Naming The System Inequality And Work In The Global Economy:

Naming the System Michael Yates, 2003-03 Examines contemporary trends in employment and unemployment in hours of work and in the nature of jobs and proposes strategic options for organized labor in the current political context

Naming the System Michael Yates, 2003 **Justice in a Global Economy** Pamela Brubaker, Rebecca Todd Peters, Laura A. Stivers, 2006-01-01 Today's complex social and economic problems leave many people in the affluent world feeling either overwhelmed or ambivalent Even the small percentage of us who have examined the ethics behind our financial decisions and overcome the often deterring factors of self interest rarely know what to do to make any difference By providing tools for examination and concrete actions for individuals communities and society at large *Justice in a Global Economy* guides its readers through many of today's complex societal issues including land use immigration corporate accountability and environmental and economic justice Beginning with a basic introduction to the impact of economic globalization the book provides both critical assessments of the current political economic structures and examples of people and communities who are actively working to transform society Each chapter concludes with questions for discussion and reflection *Marginal Workers* Ruben J. Garcia, 2012 Undocumented and authorized immigrant labourers female workers workers of colour guest workers and unionized workers together compose an enormous and diverse part of the labour force in America Labour and employment laws are supposed to protect employees from various workplace threats such as poor wages bad working conditions and unfair dismissal Yet as members of individual groups with minority status the rights of many of these individuals are often dictated by other types of law such as constitutional and immigration laws Worse still the groups who fall into these cracks in the legal system often do not have the political power necessary to change the laws for better protection In *Marginal Workers* Ruben J Garcia demonstrates that when it comes to these marginal workers the sum of the law is less than its parts and despite what appears to be a plethora of applicable statutes marginal workers are frequently lacking in protection To ameliorate the status of marginal workers he argues for a new paradigm in worker protection one based on human freedom and rights and points to a number of examples in which marginal workers have organized for greater justice on the job in spite of the weakness of the law **Making Peace In and With the World** Heon Kim, John Raines, 2011-12-08 *Making Peace In and With the World* The Glen Movement and Eco Justice is a representative study and working analysis of contemporary Islamic thought on eco justice It cuts through problems facing humanity today ranging from inequality and violence in the smaller globalized world to the end death of nature as signaled by various environmental and ecological crises Addressing these problems this volume sheds light on two dimensions of peace in the earth community making peace between differing human communities and making peace between humanity and nature The phrase Eco Justice in this volume signifies this dual reality thereby offering a unique and insightful view that justice in the world must go hand in hand with ecological justice if peace is to be made With its dual foci of peace this volume contributes to multi disciplinary

academic areas It adds to a burgeoning field of religious ecology by exploring the dynamics at play in the interaction between religion human communities and nature and by providing natural scientific works with considerable theoretical philosophical and ethical implications This volume also corresponds to studies in the interdisciplinary field of war and peace Since it deals centrally with the question of religion and eco justice this volume challenges assumptions of exclusivist religion religion oriented violence and the religion based Clash of Civilizations The contributors of this volume from diverse academic backgrounds take G len and the G len movement as the case study Muhammed Fethullah G len is one of the most significant Islamic theologians in the contemporary world and his inspired G len movement is the fastest growing Islamic civic movement worldwide This volume provides a key reference to studies in G len and his movement for new discussions and criticisms And by taking this figure and his movement as a case it reveals a new dimension of peace among differing human communities and between humanity and nature

Dimensions of Prejudice Zak Cope, 2008 This book argues that unreasonable dogmatic beliefs are expressions of socially structured patterns of prejudice Specifically prejudice is explained as being produced and dispersed within the confines of the political structures governing the manner in which material human needs are created and met Classifying various dimensions of prejudice philosophical epistemological psychological sociological political and cultural the book conceptualises the relation between dogmatic thinking and these facets of human existence Criticising and comparing a wide range of theories and factual data relating to the growth and expression of prejudice the book is a theoretical discussion of problems surrounding the production of cultural norms the psychological effects of filial systems and relations between the sexes the constitution of modern capitalist society and elementary principles of political democracy Drawing on feminism whiteness studies Marxist theories of racism and imperialism psychoanalysis critical theory and cultural studies the author examines the constraints placed upon individuals groups and nations propensity for scientific and rational thinking

