Glacier National Park After Dark John Ashley, 2015-06-15 What is there to see in Glacier National Park after the sun goes down As writer and photographer John

Ashley reveals in his newest book some of Glacier's most awe-inspiring sights are found high above the mountaintops. Readers will marvel at Ashley's spectacular color photographs of favorite Glacier landmarks such as Chief Mountain and St. Mary Lake lit by the Milky Way, northern lights, and a universe of wonders. These images complement Ashley's text, which includes clear explanations of astronomical phenomena, traditional Blackfoot stories, Glacier National Park geology and history, and entertaining tales of his own run-ins with curious critters and park rangers. Ashley rallies readers to combat light pollution, a problem that has begun to erode the ancient beauty of one of the last truly dark places in the country. **Focus**

In the online world, people argue about anything and everything; religion is no exception. Stephen Pihlaja investigates how several prominent social media figures present views about religion in an environment where their positions are challenged. The analysis shows how conflict creates a space for users to share, explain, and develop their opinions and beliefs by making appeals to both a core audience of like-minded viewers and a broader audience of viewers who are potentially interested in the claims, ambivalent or openly hostile. The book argues that in the back and forth of these arguments, the positions that users take in response to the arguments of others have consequences for how religious talk develops and potentially for how people understand and practice their beliefs in the twenty-first century. Based on original empirical research, it addresses long-debated questions in sociolinguistics and discourse analysis regarding the role of language in building solidarity, defining identity, and establishing genres and registers of interaction. *Queering Memory and National Identity in Transcultural U.S. Literature and Culture* Christopher W. Clark, 2020-08-21. This book examines the queer implications of memory and nationhood in transcultural U.S. literature and culture. Through an analysis of art and photography responding to the U.S. domestic response to 9/11, Iraq war, fiction, representations of Abu Ghraib and Guantanamo Bay, and migrant fiction in the twenty-first century, Christopher W. Clark creates a queer archive of transcultural U.S. texts as a way of destabilizing heteronormativity and thinking about productive spaces of queer world-building. Drawing on the fields of transcultural memory, queer studies, and transculturalism, this book raises important questions of queer bodies and subjecthood. Clark traces their legacies through texts by Sinan Antoon, Mohamedou Ould Slahi, among others, alongside film and photography that includes artists such as Nina Berman and Hasan Elahi. In all, the book queers forms of cultural memory and national identity to uncover the traces of injury but also spaces of regeneration.
