on core aspects of behavioral and cognitive traits that make humans such unusual animals All contributors adopt an explicitly comparative approach which is based on the premise that comparative studies of our closest biological relatives the nonhuman primates provide the logical foundation for identifying human universals as well as evidence for evolutionary continuity in our social behavior Each of the chapters in this volume provides comparative analyses of relevant data from primates and humans or pairs of chapters examine the same topic from a human or primatological perspective respectively Together they cover six broad topics that are relevant to identifying potential human behavioral universals Family and social organization Predation pressure is thought to be the main force favoring group living in primates but there is great diversity in the size and structure of social groups across the primate order Research on the behavioral ecology of primates and other animals has revealed that the distribution of males and females in space and time can be explained by sex specific adaptations that are sensitive to factors that limit their fitness access to resources for females and access to potential mates for males

*The Primate Origins of Human Nature* Carel P. Van Schaik, 2016-01-22 The Primate Origins of Human Nature Volume 3 in The Foundations of Human Biology series blends several elements from evolutionary biology as applied to primate behavioral ecology and primate psychology classical physical anthropology and evolutionary psychology of humans However unlike similar books it strives to define the human species relative to our living and extinct relatives and thus highlights uniquely derived human features The book features a truly multi disciplinary multi theory and comparative species approach to subjects not usually presented in textbooks focused on humans such as the evolution of culture life history parenting and social organization **Essential Building Blocks of Human Nature** Ulrich J. Frey, Charlotte Störmer, Kai P.

Willführ, 2010-11-08 To understand why we humans are as we are it is necessary to look at the essential building blocks that comprise our nature The foundations of this structure are our evolutionary origins as primates and our social roots Upon these rest features such as our emotions language and aesthetic preferences with our self perceptions self deceptions and thirst for knowledge right at the top The unifying force holding these blocks together is evolutionary theory Evolution provides a deeper understanding of human nature and in particular of the common roots of these different perspectives To build a reliable and coherent model of man leading authors from fields as diverse as primatology anthropology neurobiology and philosophy have joined forces to present essays each describing their own expert perspective Together they provide a convincing and complete picture of our own human nature Sustainability Science and Technology Alejandro De Las Heras, 2014-04-01 Sustainability Science and Technology An Introduction explains the root causes of global failures in natural and human systems as well as the most readily available technological solutions The book dispels risky scientific and technological ideas that further complicate the current environmental and socioeconomic predicaments It also bridges gaps among scientific and technological fields and systematically translates current findings for a wide technical and public audience Written at a level accessible to all the story is told one bite sized chapter at a time about the size of a scientific

journal article The chapters are self contained each grappling with a large topic This provides more in depth coverage of a topic than a standard encyclopedia article and promotes the widest possible dialog around sustainability issues and their solutions Case studies from all continents and all technological development levels expound viable solutions for each of the planetary systems water soils and atmosphere In turn the wider socioeconomic context of sustainable science and technology is examined One of the first books to address the full scope of sustainability it sets the stage for discussion and sustainability re training across professional divides The editor and contributors take a balanced approach that is neither too technical nor too focused on any particular field They highlight global and regional perspectives and the linkages between different planetary and human systems The book helps you understand the thorny essence of sustainability issues often fraught with ethical dilemmas obsolete technologies and lifestyle implications and how to develop solutions to them Human Behavioral Ecology Jeremy Koster,Brooke Scelza,Mary K. Shenk,2024-03-14 A comprehensive introduction to the latest theory and empirical research in the field of human behavioral ecology **Echoes of Our Origins** Shirley C. Strum,2025-09-09 This book follows Dr Shirley Strum s 50 year journey with baboons in Kenya challenging assumptions about primate behavior and offering insights into human nature science and conservation Provided by publisher The Routledge Handbook of Anthropology and Reproduction Sallie Han,Cecília Tomori,2021-11-09 The Routledge Handbook of Anthropology and Reproduction is a comprehensive overview of the topics approaches and trajectories in the anthropological study of human reproduction The book brings together work from across the discipline of anthropology with contributions by established and emerging scholars in archaeological biological linguistic and sociocultural anthropology Across these areas of research consideration is given to the contexts conditions and contingencies that mark and shape the experiences of reproduction as always gendered classed and racialized Over 39 chapters a diverse range of international scholars cover topics including Reproductive governance stratification justice and freedom Fertility and infertility Technologies and imaginations Queering reproduction Pregnancy childbirth and reproductive loss Postpartum and infant care Care kinship and alloparenting This is a valuable reference for scholars and upper level students in anthropology and related disciplines associated with reproduction including sociology gender studies science and technology studies human development and family studies global health public health medicine medical humanities and midwifery and nursing **The Oxford Handbook of Thinking and Reasoning** Keith J. Holyoak,Robert G. Morrison,2013-05-23 The Oxford Handbook of Thinking and Reasoning brings together the contributions of many of the leading researchers in thinking and reasoning to create the most comprehensive overview of research on thinking and reasoning that has ever been available The Evolution of Primate Societies John C. Mitani,Josep Call,Peter M. Kappeler,Ryne A. Palombit,Joan B. Silk,2012-10-24 In 1987 the University of Chicago Press published Primate Societies the standard reference in the field of primate behavior for an entire generation of students and scientists But in the twenty five years since its publication new theories and research techniques for studying the Primate

