Minds on Fire Mark C. Carnes, 2014-09-15 A Choice Outstanding Academic Title of the Year In *Minds on Fire* Mark C. Fryer, Colette Conroy, 2021-02-22 Jacques Rancière has been hugely influential in the field of political philosophy and aesthetics. This edited collection is the first to investigate the points of contact between the work of Rancière and the field of theatre and performance studies. Recent scholarly works in this discipline have drawn upon concepts from Rancière's writing from teatrocracy to emancipated spectators to investigate problems of audience participation, politics and aesthetics. Before these concepts and critical tools peel away from the works through which they emerged, this book seeks a detailed critical assessment of the works themselves and their implications for theatre and performance studies. The collection examines the critical and analytical interventions that have been made to date and looks forward towards challenges to the future uses of Rancière's work in performance and theatre studies. It also considers a wide range of performance work from a performance for the residents of a Victorian workhouse to the activist performances of Liberate Tate. This collection includes work by ten scholars and is an essential resource for researchers and academics working in areas of performance and aesthetics.

Simulation and Game-Based Learning in Emergency and Disaster Management Drumhiller, Nicole K., Wilkin, Terri L., Srba, Karen V., 2021-04-02 Simulation and game-based learning are essential applications in a learning environment as they provide learners an opportunity to apply the course material in real-life scenarios. Introducing real-life learning allows the learner to make critical decisions at different points within the simulation, providing constructive education that leads to a cognitive understanding of the material. The use of simulations provides the learner with the ability to cognitively store and recall learning in real-life experiences. Therefore, it is crucial to not only provide course material but to have students apply what they have learned in simulations that replicate real-life scenarios. These learned skills are essential for students to be marketable and thrive in a career field where decision-making, problem-solving and critical thinking are job requirements.
