Online Dotwav Mike Lancaster:

dotwav Mike A. Lancaster, 2016-09-13 There's something in that sound. Something bad. Something dangerous. Fifteen-year-old Ani Lee is a skilled hacker researching a strange wav file that she's downloaded when it behaves as no file ever should. Joe Dyson is a seventeen-year-old American transplant recruited into a secret teen division of the British intelligence service who's looking into the disappearance of a friend caught up in an underground music scene that might be more than it appears. When Ani and Joe's investigations intertwine, they discover that the wav file and the music are linked: someone's embedding the file into tracks to create a mind-controlled teen army. But who's behind it? And why? And how do you stop a sound? An exhilarating sci-fi techno thriller that blends music, mind control, and conspiracy, perfect for fans of *Little Brother*, *Brain Jack*, and *Proxy*. Sky Pony Press, with our Good Books, Racehorse, and Arcade imprints, is proud to publish a broad range of books for young readers: picture books for small children, chapter books for middle-grade readers, and novels for young adults. Our list includes bestsellers for children who love to play, Minecraft stories told with LEGO bricks, books that teach lessons about tolerance, patience, and the environment, and much more. While not every title we publish becomes a New York Times bestseller or a national bestseller, we are committed to books on subjects that are sometimes overlooked and to authors whose work might not otherwise find a home.

dotmeme Mike A. Lancaster, 2018-02-27 After preventing conservative MP Victor Palgrave from engineering a human mind-controlled teenage army, Joe Dyson and Ani Lee, operatives for a secret youth division of British Intelligence, have probably earned a rest. But there's no time to be lax with bizarre new developments popping up across the UK and the world. While busting a group that's pressing teen runaways into slave labor building tech, Joe discovers a computer component not yet out on the market linked to a very popular but highly secretive gaming company based in California. Meanwhile, skilled hacker Ani works her way into a vigilante hacking ring intent on using viral social media to bring the truth to the world and bring world governments to their knees. Their method: rewriting reality virtually so that the world never knows the difference. As Ani's and Joe's missions draw closer together, they realize that they have been corralled into a real-life video game, one where the levels are constantly being rewritten and the stakes are constantly shifting. What happens when AI evolves to the point where it has a mind of its own? When the computer threatens to turn on its master, Joe, Ani, and the world are about to find out.
