Mind On Statistics 5th Edition:

Mind on Statistics Jessica M. Utts, Robert F. Heckard, 2011-01-07 MIND ON STATISTICS emphasizes the conceptual development of statistical ideas and the importance of looking for and finding meaning in data. Authors Jessica Utts and Robert Heckard actively engage students' natural curiosity, motivating them with intriguing questions and explaining statistical topics in the context of a wide range of interesting, useful examples and case studies. Throughout, the authors balance the promotion of statistical literacy with coverage of the statistical methodology taught in general introductory statistics courses. Their approach is based on the premises that new material is much easier to learn and remember if it is related to something interesting or previously known and if students actively ask questions and find the answers for themselves. More than any other text available, MIND ON STATISTICS motivates and encourages students to develop their statistical intuition by focusing on analyzing data and interpreting results rather than on mathematical formulation. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Mind on Statistics Jessica Utts, Robert Heckard, 2006-01-03 MIND ON STATISTICS emphasizes the conceptual development of statistical ideas and seeks to find meaning in data. Authors Jessica Utts and Robert Heckard satisfy students' natural curiosity by actively engaging them with inspiring questions and explaining statistical topics in the context of excellent examples and case studies. MIND ON STATISTICS balances the spirit of statistical literacy with the statistical methodology taught in general introductory statistics courses. The authors built the book on two learning premises: 1. New material is much easier to learn and remember if it is related to something interesting or previously known. 2. New material is easier to learn if students actively ask questions and find the answers for themselves. More than any other text available, MIND ON STATISTICS motivates students to develop their statistical intuition by focusing on analyzing data and interpreting results rather than on mathematical formulation. A wide range of interesting and real examples provides further motivation for students to learn about statistics. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Mind on Statistics Helen MacGillivray, Jessica M. Utts, R. F. Heckard, 2014 This text is adapted from Jessica Utts and Robert Heckard's best-selling general introductory statistics text *Mind on Statistics*. It emphasises the conceptual development of statistical ideas and seeks to find meaning in data. This local adaptation retains the conversational approach of the original text with real examples and case studies of appeal and interest to Australian and New Zealand students. The revised structure and relevant examples motivate students and guide them through the statistical process of tackling problems: planning and data collection, analysing and interpreting information, and finding solutions.
