Mind Trinity Trilogy:

The Master Set Universe Maxwell Katz, 2007 The Master Set Universe is an in depth investigation through the realms of Quantum Mechanics and Mathematics of the concept of the Master Set an all encompassing every thing entirely self referential in nature Maxwell Katz makes use of a number of analogies to illustrate his themes The way in which the Master Set projects the illusion of a mechanical world for example is likened to a computer game which plays out certain events although at the same time it contains infinite possibilities within itself Meaning and truth are analysed in the light of this Projective Realm There are no absolutes meaning is simply a way that we define ourselves giving us perspective in the way we perceive all other The overriding feature of the Master Set Universe is its Oneness From it comes every thing it is every thing

The Mind's Eye Jeffrey F. Hamburger, Anne-Marie Bouché, 2006 The Mind's Eye focuses on the relationships among art theology exegesis and literature issues long central to the study of medieval art yet ripe for reconsideration Essays by leading scholars from many fields examine the illustration of theological commentaries the use of images to expound or disseminate doctrine the role of images within theological discourse the development of doctrine in response to images and the place of vision and the visual in theological thought At issue are the ways in which theologians responded to the images that we call art and in which images entered into dialogue with theological discourse In what ways could medieval art be construed as argumentative in structure as well as in function Are any of the modes of representation in medieval art analogous to those found in texts In what ways did images function as vehicles not merely vessels of meaning and signification To what extent can exegesis and other genres of theological discourse shed light on the form as well as the content and function of medieval images These are only some of the challenging questions posed by this unprecedented and interdisciplinary collection which provides a historical framework within which to reconsider the relationship between seeing and thinking perception and the imagination in the Middle Ages
