**Mathematics Council of the Alberta Teachers' Association** Egan J Chernoff,Gladys Sterenberg,2014-06-01 The teaching and learning of mathematics in Alberta one of three Canadian provinces sharing a border with Montana has a long and storied history An integral part of the past 50 years 1962 2012 of this history has been delta K Journal of the Mathematics Council of the Alberta Teachers Association This volume which presents ten memorable articles from each of the past five decades that is 50 articles from the past 50 years of the journal provides an opportunity to share this rich history with a wide range of individuals interested in the teaching and learning of mathematics and mathematics education Each decade begins with an introduction providing a historical context and concludes with a commentary from a prominent member of the Alberta mathematics education community As a result this monograph provides a historical account as well as a contemporary view of many of the trends and issues in the teaching and learning of mathematics This volume is meant to serve as a resource for a variety of individuals including teachers of mathematics mathematics teacher educators mathematics education researchers historians and undergraduate and graduate students Most importantly this volume is a celebratory retrospective on the work of the Mathematics Council of the Alberta Teachers Association      A History of School Mathematics George M. A. Stanic,Jeremy Kilpatrick,2003 Written by those who played leading roles in school mathematics

trained historians and mathematics educators this two volume historical record of mathematics education in the United States and Canada serves not only as a partial guide to present actions but as a tool to better understand who we are The first volume organized in a roughly chronological manner takes readers from the mathematics of the nineteenth century through the late twentieth century Themes discussed in the second volume include instructional materials students and teachers assessment and the role of the government in mathematics education Additional chapters bring an international perspective to the history Canadian Books in Print 2002 Marian Butler,2002-02 **A Charter School Principal Story** Barbara J. Smith,2024-03-18 What happens when a Canadian principal guided by the teachings of Fullan and Hargreaves takes on the role of school leader in an inner city charter school in the United States This inside story of a principal in the DC charter school system reveals much about the desire for educators and students to experience more than a life of multiple choice testing that tends to be so commonplace in these schools While such a case adds to the mound of research that supports the change takes time findings it nevertheless demonstrates the reality on a day to day basis of what s worth fighting for in schools Student and teacher engagement and empowerment matter and to get to such ends a school must fiercely focus on targets well beyond test scores Teaching Mathematics as Storytelling Rina Zazkis,Peter Liljedahl,2019-02-11 This book presents storytelling in mathematics as a medium for creating a classroom in which mathematics is appreciated understood and enjoyed The authors demonstrate how students mathematical activity can be engaged via storytelling Readers are introduced to many mathematical stories of different kinds such as stories that provide a frame or a background to mathematical problems stories that deeply intertwine with the content and stories that explain concepts or ideas Moreover the authors present a framework for creating new stories ideas for using and enriching existing stories as well as several techniques for storytelling that make telling more interactive and more appealing to the learner This book is of interest for those who teach mathematics or teach teachers to teach mathematics It may be of interest to those who like stories or like mathematics or those who dislike either mathematics or stories but are ready to reconsider their position **Challenging Mathematics In and Beyond the Classroom** Edward J. Barbeau,Peter J. Taylor,2009-04-21 In the mid 1980s the International Commission on Mathematical Instruction ICMI inaugurated a series of studies in mathematics education by commissioning one on the influence of technology and informatics on mathematics and its teaching These studies are designed to thoroughly explore topics of c temporary interest by gathering together a group of experts who prepare a Study Volume that provides a considered assessment of the current state and a guide to further developments Studies have embraced a range of issues some central such as the teaching of algebra some closely related such as the impact of history and psychology and some looking at mathematics education from a particular perspective such as cultural differences between East and West These studies have been commissioned at the rate of about one per year Once the ICMI Executive decides on the topic one or two chairs are selected and then in consultation with them an International Program

Committee IPC of about 12 experts is formed The IPC then meets and prepares a Discussion Document that sets forth the issues and invites interested parties to submit papers These papers are the basis for invitations to a Study Conference at which the various dimensions of the topic are explored and a book the Study Volume is sketched out The book is then put together in collaboration mainly using electronic communication The entire process typically takes about six years
