Militias And The Challenges Of Post Conflict Peace Silencing The Guns:

Militias and the Challenges of Post-conflict Peace Chris Alden, 2021 Bringing together four intensively researched case studies the Democratic Republic of Congo Timor Leste Afghanistan and Sudan Militias and the Challenges of Post Conflict Peace argues that the international community's cookie cutter approach to demilitarization is ineffective at meeting the myriad of challenges involving militias In doing so the authors propose a radical new framework for demilitarization that questions conventional models and takes into account the reality on the ground

Militias and the Challenges of Post-Conflict Peace Chris Alden, Doctor Monika Thakur, Matthew Arnold, 2011-03-10 Militias have proven to be a consistent and enduring challenge to achieving peace in war zones around the world Whether armed by embattled governments in defence of their territory or fostered by external actors in the interests of greed or grievance these groups occupy an uncertain and deeply controversial position in the changing landscape of conflict Linked variously to atrocities against civilians or international criminal elements part of what distinguishes them from more traditional combatants is their willingness to engage in violent tactics that defy international norms as well as a proclivity to embrace expediency in alliance making As such their diversity of form unorthodox nature and sheer numbers make achieving short term stability and an enduring peace a consistently difficult proposition Bringing together the lessons learned from four intensively researched case studies the Democratic Republic of Congo Timor Leste Afghanistan and Sudan the book argues that the overly rigid cookie cutter approach to demilitarization developed and commonly implemented presently by the international community is ineffective at meeting the myriad of challenges involving militias In doing so the authors propose a radical new framework for demilitarization that questions conventional models and takes into account on the ground realities

Silencing the Guns: Pathways to Sustainable Peace in Postcolonial Africa Seife Tadelles Kidane, 2025-09-08 This book interrogates the major challenges of postcolonial Africa that have hindered development peace and security It advocates for different paths to secure peace and tranquillity more specifically by employing indigenous knowledge systems and examines the sources of African military coups and their political and other contexts and how to prevent their recurrence The author conducts a multidisciplinary examination of postcolonial Africa's peace and security dynamics providing readers with a nuanced understanding of the continent's challenges and opportunities in these critical areas By synthesizing insights from political science history sociology and international relations they offer a holistic perspective that transcends conventional disciplinary boundaries In the wake of decolonization Africa emerged as a continent grappling with myriad challenges particularly in the realms of peace and security From colonial legacies to contemporary geopolitical dynamics the journey towards stability has been fraught with complexities and contradictions This book delves into these complexities offering a comprehensive exploration of the factors shaping Africa's peace and security landscape

Military Integration during War-to-Peace Transitions Lesley Anne Warner, 2023-06-07 In the 1960s only 10% of peace agreements included some element

of political military accommodation namely military integration From Burundi to Bosnia to Zimbabwe that number had increased to over 50% by the 2000s However relatively little is understood about this dimension of power sharing often utilized during war to peace transitions Through an examination of the case of South Sudan between 2006 and 2013 this book explores why countries undergoing transitions from war to peace decide to integrate armed groups into a statutory security framework This book details how integration contributed to short term stability in South Sudan allowing the government to overcome wartime factionalism and consolidate political military power prior to the referendum on self determination in 2011 It also examines how the integration process in South Sudan was flawed by its open ended nature and lack of coordination with efforts to right size the military and transform the broader defense sector and how this led the military to fragment during periods of heightened political competition Furthermore the book explains why integration ultimately failed in South Sudan and identifies the wider lessons that could be applied to current or future war to peace transitions This book will be of great interest to students of war and conflict studies peacebuilding post conflict reconstruction African security issues and International Relations in general as well as to practitioners

Combatants in African Conflicts Simon David Taylor, 2022-05-10 This book focuses on the different types of combatants in conflicts in Africa exploring the fine lines between what might be classified as a militia in one conflict a rebel in another or a terrorist in a third Drawing on the work of Carl von Clausewitz this book provides a conceptually stable and analytically sound new typology on combatants Analysing the relationships between state and society and drawing on Clausewitz's Trinity of passion chance and reason the book presents a set of five types of armed actors Professionals Praetorians Militias Insurgents and Mercenaries Each type is developed through a close reading of foundational theoretical texts reviews of contemporary studies and a historical analysis of their unique characteristics Unlike a reductionist binary perspective this typology accounts for the dynamic complex and evolving relationships of these actors with the state and society A typology of combatants in conflicts in Africa can provide avenues for more in depth analysis of such conflicts and holds implications for Security Sector Reform projects and other peace building programmes As such this book will be an essential reference for scholars and students of African Politics and Military and Security Studies

