Practical Philosophy of Sport and Physical Activity Robert Scott Kretchmar, 2005

Philosophy is a crucial yet often overlooked part of kinesiology students' education. *Practical Philosophy of Sport and Physical Activity*, Second Edition, provides students with a thorough, clear, and practical introduction to the philosophy of physical activity and sport and, in doing so, prepares them for the ethical questions they will face as professionals. This second edition has been significantly revised and enhanced to include the following features:

- Expanded instruction on practical ethics in physical activity, guiding students in how to rank values and turn those values into actions.
- New material that emphasizes physical activity as well as sport and provides specific holistic techniques for the practitioner in the workplace.
- In-depth case studies along with discussion questions that can be used to teach students how to follow a philosophical argument and come to their own conclusions. The case studies—one on running up the score and the other on performance-enhancing substances—are based on two articles that are reprinted in their entirety in the appendix.

Practical Philosophy of Sport and Physical Activity, Second Edition, helps students examine key moral questions in sport. Its approach to the content helps students follow and dissect ethical arguments, think through philosophic issues, and apply theory to practice. Each chapter includes objectives, philosophical exercises, reviews, and study questions to reinforce understanding. Kretchmar's engaging writing style accentuates important topics of discussion, focusing the reader's attention on the philosophy behind the practice or strategy. As a result, students develop their philosophical skills, refine their personal philosophy concerning physical activity and sport, and learn that philosophy can be clear, practical, and holistic rather than obscure, overly theoretical, and dualistic.

The text is arranged in four parts. Part I introduces students to the nature and methods of philosophy. Part II focuses on issues relating to the nature of the athlete or client and includes analyses of dualism, scientific materialism, and holism. Part III delves into kinesiology issues, including the nature of play, games, and competition. And Part IV provides expanded material on ethics, value choices, and active lifestyles. This text provides students with the practical tools and specific techniques they need to think ethically and systematically as they become skilled practitioners in

the field of physical activity and sport In doing so it demystifies philosophy and reveals it as the guiding element in our understanding of and approach to activity games and competitions Unmistakable Impact Jim Knight,2011 This book describes in simple terms exactly how schools should align and organize professional learning to ensure significant positive change in teaching and student learning The author s partnership principles a humanizing approach to professional learning apply to workshops intensive learning teams a focused form of professional learning communities and instructional coaching This is the first in a two volume series that is designed to provide a simple not simplistic framework and a set of tools for improving teaching in schools The second volume The Big Four was proposed last year Pause Rachael O'Meara,2017-04-04 Feeling overwhelmed burned out or stuck Discover the power of the pause Sometimes life throws you for a loop You re stressed out at your job you re torn between work and family your motivation and productivity are taking a nosedive Your impulse might be to lean in and tough it out but what you may really need to do is take a step back Reassess your life with a clear head and dive back in with purpose and poise In this enlightening book Rachael O Meara guides you through the steps of your own pause journey The signs that you re in need of a meaningful break Planning your optimal pause whether it s as short as a day or as long as an epic journey Reentering the world with renewed clarity and purpose Incorporating the latest findings from psychology and neuroscience and peppered with inspiring stories of successful pauses this book will show you that the fastest way to happiness is to slow down Whether you pause by taking a five minute walk outside spending a day unplugged from digital devices or taking a few weeks off to yourself Pause will give you the tools to find what lights you up and the ability to lead the most satisfying and fulfilling life you choose As seen in The Washington Post *Declensions of the Self* Jean-Jacques Defert,Trevor Tchir,Dan Webb,2009-10-02 This work is a collective reflection on the modern self as a narrative Modernity as a metamorphic conglomeration of permeating discourses new practices and institutional forms a historical unfolding of centrifugal and centripetal discursive dynamics of regulation and normalization offers limitless grounds for a critical investigation The modern self both as the revelation of the inner self and as a reflection of the collective arises from the dialogical interplay within the intersubjective communicative space of social discourse The bestiary proposed in this series of articles attempts to rethink the spectacle consisting of modern dichotomies by which the self is declined along ontological metaphysical and ethical premises the real and the ideal the said and the unsaid the rational and the irrational the bound and the free the familiar and the exotic the universal and the particular self and world The reader is therefore encouraged to engage in a multiple reading of the articles presented in this collection As individual scholarly pieces of inquiry these articles provide thoughtful insights into the inexhaustible topic of modernity and the modern subject they tell stories of the past the present and of a prospective future As academic works however they also reflect and or unsettle disciplinary paradigms and scholarly practices from which they acquire legitimacy and visibility they conform apply reconfigure and or experiment with new grounds by borrowing from an eclectic mix of various thinkers their tools and