Facing the Anthropocene Ian Angus, 2016-07 Science tells us that a new and dangerous stage in planetary evolution has begun the Anthropocene a time of rising temperatures extreme weather rising oceans and mass species extinctions Humanity faces not just more pollution or warmer weather but a crisis of the Earth System If business as usual continues this century will be marked by rapid deterioration of our physical social and economic environment Large parts of Earth will become uninhabitable and civilization itself will be threatened Facing the Anthropocene shows what has caused this planetary emergency and what we must do to meet the challenge Bridging the gap between Earth System science and ecological Marxism Ian Angus examines not only the latest scientific findings about the physical causes and consequences of the Anthropocene transition but also the social and economic trends that underlie the crisis Cogent and compellingly written Facing the Anthropocene offers a unique synthesis of natural and social science that illustrates how capitalism s inexorable drive for growth powered by the rapid burning of fossil fuels that took millions of years to form has driven our world to the brink of disaster Survival in the Anthropocene Angus argues requires radical social

change replacing fossil capitalism with a new ecosocialist civilization *As Goes Bethlehem* Jill A. Schennum, 2023-08-15

The steel industry played a central role in building post World War II economic success in the US and in defining the parameters of the post World War II social contract As these long term processes both preceded and contributed to the Great Recession a new capitalism one in which banks and the credit system took precedence over industrial production changed the lives of many American workers including steelworkers As Goes Bethlehem raises important questions about why workers and their unions were not able to successfully contest this attack on industrial labor instead settling for best navigating a long downward trajectory Through the experiences and reflections of steelworkers Jill A Schennum demonstrates the significance of work and particularly of industrial work in giving meaning to people s lives identities and sense of worth She uses workers narratives and voices to show the importance of work space time and social relations rejecting dominant interpretations of blue collar workers as alienated from their work but well paid and co opted by a middle class standard of living Schennum covers thirty five years of investment and disinvestment managerial initiatives transfer decisions layoffs and downsizings external transfers the eventual bankruptcy of the Bethlehem Steel Corporation and movement into retirement unemployment and new postindustrial jobs The very solidarities rights of citizenship and rule of law forged in the mill and built on by the union were constructed in part through exclusions based on race ethnicity gender and region These lines of fracture were mobilized to undermine working class strength in the postindustrial period Through the experiences of African American Puerto Rican coal country and women workers in the steel mills this book explores these issues of fracture and solidarity **This-Worldly Nibbāna** Hsiao-Lan Hu, 2011-12-01 Offering a feminist analysis of foundational Buddhist texts along with a Buddhist approach to social issues in a globalized world Hsiao Lan Hu revitalizes Buddhist social ethics for contemporary times Hu s feminist exegesis references the Nik ya s from the Discourse Basket of the P li Canon These texts among the earliest in the Buddhist canon are considered to contain the sayings of the Buddha and his disciples and are recognized by all Buddhist schools At the heart of the ethics that emerges is the Buddhist notion of interdependent co arising which addresses the sexism classism and frequent overemphasis on individual liberation as opposed to communal well being for which Buddhism has been criticized Hu notes the Buddha s challenge to social hierarchies during his life and compares the notion of non Self to the poststructuralist feminist rejection of the autonomous subject maintaining that neither dissolves moral responsibility or agency Notions of kamma nibb na and dukkha suffering are discussed within the communal context offered by insights from interdependent co arising and the Noble Eightfold Path This work uniquely bridges the worlds of Buddhism feminism social ethics and activism and will be of interest to scholars students and readers in all of these areas *Neoliberal Democratization and New Authoritarianism* Dennis C. Canterbury, 2019-06-04 Originally published in 2005 Domestic and foreign economic and political policies in the rich capitalist nations in the North and in the poor countries in the South are geared towards globalization and democratization Indeed the dominant view held

by countries in the North is that globalization leads to democracy and vice versa and that in turn economic development will result from that process. Thus many scarce resources are allocated to bring about globalization and democracy. Exploring the dynamics of change that allow for the persistence of authoritarian states in the Third World, this illuminating book highlights certain aspects of democratization that have not been investigated fully. Anyone interested in development politics and political sociology will draw a plethora of important theoretical insights into globalization, authoritarianism, and transition to democratization from this original study.

