Cuéllar, 2013-01-09 Governing Security investigates the surprising history of two major federal agencies that touch the lives of Americans every day the Roosevelt era Federal Security Agency which eventually became today's Department of Health and Human Services and the more recently created Department of Homeland Security By describing the legal political and institutional history of both organizations Mariano Florentino Cuéllar offers a compelling account of crucial developments affecting the basic architecture of our nation He shows how Americans end up choosing security goals not through an elaborate technical process but in lively and overlapping settings involving conflict over statutory programs agency autonomy presidential power and priorities for domestic and international risk regulation Ultimately as Cuéllar shows ongoing fights about the scope of national security reshape the very structure of government and the intricate process through which statutes and regulations are implemented particularly during or in anticipation of a national crisis *Discipline in Education*

Johan Botha, 2021 This book addresses a perennial challenge to the success of the South African education system namely discipline This volume steers the interrogation of discipline in a new direction reflecting on ways in which recent research can benefit South African schools This includes the need for alternative discipline that will enhance education The scholarly contribution lies in its in depth exploration of the relevance of research findings to South African schools and to the twenty first century socio political environment For the first time scholarly interrogation of the issue of learner discipline in South African schools draws on indigenous knowledge systems Its post colonial and decolonial perspectives offer an ethical and

moral compass for behaviour that could contribute to the well being of South African society and other societies similarly afflicted by anti social behaviour The book offers a range of perspectives on the debates on discipline and associated issues and should stimulate future discussions on discipline and indiscipline at a time when South Africa and many other societies engage with the effects of social and political transformation This scholarly book is aimed at academics and researchers The contributors include philosophers moralists corporativists education law specialists curriculum specialists specialists in education and culture advocates of ubuntu and people using meta syntheses of approaches and practices and religious practices such as a Christian ethical moral approach to parental and school discipline They draw on their insights into postcolonialism the impact of indigenous knowledge theories of agency dysfunctionality and school underperformance The book offers an intriguing depiction of opposing views on discipline

Nonviolence Senthil Ram, Ralph Summy, 2008 The so called war on terror has gone badly for the West playing directly into the strategy of al Qa ida and the rest of the terrorist network Why did this happen Were there other approaches that might have been implemented with better prospects of success This edited collection of perspectives on the non violent counter to terrorism opens the topic to serious consideration The development of a non

violent paradigm brings into sharp focus the deficiencies of present thinking and paves the way for comprehending how non violence might overcome those deficiencies and introduce viable alternatives Since there is a general ignorance about the history theory and operational dynamics of non violence these aspects are featured throughout the book and related to the special case of terrorism To understand empathetically the background and mind set of the opponent without condoning his actions to study his culture to avoid the strategic trap he has set to examine the different gender reactions of a Muslim Society to differentiate between non violent Islam and Islamic Terrorism to jettison the misinformed baggage we carry about violence to appreciate the positive role education and aesthetics can play and to investigate ways in which a non violent counter to terrorism might be staged including a Gandhian response These are just some of the tasks that the contributors have collectively pursued Their ideas excitingly open up a whole new set of possibilities for a more peaceful world