Militias, States and Violence against Civilians Paul Lorenzo Johnson, William Wittels, 2023-04-21 This book examines the conditions under which the presence and use of militias result in an increase or a decrease in violence against civilians in intra state conflicts Showcasing the breadth and diversity of modern militias in the context of violence against civilians the volume addresses the predation and repression that many such groups are infamous for as well as increasingly important efforts by other militias at civilian protection in war torn settings The chapters examine militias from around the world drawing on both qualitative and quantitative methods as they cover groups as varied as gangs death squads grassroots community defense groups official state militias and party sponsored armies groups on the civic vice side the civic virtue side and the wide and mixed in between space where most

cases fall Taken as a cohesive unit the work lays the foundation for an encompassing theory and interrogation of the causal chain between militia type and operating context and the levels of violence against civilians It provides path breaking theory building and empirical scholarship Policymakers and national security practitioners dealing with issues relating to armed groups will also benefit from the practical issues covered here such as how different forms of sponsorship and training affect militia behavior This book will be of interest to students of civil wars political violence counterinsurgency civil military relations and security studies in general Punctuated Peace in Nigeria's Oil Region Obasesam Okoi,2021-09-27 This book examines the extent to which peacebuilding processes such as disarmament demobilization and reintegration are possible in the attempt to demilitarize Nigeria s oil region and establish a stable post conflict environment for nurturing durable peace The book argues that the failure of the peacebuilders to address the structural tensions at the heart of insurgency along with competition for access to the material benefits of peacebuilding have revived violence at repeated intervals that punctuates the progression of peace The author s analysis shows how the interventions pursued by peacebuilders have been successful in stabilizing the oil region by taking arms from insurgents paying them monthly allowances and building their capacity to reintegrate into society through a range of transformational processes While these interventions are praiseworthy they have transformed the political realities of peacebuilding into an economic enterprise that makes recourse to violence a lucrative endeavour as identity groups frequently mobilize insurgency targeting oil infrastructure to compel the state to enter into negotiations with them There was little consideration for the impact corruption might have on the peacebuilding process As corruption becomes entrenched it fosters exclusion and anger leading to further conflict The book proposes pathways to positive peacebuilding in Nigeria s oil region *Who Fights for Governments?* Huseyn Aliyev,2025-06-26 Exploring why when and under which circumstances individuals decide to take up arms mobilizing for pro government militias Huseyn Aliyev draws on insights from long standing ethnographic fieldwork among former and active members of Ukraine s pro government volunteer battalions and an original database of militias obituaries to offer this complex and in depth explanation of the phenomenon of pro government mobilization Revealing the patterns and dynamics of individual mobilization into pro government militias this study is critical to understanding how the Ukrainian nation succeeded in repelling Russian aggression both in 2014 15 and in 2022 but also essential to explaining how and why hundreds of pro government militias emerge in the context of armed conflicts in different parts of the world **Ex-Combatants and the Post-Conflict State** J. McMullin,2013-08-22 This book provides a critical analysis of the reintegration challenges facing ex combatants Based on extensive field research it includes detailed case studies of ex combatant reintegration in Namibia Mozambique Sierra Leone and Liberia *Armed Forces in Deeply Divided Societies: Lebanon, Bosnia-Herzegovina, Iraq and Burundi* Eduardo Wassim Aboultaif,2023-10-20 Eduardo Wassim Aboultaif critically analyzes civil military relations and the way armies are constructed in divided societies To achieve that the book looks at four case studies with deep divisions and whose armed forces have been

reconstructed after civil wars Lebanon and Bosnia Herzegovina represent two examples of consociational power sharing arrangements with functioning armed forces that enjoy wide popular support and neutral in internal affairs Iraq and Burundi however have semi consociational provisions that have politicized the army and made it a partisan military that has either led to disintegration as in the case of Iraq or politicization and loss of legitimacy as in Burundi

