National Security Strategy Of The United States:

Our New National Security Strategy James J. Tritten, 1992-09-30 This book is an analysis of President Bush's Regional Defense Strategy first unveiled in Aspen Colorado on August 2, 1990. This strategy involves a mix of active reserve and reconstitutable forces and General Colin Powell's Base Force. If implemented, the new strategy and force structure would return significant U.S. ground and air forces to the continental United States where most would be demobilized. In the event of a major crisis, the United States would rely on active and reserve forces for a contingency response much as was done for Operation Desert Storm. The new national security strategy is based upon the 25 percent budget cut negotiated with Congress, a greatly depleted Russian threat, and a new international security environment that assumes two years' warning of a European-centered global war with the former USSR. There are four major critical factors upon which the new strategy depends: 1) the continued decline of the Russians as a threat to world stability; 2) the ability of the intelligence community to meet new challenges; 3) the behavior of the allies and Congress; and 4) the ability of industry to meet new demands. The new strategy is not simply an adjustment to existing defense doctrine or strategy but rather a fundamental revision of the way the United States has approached defense since 1945. Students and scholars interested in politico-military strategy and government policy will find this book of great interest.

National Security Strategy of the United States United States. President (1981-1989 : Reagan), Ronald Reagan, 1987 **Terrorism** Doug Lovelace, 2008-03-27 Terrorism Documents of International and Local Control is a hardbound series that provides primary source documents on the worldwide counterterrorism effort. Chief among the documents collected are transcripts of Congressional testimony reports by such federal government bodies as the Congressional Research Service and the Government Accountability Office and case law covering issues related to terrorism. Most volumes carry a single theme, and inside each volume the documents appear within topic-based categories. The series also includes a subject index and other indices that guide the user through this complex area of the law. With the addition of commentary from a prominent member of the U.S. national security establishment, Professor Douglas C. Lovelace, this series becomes the premiere resource for an informative and analytical discourse on terrorism and how it continues to have a catastrophic effect on our society. Although Professor Lovelace acknowledges the current Iraq debate in his opening pages, *Understanding United States National Security Strategy Relating to Terrorism: Part II: Derivative and Supporting Strategies* primarily focuses on the similarly difficult topic of how the U.S. may best secure its homeland. By dividing this topic into three prominent categories—aviation security, maritime security, and domestic security—Professor Lovelace expertly presents a summary of current U.S. security policy and assesses the value of those policies. Within the domestic security category, he also provides detailed guidance on such specialized issues as bio-defense and the connection between the drug trade and terrorist financing. The Terrorism series remains a unique resource on all issues related to terrorism.

U.s. National Security Strategy: a New Era , The National Security Strategy of the United States of America Frank H. Columbus,2003 The new US security strategy released by the White House in September 2002 is a remarkable document which requires more analysis than that received in the main media perhaps partially because of the massive attention given to the Beltway sniper s The new strategy would justify pre emptive strikes for the first time against any countries which the current or future US leadership believe might pose a threat in the future such as China or resurgent Russia or any other country or a group of countries This bold assertion is justified by the threat of even more miniature weapons of mass destruction coupled with the hatred of America This important document and the accompanying commentary provide essential and thought provoking reading

National Security Strategy of the United States United States. President (1981-1989 : Reagan),1988 **A Strong NATO is Essential to the United States National Security Strategy** Alan M. Stull,2005 As the United States fights the Global War on Terrorism GWOT and the North Atlantic Treaty Organization NATO wrestles with its post cold war role it is imperative that America stays deeply engaged in Europe The United States must maintain relevance in Europe to continue cooperation with Europeans on security and economic policies The United States has maintained its most influential position on the Continent through its ongoing NATO leadership However on 16 August 2004 President Bush announced significant troop reductions in both Europe and Asia as part of the major restructuring and restationing of U S forces On the surface this does

not conflict with the U S National Security Strategy NSS of September 2002 but as an overall U S position it may further divide the United States from its European allies undermining NSS goals The United States and Europe have always had a different view of the world This view was muted during the Cold War when they were united against the USSR but today with no common enemy the differences have come to the forefront This divide can only deepen as the United States disengages from Europe As their strategic visions diverge and the United States reduces its presence to just a few thousand forces spread among a handful of European countries its influence may fade to the point where the United States is no longer a factor in European policy making Though not an immediate concern it could easily become one over the next two decades as the United States concentrates on the GWOT and the European Union EU concentrates on strengthening its union politically and economically as well as militarily with ratification of its first constitution A strong NATO will aid the United States in the GWOT be the international force used to prevent regional conflicts within Europe s influence and ensure the continued strong economic growth of Europe

Executive office of the President,2002 Air mobility the key to the United States national security strategy ,2000 Since airlift was first used as a tool of national security during the Berlin Airlift it has grown to deliver passengers cargo and fuel to operations worldwide in support of national security However Air Mobility Command is the single organization that performs for air mobility for the United States Cm%Currently the Air Force has structured Air Mobility Command for war yet this command performs operations during times when the US is at peace Air Mobility Command performs missions to support US military operations in hostile environments as well as humanitarian operations in non hostile environments The number of operations requiring mobility air forces has been on the rise since the Cold War ended 10 years ago These steady state operations seem to over task mobility air forces This study centers on the question Can Air Mobility Command s force structure organized for two major theater wars fulfill that requirement and perform the steady state operations in today s strategic environment This study finds that Air Mobility Command s force structure cannot meet its requirements for two major theater wars and that the current force structure is inefficient in meeting the requirements for steady state operations First this thesis presents a primer to acclimate the reader

to the complex environment and multifaceted requirements of mobility air forces Next this thesis examines Air Mobility Command s current force structure as determined by Department of Defense requirements for war Then this thesis also describes the various types of missions that Air Mobility Command performs on a steady state basis and evaluates the importance of these operations in fulfilling US National Security Strategy Finally this thesis recommends action that the Air Force and the Department of Defense should investigate in order to improve their air mobility capabilities in *National Security Strategy of the United States.
