Online Secret Life Stories Understanding Intellectual:

The Secret Life of Stories Michael Bérubé, 2016-06-17 How an understanding of intellectual disability transforms the pleasures of reading Narrative informs everything we think do plan remember and imagine We tell stories and we listen to stories gauging their well formedness within a couple of years of learning to walk and talk Some argue that the capacity to understand narrative is innate to our species others claim that while that might be so the invention of writing then re wired our brains In *The Secret Life of Stories* Michael Bérubé tells a dramatically different tale in a compelling account of how an understanding of intellectual disability can transform our understanding of narrative Instead of focusing on characters with disabilities he shows how ideas about intellectual disability inform an astonishingly wide array of narrative strategies providing a new and startling way of thinking through questions of time self reflexivity and motive in the experience of reading Interweaving his own stories with readings of such texts as Faulkner's *The Sound and the Fury* Haddon's *The Curious Incident of the Dog in the Night Time* Kingston's *The Woman Warrior* and Philip K Dick's *Martian Time Slip* Bérubé puts his theory into practice stretching the purview of the study of literature and the role of disability studies within it Armed only with the tools of close reading Bérubé demonstrates the immensely generative possibilities in the ways disability is deployed within fiction finding in them powerful meditations on what it means to be a social being a sentient creature with an awareness of mortality and causality and sentience itself Persuasive and witty Michael Bérubé engages Harry Potter fans and scholars of literature alike For all readers *The Secret Life of Stories* will fundamentally change the way we think about the way we read

Fables and Futures George Estreich, 2025-05-27 How new biomedical technologies from prenatal testing to gene editing techniques require us to imagine who counts as human and what it means to belong From next generation prenatal tests to virtual children to the genome editing tool CRISPR Cas9 new biotechnologies grant us unprecedented power to predict and shape future people That power implies a question about belonging which people which variations will we welcome How will we square new biotech advances with the real but fragile gains for people with disabilities especially when their voices are all but absent from the conversation This book explores that conversation the troubled territory where biotechnology and disability meet In it George Estreich an award winning poet and memoirist and the father of a young woman with Down syndrome delves into popular representations of cutting edge biotech websites advertising next generation prenatal tests feature articles on three parent IVF a scientist's memoir of constructing a semisynthetic cell and more As Estreich shows each new application of biotechnology is accompanied by a persuasive story one that minimizes downsides and promises enormous benefits In this story people with disabilities are both invisible and essential a key promise of new technologies is that disability will be repaired or prevented In chapters that blend personal narrative and scholarship Estreich restores disability to our narratives of technology He also considers broader themes the place of people with disabilities in a world built for the able the echoes of eugenic history in the genomic present and the equation of

intellect and human value Examining the stories we tell ourselves the fables already creating our futures Estreich argues that given biotech that can select and shape who we are we need to imagine as broadly as possible what it means to belong

Disabilities of the Color Line Dennis Tyler,2022-02-15 Rather than simply engaging in a triumphalist narrative of overcoming where both disability and disablement are shunned alike Disabilities of the Color Line argues that Black authors and activists have consistently avowed disability as a part of Black social life in varied and complex ways Sometimes their affirmation of disability serves to capture how their bodies minds and health have been and are made vulnerable to harm and impairment by the state and society Sometimes their assertion of disability symbolizes a sense of commonality and community that comes not only from a recognition of the shared subjection of Blackness and disability but also from a willingness to imagine and create a world distinct from the dominant social order Through the work of David Walker Henry Box Brown William and Ellen Craft Charles Chesnutt James Weldon Johnson and Mamie Till Mobley this book examines how Black writer activists have engaged in an aesthetics of redress modes of resistance that show how Black communities have rigorously acknowledged disability as a response to forms of racial injury and in the pursuit of racial and disability justice
