Nice Book Private Enforcement Before National Courts:

Standing to Enforce European Union Law before National Courts Hilde K Ellingsen, 2021-03-25 Access to court has long been recognised as an essential element of a Union based on the rule of law This book asks how can Member States ensure that their rules on standing guarantee that right The book answers this question by analysing the requirements of EU law from two angles first the effective protection of Union rights second the effectiveness of Union law per se With detailed case law examination the book formulates an autonomous Union law doctrine of standing based on the principle of effective judicial protection It then goes further setting out an effectiveness test of Member States enforcement mechanisms to ensure that EU law is rendered operative in practice This is a rigorous study on a question of immense importance *Combating Collusion in Public Procurement* Katarzyna Kuźma, Wojciech Hartung, 2020-10-30 This book offers a clear and structured examination of how joint bidding structures comply with competition rules in Europe It explains how joint bids could be considered as agreements aimed at distorting competition the practice commonly referred to as bid rigging The book demonstrates how the conclusion of joint bid agreements could constitute grounds for exclusion from public procurement proceedings under Article 57 4 d of Directive 2014 24 EU [The Passing-On Problem in Damages and Restitution under EU Law](#) Magnus Strand, Ignacio García-Perrote Martínez, 2023-12-11 Passing on occurs when harm or loss incurred by a business is passed on to burden that business s customers or the next level of the supply chain In this thoroughly revised and updated second edition the authors provide the only available comprehensive examination of passing on in damages and restitution under EU law The analysis covers a broad range of contexts including competition damages and the repayment of charges

Vertical Agreements in EU Competition Law Frank Wijckmans, Filip Tuytschaever, 2025-03-19 Now in its fourth edition this volume provides comprehensive specialised coverage of EU competition law applicable to vertical agreements offering insightful analysis of the new block exemption regime under the Regulation EU 2022 720 and the 2022 Vertical Guidelines and the block exemption regime applicable to the distribution of motor vehicles Business practice is replete with vertical agreements and practitioners are often asked to advise on the admissibility of certain restrictions of competition included in such agreements The latest edition of Vertical Agreements in EU Competition Law discusses these restrictions and the different distribution systems in which they can be found including exclusive selective and free distribution as well as franchising and agency It offers expanded coverage of regulations applicable to online sales and advertising including a new chapter on e commerce The authors draw on their competition law experience to provide detailed and practice oriented analysis of the EU regulatory framework as applied by the Commission and the EU courts The latest instalment of an established practitioner text Vertical Agreements in EU Competition Law is an essential resource for lawyers and legal counsel practising in the field of competition law **MiFID II and Private Law** Federico Della Negra, 2019-07-11 In the wake of the global financial crisis investors have suffered significant losses as a result of breaches of conduct of business

rules in the distribution of financial instruments MiFID II introduced new disclosure distribution and product governance rules to strengthen the protection of investors but like MiFID I did not harmonise the civil law consequences for their violation This book asks whether in spite of the silence of the EU legislators the MiFID II conduct of business rules may produce civil law effects enabling investors to enforce them against investment firms before national courts and alternative dispute resolution ADR mechanisms Building on the case law of the CJEU the book shows the conditions under which the breach of MiFID II conduct of business rules should give rise to a private law remedy and what remedies would be compatible with EU law MiFID II and Private Law is an essential contribution to academic research in EU and financial law and will be a key text for policy makers and legal practitioners working in the field of investor protection regulation and mis selling litigation

International Antitrust Litigation Jurgen Basedow, Stephanie Francq, Laurence Idot, 2012-02-03 The decentralisation of competition law enforcement and the stimulation of private damages actions in the European Union go hand in hand with the increasingly international character of antitrust proceedings As a consequence there is an ever growing need for clear and workable rules to co ordinate cross border actions whether they are of a judicial or administrative nature rules on jurisdiction applicable law and recognition as well as rules on sharing of evidence the protection of business secrets and the interplay between administrative and judicial procedures This book offers an in depth analysis of these long neglected yet practically most important topics It is the fruit of a research project funded by the European Commission which brought together experts from academia private practice and policy making from across Europe and the United States The 16 chapters cover the relevant provisions of the Brussels I and Rome I and II Regulations the co operation mechanisms provided for by Regulation 1 2003 and selected issues of US procedural law such as discovery that are highly relevant for transatlantic damages actions Each contribution critically analyses the existing legislative framework and formulates specific proposals to consolidate and enhance cross border antitrust litigation in Europe and beyond

