Military and Society in 21st Century Europe Jürgen Kuhlmann, Jean Callaghan, 2000 After the Cold War came to an end European countries in both East and West faced the common question of how their military organizations and those of their neighbors would respond to shifts in international relations affecting their economies their perception of globalized threats and cross national security management It is undisputed for example that in well developed democratic societies the challenge to the legitimacy of the military in society the decreasing subjective apprehension of threat and growing opposition to systems of universal conscription have been linked to gains in wealth and living standards This volume seeks by empirically measuring social indicators to assess the current state of civil military relations in a number of countries in Eastern Europe Bulgaria Czech Republic Hungary Romania Russia as well as the state of relations in several of their Western European counterparts France Germany Italy the Netherlands The country studies describe and analyze the

differing positions of the military in their specific national settings **Germany's New Security Demographics** Wenke Apt,2013-12-04 Military recruitment will become more difficult in times of demographic aging The question arises whether demographic change will constrain the capacity of aging states like Germany to conduct foreign policy and pursue their national security interests Since contemporary military operations still display a strong human element particular scrutiny is given to the empirical analysis of the determinants of military propensity and military service among youth An additional human capital projection until 2030 illustrates how the decline in the youth population will interact with trends in educational attainment and adolescent health to further complicate military recruitment in the future A concluding review of recruiting practices in other NATO countries provides insight in best practice policy options to reduce the military's sensitivity to demographic change Following this approach the book gives prominence to a topic that has thus far been underrepresented in the greater discussion of demographic change today namely the demographic impact on international affairs and strategic calculations **Changing U.S. Military Manpower Realities** Franklin D. Margiotta,2019-03-13 Manpower qualified experienced and in adequate supply is considered by many to be the keystone of the U S capability to deter or wage war But can the all volunteer force AVF continue to attract and retain the quantity and quality of active and reserve forces required to meet the security needs of the nation The contributors to this collectio **Sex, Drugs and Young People** Peter Aggleton,Andrew Ball,Purnima Mane,2013-09-13 This book calls into question mainstream assumptions about adolescence that underlie many of our understandings in relation to sexual practices and drug use among the young It provides a more complex view of the transition to adulthood as not merely biologically driven but rather socially and culturally organized