order have been developed debated and tested forcing scientists to revise their understanding of our closest living relatives

Intended as a sequel to *Primate Societies* *The Evolution of Primate Societies* compiles thirty one chapters that review the current state of knowledge regarding the behavior of nonhuman primates Chapters are written by the leading authorities in the field and organized around four major adaptive problems primates face as they strive to grow maintain themselves and reproduce in the wild The inclusion of chapters on the behavior of humans at the end of each major section represents one particularly novel aspect of the book and it will remind readers what we can learn about ourselves through research on nonhuman primates The final section highlights some of the innovative and cutting edge research designed to reveal the similarities and differences between nonhuman and human primate cognition *The Evolution of Primate Societies* will be every bit the landmark publication its predecessor has been

**Lucy to Language** R. I. M. Dunbar, Clive Gamble, J. A. J. Gowlett, 2014-02 This volume readdresses the past contribution from archaeology towards the study of evolutionary issues and ties evolutionary psychology into the extensive historical data from the past allowing us to escape the confined timeframe of the comparatively recent human mind and explore the question of just what it is that makes us so different

*The Evolution of Ethics* B. Fowers, 2015-03-17 In this ground breaking book Aristotelian and evolutionary understandings of human social nature are brought together to provide an integrative psychological account of human ethics The book emphasizes the profound ways that human identity and action are immersed in an ongoing social world

Cognitive Approaches to Old English Poetry Antonina Harbus, 2012 Offers an entirely new way of interpreting and examining Anglo Saxon texts via theories derived from cognitive studies A major thoughtful study applying new and serious interpretative and critical perspectives to a central range of Old English poetry Professor John Hines Cardiff University Cognitive approaches to literature offer new and exciting ways of interpreting literature and mentalities by bringing ideas and methodologies from Cognitive Science into the analysis of literature and culture While these approaches are of particular value in relation to understanding the texts of remote societies they have to date made very little impact on Anglo Saxon Studies This book therefore acts as a pioneer mapping out the new field explaining its relevance to Old English Literary Studies and demonstrating in practice its application to a range of key vernacular poetic texts including *Beowulf* *The Wanderer* and poems from the Exeter Book Adapting key ideas from three related fields Cognitive Literary Cultural Studies Cognitive Poetics and Conceptual Metaphor Theory in conjunction with more familiar models derived from Literary Analysis Stylistics and Historical Linguistics allows several new ways of thinking about Old English literature to emerge It permits a systematic means of examining and accounting for the conceptual structures that underpin Anglo Saxon poetics as well as fuller explorations at the level of mental processing of the workings of literary language in context The result is a set of approaches to interpreting Anglo Saxon textuality through detailed studies of the concepts mental schemas and associative logic implied in and triggered by the evocative language and meaning structures of surviving works ANTONINA HARBUS is Professor in