Antitrust Settlements Giovanna Massarotto, 2019-10-17 Competition enforcement authorities use settlements as a tool to ensure compliance with antitrust law Companies can make commitments to remedy breaches ensuring that they avoid litigation and potential fines and reputational damage The author of this highly original and innovative book shows that rather than fines or arguing principles of competition law in litigation antitrust settlements namely U S consent decrees and EU commitment decisions hold the key to globally effective enforcement particularly in the digital and blockchain era Antitrust law does not necessarily need to be abolished but rather should be fully exploited as an economic regulation led by antitrust settlements In supporting her thesis the author examines such elements of competition enforcement as the following drawbacks of allowing the courts to regulate markets whether antitrust settlements sacrifice antitrust deterrence how settlements rapidly and surgically regulate markets comparative analysis between U S consent decrees and EU commitment decisions economic analysis on the adoption of antitrust settlements in both the U S and EU markets from 2013 to 2018 fundamental role of antitrust

settlements in regulating the current digital markets and comprehensive description on how to use antitrust settlements to regulate the data industry With its thorough guidance on U S consent decrees and EU commitment decisions from their functioning to their characteristics and procedure and its extensive treatment of the main antitrust remedies available and used in enforcing of antitrust law in both the U S and EU the book provides both an economic and a legal analysis of the functioning and the scope of antitrust settlements It assesses the influence of decisions on companies behavior and agencies practice using economic analysis to show the procompetitive or anticompetitive effects of remedies with special attention to digital markets Because markets have become so dynamic and unpredictable that is difficult to preserve efficiency the author says there is a little room for law economic regulation is a better fit This book is a springboard to further investigate how a simple antitrust enforcement tool having turned competition law into an economic regulation policy can drive our economy leading both the antitrust and regulatory interventions in tackling today s market challenges *Competition Damages*

Actions in the EU and the UK David Ashton,2023-01-20 *Competition Damages Actions in the EU and the UK* is the clearest and most coherent reference point on damages actions for breach of EU competition law **Litigation and Arbitration in**

Judgments in Relation to EU Competition Law Claims Mihail Danov,2010-12-09 This book sets out the way that through enhanced private antitrust enforcement reform private international law has a pivotal role in EU competition law disputes with an international element The author offers a thorough analysis of the post 2003 policy of the EU favouring private law enforcement of EU competition law and its implementation under the existing provisions for jurisdiction and recognition and enforcement of foreign judgments under the Brussels I regime The book also considers how the jurisdiction recognition and enforcement of judgments issues are dealt with in England under the common law rules applicable when Brussels I does not apply The complex private international law problems in respect of cross border class actions that have arisen in several countries as well as judgments in relation to antitrust infringements are also discussed The author further examines the choice of law issues that may arise before the English courts under Rome I and Rome II The potential problems regarding jurisdiction of arbitral tribunals and choice of law in arbitral proceedings in relation to EU competition law claims and the jurisdiction of English courts in proceedings ancillary to arbitration claims are dealt with accordingly This title is included in Bloomsbury Professional s International Arbitration online service **Remedies in Public Competition Law** Massimo

Merola, 2025-05-19 Public competition law addresses State measures that have the effect of actually or potentially distorting competition. In this thoroughly researched and compelling book, a well-known authority on EU State aid examines the system of remedies available in cases of infringement of State aid rules and proposes a specific approach to reform. The book combines a detailed analysis of the origins, stated goals, and fundamental principles of the system of recovery of unlawful aid with recommendations designed to ensure effective deterrence, rectify competitive distortions caused by unlawful aid, and mitigate conflicts between Member States and aid beneficiaries. In the process of delineating the substantive and procedural rules, including enforcement criteria that constitute the backbone of the current system of remedies, as well as highlighting the uncertainties and inconsistencies that a comprehensive reform should seek to address, the analysis explores such contextual factors as the following: inclusion of aid beneficiaries in administrative procedures; establishment of a specific procedure for determining remedies; adaptation of the system of remedies to the modernisation of State aid law, including objectives such as budgetary discipline and effective tackling of economic crises; clarification of the notion of the status quo ante; enforcement of State aid law by national courts; harmonisation of national laws governing the private enforcement of State aid rules; and convergence of State aid law and foreign subsidies law to create a comprehensive system of remedies for public competition law as a whole. The author's call for urgent comprehensive reform of the EU's State aid system of remedies promises to enhance policy coherence and effectiveness. Both theoretical and practical, the book will nourish scholarship in the field and assist greatly in the work of interested policymakers and practitioners.
