic form of masculinity While focusing on a range of popular genres such as Bond films war movies science fiction and the Gothic the work places close analyses of individual films and texts in their cultural and historical contexts arguing for the importance of these popular fictions in diagnosing how contemporary Britain and the United States understand themselves and their changing role in the world through the representation of men fully recognising the issues of race ethnicity class sexuality and age Baker draws upon current work in mobility studies and in the study of masculinities to produce the first book length comparative study of masculinity in popular culture of the first decade of the twenty first century

Globalisation, Citizenship and the War on Terror Maurice Mullard, Bankole Cole, 2007-01-01 This is an important book We are entering a new era Mainstream politics has become decadent We need to think afresh This book helps that complicated process The Rt Hon Clare Short MP This book explores globalisation and the war on terror in a world that is becoming increasingly and significantly polarised and in which dialogue is undermined The authors contend that citizenship

does not obey a static definition and that its meaning is located in changing economic social and political contexts Equally civil political and social rights are continually being politically defined The war on terror has the book argues influenced issues of civil liberties and prioritised the need for security over and above the protection of human rights it has redefined the meaning of the rule of law This wide ranging collection of original papers explores the link between globalisation citizenship and the war on terror Drawing on principles and ideas from their individual areas of expertise the contributors illustrate how the processes of globalisation and the war on terror are shaping and defining citizenship both globally and within nation states They go on to examine the nature of globalisation and the war on terror via theoretical frameworks analysis of current issues and by reflecting on existing literature and past events Seeking to connect the war on terror with issues of racism resistance global poverty and forms of organised violence and social control this book will provide a stimulating thought provoking read for scholars of a wider range of research fields including international business politics criminology sociology and development studies