Demobilizing Irregular Forces Eric Y. Shibuya, 2013-04-18 From Afghanistan and Sierra Leone to East Timor the aftermath of any armed conflict presents a complex set of challenges Whatever political agreements may have been reached conflicts are often at risk of reigniting and the fates of their former participants remain uncertain Armed groups may not be easily dissuaded from pursuing belligerent activities which they see as both profitable and understandable behaviour In the face of these difficulties the process of disarmament demobilization and reintegration DDR attempts to convince combatants to relinquish their weapons and return to civilian life It is a crucial first step towards lasting peace *Demobilizing Militias* is the first comprehensive introduction to DDR in the contemporary world Examining regions as varied as Africa Asia and Central America it guides readers through the different stages of the DDR process as well as assessing competing perspectives surrounding its implementation Attentive to the problems faced by practitioners Eric Shibuya argues against a one size fits all approach emphasizing the importance of social and psychological contexts in fostering the trust that is necessary for DDR to succeed Accessible and incisive it will be an ideal resource for students of politics security and conflict studies as well as anyone interested in the dynamics of peacebuilding today

Peace or Democracy? Izabela Pereira Watts, 2023-04-03 Contrary to the common belief that peace and democracy go hand in hand after a civil war Pereira Watts argues they are in fact at a crossroads Offering an innovative framework based on Philosophical Actors and Tactical considerations Pereira Watts identifies 14 dynamic dilemmas in democratic peacebuilding with respective trade offs She focuses on explaining the contradictions in modern post conflict recovery the challenges facing interim governments and the international community's role Based on an analysis of more than 40 countries between 1989 and 2022 and more than 60 UN peace operations she presents critical issues that commonly need to be addressed in such scenarios Elections and Political Parties the Constitution Checks Balances and Power sharing Transitional Justice Human Rights Amnesty Truth Commissions and War Crimes Tribunals Disarmament Demobilization and Reintegration and Media Reform and Civil Society Solving any of these dilemmas leads to others that shape a complex apparatus for restoring peace and installing a new political regime An essential resource for decision makers policymakers international analysts and practitioners in the field of peacebuilding that will also be of great value to students of International Relations and Peace Studies as well as anyone interested in peacekeeping democracy building and state building

Globalizing Somalia Emma Leonard, Gilbert Ramsay, 2013-11-07 This collection of essays demonstrates how chronic state failure and the inability of the international community to provide a solution to the conflict in Somalia has had transnational repercussions Following the failed humanitarian mission in 1992-93 most countries refrained from any direct

involvement in Somalia but this changed in the 2000s with the growth of piracy and links to international terrorist organizations. The deterritorialization of the conflict quickly became apparent as it became transnational in nature. In part because of it lacked a government and was unable to work with the international community, Somalia came to be seen as a testing ground by many international actors. Globalizing Somalia demonstrates how China, Japan and the EU among others have all used the conflict in Somalia to project power, test the bounds of the national constitution and test their own military capabilities. Contributed by international scholars and experts, the work examines the impact of globalization on the internal and external dynamics of the conflict, arguing that it is no longer geographically contained. By bringing together the many actors and issues involved, the book fills a gap in the literature as one of the most complete works on the conflict in Somalia to date. It will be an essential text to any student interested in Somalia and the horn of Africa as well as in terrorism and conflict processes.

Elections, Violence and Transitional Justice in Africa Elias Opongo, Tim Murithi, 2022-05-29 Elections in Africa are competitive in nature and can be manipulated by incumbents to extend and entrench their rule through changes to constitutions, intimidation of opponents, excess use of police force and in some cases assassinations of dissident voices. Ethnic cleavages are also exploited by contestants to incite and mobilize unsuspecting masses to pursue their electoral ambitions which can lead to political instability. In many African countries, violence before, during and after elections has become a regrettable norm rather than the exception. The function of transitional justice is to address the legacy of human rights atrocities, political violence and societal harm resulting from prior misrule or violent conflicts with a view to establishing fair, democratic and inclusive societies. This book interrogates the potential intersection between transitional justice and electoral processes. Specifically, it examines the hypothesis that transitional justice interventions that strive to address historical injustices perpetrated by violence, conflict and entrenched by socio-political impunity can initiate preventive measures against electoral violence through redress, accountability and institutional reforms. The contributors to this volume have engaged with country case studies from across Africa while examining the intersection between transitional justice and electoral processes. Hence, this is a timely volume that highlights the uninterrogated nexus between elections, violence and transitional justice in Africa.