Victims of Time, Warriors for Change Evelyn A. Clark, 2014-09-26 This book explores how women in the Chilean workforce and social activists describe and understand globalization and neoliberalism and their impact on their nation and the lives of Chilean women. By examining national policies, quantitative measures of development, and how various women in the labor force and political and community organizations perceive and live within the Chilean economy, Clark shows the dynamic relationship between national and international policies and gender inequality and women's empowerment. In addition to historic and contemporary data analysis on Chile's economic commitment to neoliberalism since the 1970s, Clark discusses how women have benefited in neoliberal Chile through wage labor and how that has impacted their relationships within the home and within their communities. In addition to working full time, these women were committed to full time activism to promote equality and provide a backlash against neoliberal economic policies. Overall, therefore, globalization and neoliberalism have had a profound impact on women in Chilean society. On the one hand, opportunities have been opened for many women, but on the other, limitations and suffering have been imposed on just as many, if not more. An unfortunate consequence of these processes is that class differences among women have been exacerbated. In particular, most women have become Victims of Time. Still, many women remain Warriors for Change, whose political and social activism provide hope for a better Chile.

Marx, Lenin, and the Revolutionary Experience Paul LeBlanc, 2014-06-03 *Marx, Lenin, and the Revolutionary Experience* offers a fresh look at Communism, both the bad and good, and also touches on anarchism, Christian theory, conservatism, liberalism, Marxism, and more, to argue for the enduring relevance of Karl Marx and V. I. Lenin as democratic revolutionaries. It examines the Red Decade of the 1930s and the civil rights movement and the New Left of the 1960s in the United States, as well. Studying the past to grapple with issues of war and terrorism, exploitation, hunger, ecological crisis, and trends toward deadening and spiritualization, the book shows how the revolutionaries of the past are still relevant to today's struggles. It offers a clearly written and carefully reasoned thematic discussion of globalization, Marxism, Christianity, and religion in general, Communism, the history of the USSR, and US radical and social movements.

Service Workers in the Era of Monopoly Capital Fabian van Onzen, 2021-10-11 *Service Workers in the Era of Monopoly Capital* Fabian van Onzen uses Marxist theory to analyse the process by which service and retail workers are exploited by the capitalist class. His analysis takes us through the primary concepts of Marxism: surplus value, commodity form, etc., and demonstrates their relevance for understanding the service industry. The book reveals that

service and retail workers shop employees cleaners hospitality workers are integral to the capitalist system and have significant power to transform society if organised properly Van Onzen argues that the key to ending the exploitation of service workers is through the socialist transformation of society The book contains an examination of what service work will be like under socialism and provides examples of how former socialist countries changed the nature of service labour Service Workers in the Era of Monopoly Capital is an important addition to Marxist theory which is still somewhat lacking in detailed accounts of the service and retail industry

A Just World Heon Kim, 2014-09-26 A Just World Multi disciplinary Perspectives on Social Justice is a multi disciplinary analysis of social justice intended to foster scholarly discussion on a just world The contributors to this volume maintain that justice in society is a most pressing concern in the world today and discussion about it must be beyond theory practical and multi disciplinary While dialogue concerning social justice occurs in many academic disciplines it can be neither solely an issue of nor fully understood by one discipline Its complex involvement in all human social life necessitates a multi disciplinary approach To this end this volume offers an interdisciplinary insight into what social justice means today and how it can be achieved to create a more just world Eight scholars representing different disciplines shed light on various aspects of social justice today from their unique perspectives the humanities the social sciences the business world and the field of education Without losing their unique approaches to social justice they are inclusive in this collection These contributors directly address problems facing our societies today from a broad spectrum of capitalist neo liberal world order and with specific cases including the Arab Spring and the Occupy Movement In addressing the problems the chapters in this volume also reveal deep seated causes of the problems and thereby identify the nature and characteristics of social justice in a contemporary context providing considerable insight into long term sustainable solutions toward more just societies and a just world A Just World Multi disciplinary Perspectives on Social Justice is unique in that it provides the most recent discussion on the timely topic of social justice Given the matchless credentials of the contributors the editor is confident that this volume will be received as nothing short of a landmark in multi

disciplinary discussion on social justice It is destined to also make a considerable impact in charting new directions for future scholarly work on justice The sweeping global problem of injustice has resulted in a considerable number of studies however there has been little done to examine justice from a multi disciplinary perspective and this volume fills that void particularly as it presents common features of today s problems and discusses global social justice While this volume provides discourse by specialists in justice it will attract a readership beyond academia and will catch the attention of anyone who is interested in justice and who seeks a just world
