

LESSONS IN THE FELDENDKRAIS METHOD®

The background of the cover features several white line drawings of human figures in various dynamic and fluid movement poses, characteristic of the Feldenkrais Method. These drawings are scattered across the cover, with some overlapping the title text. The poses include figures lying on their backs with limbs extended, figures in seated or crouching positions with limbs raised, and figures in more complex, flowing movements. The overall style is minimalist and emphasizes the natural range of human motion.

aligns with the Board of Certification's BOC accreditation standards and prepares students for the BOC Athletic Trainers exam. Author and respected clinician Peggy A. Houglum incorporates more than 40 years of experience in the field to offer evidence-based perspectives, updated theories, and real-world applications. The fourth edition of *Therapeutic Exercise for Musculoskeletal Injuries* has been streamlined and restructured for a cleaner presentation of content and easier navigation. Additional updates to this edition include the following:

- An emphasis on evidence-based practice encourages the use of current scientific research in treating specific injuries.
- Full color content with updated art provides students with a clearer understanding of complex anatomical and physiological concepts.
- 40 video clips highlight therapeutic techniques to enhance comprehension of difficult or unique concepts.
- Clinical tips illustrate key points in each chapter to reinforce knowledge retention and allow for quick reference.

The unparalleled information throughout *Therapeutic Exercise for Musculoskeletal Injuries* Fourth Edition has been thoroughly updated to reflect contemporary science and the latest research. Part I includes basic concepts to help readers identify and understand common health questions in examination, assessment, mechanics, rehabilitation, and healing. Part II explores exercise parameters and techniques including range of motion and flexibility, proprioception, muscle strength, and endurance, plyometrics, and development. Part III outlines general therapeutic exercise applications such as posture, ambulation, manual therapy, therapeutic exercise equipment, and body considerations. Part IV synthesizes the information from the previous segments and describes how to create a rehabilitation program, highlighting special considerations and applications for specific body regions. Featuring more than 830 color photos and more than 330 illustrations, the text clarifies complicated concepts for future and practicing rehabilitation clinicians. Case studies throughout part IV emphasize practical applications and scenarios to give context to challenging concepts. Most chapters also contain Evidence in Rehabilitation sidebars that focus on current peer-reviewed research in the field and include applied uses for evidence-based practice. Additional learning aids have been updated to help readers absorb and apply new content; these include chapter objectives, lab activities, key points, key terms, critical thinking questions, and references. Instructor ancillaries, including a presentation package, plus image bank, instructor guide, and test package, will be accessible online.

Therapeutic Exercise for Musculoskeletal Injuries Fourth Edition equips readers with comprehensive material to prepare for and support real-world applications and clinical practice. Readers will know what to expect when treating clients, how to apply evidence-based knowledge, and how to develop custom individual programs.

[Slowing Down to Run Faster](#) Edward Yu, 2020-06-30

A trainer and former triathlete shows you how to achieve the results you want with a new multidisciplinary approach. Why does trying harder sometimes become an exercise in futility? Why does following expert advice often lead to little or no improvement? What if there were an efficient way of learning that could be applied to every area of human experience? Drawing from the principles of Bagua Taichi and Feldenkrais, Edward Yu presents an innovative approach to running. Power, speed, and agility are more related to your ability to sense your own body than to willpower or raw talent. Centering the art of

running as an explorative creative and somatic based practice Yu shows us how to run faster by learning to become more sensible that is more sense able through the playful and systematic exploration of movement

Dynamic Bodyuse for Effective, Strain-Free Massage Darien Pritchard, 2007-10-02 The most significant cause of early retirement from the massage profession is the cumulative strain on the body developed in the course of performing the work The explosive growth of this occupation in recent years has been accompanied by an increase in the number of work induced problems Practitioners can easily strain their hands particularly their thumbs fingers and wrists as well as their shoulders and backs Written by noted teacher and trainer Darien Pritchard this useful book explains those aspects of massage that can lead to these problems and shows how to apply pressure in ways that avoid them The focus is on how to use the body safely and effectively The author explores the benefits of involving the whole body to generate the power and movement that support the hands saving the hands by using them skillfully and conserving them by using other body areas such as the forearms and elbow whenever possible Featuring 2 000 illustrations Dynamic Bodyuse for Effective Strain Free Massage is essential reading for anyone involved in massage whether a student a professional massage practitioner or teacher sports massage therapist or aromatherapist
