Training of trainers manual on the operation, maintenance and repair of farm machinery Van Loon, J., Flores Rojas, M.,2022-05-05 This training of trainers ToT manual aims to provide insights into the operation maintenance and basic repair of farm machinery It provides an overview of the main concepts of equipment that can facilitate sustainable agriculture practices with examples and guidelines on the topic Its objective is to provide extension officers technicians mechanics and youth with the necessary information and skills to become trainers and deliver technical capacity sessions on this topic There is a mix of theory and practice in this training Participants must have the time to individually perform the different tasks described in the modules with close supervision The training manual comprises four modules Module 1 covers different tractors as a power source and power take off operations Module 2 focuses on the implements and equipment attached to tractors for field operations Module 3 is about harvest post harvest and storage technologies Module 4 covers general aspects and tips for maintenance spare parts and replacements

Agricultural mechanization and agricultural transformation Diao, Xinshen,Silver, Jed,Takeshima, Hiroyuki,2016-04-29 A renewed focus on agriculture s potential contribution to economic transformation in Africa has resulted in increased attention paid to agricultural mechanization African agriculture still relies predominantly on human muscle power despite anecdotal evidence on urbanization and rising rural wages in contrast to other developing regions that have experienced rapid increases in agricultural mechanization during the past few decades Past state led mechanization pushes in Africa often failed due to insufficient understanding of the nature of demand for mechanization technologies among farmers and insufficient knowledge of private sector functions This background paper reviews the factors likely to influence farmer demand for mechanization in Africa and details different existing and potential mechanization supply models Although an empirical analysis of mechanization demand and the effectiveness of supply chains is beyond the scope of this paper in part due to data limitations this paper suggests that demand for mechanization may be emerging in some parts of Africa It also suggests that private sector driven supply models are better positioned to meet this demand than direct government involvement and certain types of subsidized programs The paper then identifies possible areas for government support to complement private sector leadership in developing mechanization supply chains Nevertheless significant further research is required to better understand the changing nature of mechanization demand in Africa and the extent and effectiveness of different supply models in meeting it

survey round Takeshima, Hiroyuki,Win, Myat Thida,Masias, Ian,2020-06-09 Agricultural mechanization service providers MSP are crucial to enabling smallholder farmers to undertake a range of power intensive farm and post harvest operations in a timely manner These operations are important for food production and farm income MSPs are capital intensive operations The economic viability of these businesses is highly sensitive to capacity utilization which generates the cash flow needed to repay equipment loans to prices of imported capital goods including machines equipment and fuels and to the availability of machine operators among others Hence the operations of MSPs are sensitive to restrictions on mobility and trade The COVID

19 pandemic in Myanmar the restrictions imposed as policy responses to control the spread of the virus and the associated market disruptions affect the operations of MSPs across the country However the specific impacts MSPs experience depends on factors specific to different regions and states Measures to support MSPs and to ensure farmer access to their services should be guided by an understanding of the situation on the ground *Daily Digest* United States.