Female Ex-Combatants, Empowerment, and Reintegration Michanne Steenberg, 2022-02-24 Female Ex-Combatants Empowerment and Reintegration investigates the role of United Nations led Disarmament, Demobilization and Reintegration (DDR) programs in undermining female ex-combatants' empowerment. The participation of female combatants in conflict has increasingly been recognized in feminist literatures and in policies and programs concerned with reintegrating ex-combatants and building peace. This has illustrated that female ex-combatants often experience empowerment through their role as combatant; however, this empowerment is often lost upon reintegration. UN-led DDR plays an important role in the broader peacebuilding process as it is one of the largest interventions and directly aims to reintegrate ex-combatants into civilian life. This book draws on extensive field research and interviews with female ex-

combatants and DDR officials in Liberia and Nepal to develop a nuanced and comprehensive picture of female ex combatants empowerment and how this is undermined by DDR Through reconceptualized frameworks of empowerment and an emancipatory peace the book explores the pivotal role that DDR programs play in undermining female ex combatants empowerment The author argues that this is detrimental to peacebuilding because DDR officials and documentation narrate female ex combatants in limited and gendered ways which reproduces gendered inequalities and define how female ex combatants should behave This book will be of great interest to scholars and practitioners working on gender conflict peace security and development

Transitional Justice and Peacebuilding on the Ground Chandra Lekha Sriram, 2013 This book seeks to refine our understanding of transitional justice and peacebuilding and long term security and reintegration challenges after violent conflicts As recent events following political change during the so called Arab Spring demonstrate demands for accountability often follow or attend conflict and political transition While traditionally much literature and many practitioners highlighted tensions between peacebuilding and justice recent research and practice demonstrates a turn away from the supposed peace vs justice dilemma This volume examines the complex relationship between peacebuilding and transitional justice through the lenses of the increased emphasis on victim centred approaches to justice and the widespread practices of disarmament demobilization and reintegration DDR of excombatants While recent volumes have sought to address either DDR or victim centred approaches to justice none has sought to make connections between the two much less to place them in the larger context of the increasing linkages between transitional justice and peacebuilding This book will be of great interest to students of transitional justice peacebuilding human rights war and conflict studies security studies and IR

Paramilitarism Uğur Ümit Üngör, 2020-07-03 From the deserts of Sudan to the jungles of Colombia and from the streets of Belfast to the mountains of Kurdistan paramilitaries have appeared in violent conflicts in very different settings Paramilitaries are generally depicted as irregular armed organizations that carry out acts of violence against civilians on behalf of a state In doing so they undermine the state s monopoly of legitimate violence while at the same time creating a breeding ground for criminal activities Why do governments with functioning police forces and armies use paramilitary groups This study tackles this question through the prism of the interpenetration of paramilitaries and the state The author interprets paramilitarism as the ability of the state to successfully outsource mass political violence against civilians that transforms and traumatizes societies It analyses how paramilitarism can be understood in global context and how paramilitarism is connected to transformations of warfare and state society relations By comparing a broad range of cases it looks at how paramilitarism has made a profound impact in a large number of countries that were different but nevertheless shared a history of pro government militia activity A thorough understanding of paramilitarism can clarify the direction and intensity of violence in wartime and peacetime The volume examines the issues of international involvement institutional support organized crime party politics and personal ties

peacebuilding and state-making Marta Iñiguez de Heredia, 2017-04-27 This electronic version has been made available under a Creative Commons BY NC ND open access license *Everyday resistance peacebuilding and state making* addresses debates on the liberal peace and the policies of peacebuilding through a theoretical and empirical study of resistance in peacebuilding contexts Examining the case of Africa's World War in the DRC it locates resistance in the experiences of war peacebuilding and state making by exploring discourses violence and everyday forms of survival as quotidian acts that attempt to challenge or mitigate such experiences The analysis of resistance offers a possibility to bring the historical and sociological aspects of both peacebuilding and the case of the DRC providing new nuanced understanding on these processes and the particular case The book also makes a significant contribution to the theorisation of resistance in International Relations *Youth and sustainable peacebuilding* Helen Berents, Catherine Bolten, Siobhan McEvoy-Levy, 2024-07-02

Sustainable peace involves more than simply including youth in official peacebuilding mechanisms or recognizing their local peacebuilding work it requires a transformation in thinking about the youth as actors in the world of security and peace Using case studies from around the globe the contributors to this volume analyse why states are afraid of their young people why youth participation in formal peace processes matters but is insufficient and ways that young people are working outside of official systems to create and nurture peace on their own terms The volume offers guidance for ways to bridge the disconnect that exists between institutional assumptions and expectations for youth as peacebuilders and the actual sustainable peace leadership of youth Throughout it emphasises a critical approach to peacebuilding with for and by youth
