Evaluation of Ocean-Energy Conversion Based on Linear Generator Concepts Michael A. Stelzer, 2012-07-03 EVALUATION OF OCEAN ENERGY CONVERSION BASED ON LINEAR GENERATOR CONCEPTS As the world continues to demand greater productivity and lifestyle enrichment through technological advancements the demand for electrical power is predicted to escalate dramatically Thus far this increased demand has been primarily supplied from fossil fueled plants Unfortunately the burning of fossil fuels produce harmful carbon dioxide pollution as a by product It has been hypothesized that unless a clean renewable and efficient alternate source of energy is found soon the world may either exhaust its supplies of energy producing materials or drastically degrade its environment However motions that occur naturally such as ocean waves can play a significant role in generating environmentally safe and economically viable energy for human utilization The focus of this work predicts the electrical power generation capabilities from a seabed mounted linear generator tethered to a floating buoy heaving under the influence of passing ocean surface waves Mathematical models are introduced which simulate the oceans surface conditions under both the regular basic and irregular natural wave regimes the heave vertical displacement response for a floating buoy and the resulting electrical output parameters of the linear generator Within these models various physical and electrical parameters are altered in an attempt to generate a greater output power for a given sea state condition making the Wave Energy Converter WEC more efficient It is shown theoretically that the buoy can be designed to have a greater heave response than that of the height of a passing wave resulting in an increase in generated power from the linear generator Author Information Dr Michael A Stelzer is a Certified Project Manager and Senior Electronic Technician with a Ph D in Electrical and Computer Engineering During his career to date Mr Stelzer has published four additional educational titles and has been admitted into Cambridge Who's Who top 101 industry experts

Online Maps with APIs and WebServices Michael P. Peterson, 2012-03-30. The Internet has become the major form of map delivery. The current presentation of maps is based on the use of online services. This session examines developments related to online methods of map delivery, particularly Application Programmer Interfaces (APIs) and MapServices in general, including Google Maps API and similar services. Map mashups have had a major impact on how spatial information is presented. The advantage of using a major online mapping site is that the maps represent a common and recognizable representation of the world. Overlaying features on top of these maps provides a frame of reference for the map user. A particular advantage for thematic mapping is the ability to spatially reference thematic data.

Overcoming Fieldwork Challenges in Social Science and Higher Education Research El Shaban, Abir, 2020-12-18. Conducting social science and education research studies that require involvement in fieldwork is not an easy task. Many graduate students and novice researchers face difficulties efficiently and effectively conducting the practical aspects of their research in fieldwork. One reason for this difficulty may be due to the lack of finding and/or accessing authentic and realistic descriptions of previously conducted fieldwork experiences and processes in a variety of fields. This could be the case whether the research is going to be on a virtual platform or in a real and actual context. Thus, it is critical to shed light on the successes and pitfalls of the personal experiences of fieldwork.

Higher Education Research is an essential reference book that draws on the experience of conducting fieldwork in different contexts and world regions that are relevant to social science and education studies. The diverse experiences in research processes and contexts that this book offers provide readers with an authentic and realistic description of how research data is collected, the tools needed to envision some of the challenges that they might face, and how to effectively solve them. Highlighting topics such as methodology, data collection, and fieldwork partnerships in fields that include counseling, psychology, language studies, and teacher education, this book is ideal for social science and education studies professors who have research as a mandatory part of their curriculum, administrators and policymakers, independent and novice researchers, and graduate students planning to conduct their research studies with humans in different contexts. *Cara MENGUBAH pdf ke WORD, JPG, EXCEL dan PPT* MiftaChun Nur, 2019-08-03 *Creating Online Media* Carole Rich, 1999. IoT and AI in Agriculture Tofael Ahamed, 2023-04-10. This book reviews recent innovations in the smart agriculture space that use the Internet of Things (IoT) and sensing to deliver Artificial Intelligence (AI) solutions to agricultural productivity in the agricultural production hubs. In this regard, South and Southeast Asia are one of the major agricultural hubs of the world facing challenges of climate change and feeding the fast-growing population. To address such challenges, a transboundary approach along with AI and BIG data for bioinformatics are required to increase yield and minimize pre and post harvest losses in intangible climates to drive the sustainable development goal (SDG) for feeding a major part of the 9 billion population by 2050. Society 5.0, SDG 1, 2. Therefore, this book focuses on the solution through smart IoT and AI-based agriculture, including pest infestation and minimizing agricultural inputs for in-house and fields production, such as light, water, fertilizer, and pesticides, to ensure food security aligns with environmental sustainability. It provides a sound understanding for creating new knowledge in line with comprehensive research and education orientation on how the deployment of tiny sensors, AI, Machine Learning (ML), controlled UAVs, and IoT setups for sensing, tracking, collection, processing, and storing information over cloud platforms for nurturing and driving the pace of smart agriculture in this current time. The book will appeal to several audiences, and the contents are designed for researchers, graduates, and undergraduate students working in any area of machine learning, deep learning in agricultural engineering, smart agriculture, and environmental science disciplines. Utmost care has been taken to present a varied range of resource areas along with immense insights into the impact and scope of IoT, AI, and ML in the growth of intelligent digital farming and smart
