The Development of Cities in Northern and Central Italy Paul N. Balchin, 2022-02-19 Originally published in 2019 this book provides a comprehensive account of a formative historical period uniquely describing Renaissance architecture as the physical manifestation of political and economic change The book illustrates how shifts in architectural style and design were paralleled with Northern and Central Italy s external and internal conflicts the evolution of urban and regional government and economic and demographic growth Covering the full extent of the Renaissance period Balchin charts the era s medieval roots and its transformation into Mannerist and Baroque tendencies He demonstrates how developments in architecture and planning were inextricably linked to political and economic power and how these relationships shifted from city to city over time

Building Stones of Milan and Lombardy Roberto Bugini, Luisa Folli, 2023-04-17 Milan has played an important role in the Italian country since the Roman period This importance is reflected also by the diffusion of stone architecture a persisting trait of Milan architecture was the use of different stones in the same building Milan lies in the middle of the alluvial plain of the Po far from the stone quarries some waterways were dug out in order to supply the building stones from the surrounding territories The study of stone as a building material was significant at the end of 19th century but then it was largely neglected by both architects and geologists So it is significant to suggest a study about the stones employed to build in Milan

Volume 1 in relationship with a petrographic study about the features of the stones quarried in the whole Lombard territory
Volume 2 The present volume contains a record of Milanese edifices marking the different historical periods Each edifice is described in a card containing the building history the architect the kind of stone employed and subdivided according to the different parts of the building and the shape of stone elements A particular investigation is addressed to the stones used during the 20th century a great part of them were never used before in Milan or in Lombardy **The Routledge**

Companion to Italian Fascist Architecture Kay Bea Jones, Stephanie Pilat, 2020-04-30 Today nearly a century after the National Fascist Party came to power in Italy questions about the built legacy of the regime provoke polemics among architects and scholars Mussolini's government constructed thousands of new buildings across the Italian Peninsula and islands and in colonial territories From hospitals post offices and stadia to housing summer camps Fascist Party Headquarters ceremonial spaces roads railways and bridges the physical traces of the regime have a presence in nearly every Italian town The Routledge Companion to Italian Fascist Architecture investigates what has become of the architectural and urban projects of Italian fascism how sites have been transformed or adapted and what constitutes the meaning of these buildings and cities today The essays include a rich array of new arguments by both senior and early career scholars from Italy and beyond They examine the reception of fascist architecture through studies of destruction and adaptation debates over reuse artistic interventions and even routine daily practices which may slowly alter collective understandings of such places Paolo Portoghesi sheds light on the subject from his internal perspective while Harald Bodenschatz situates Italy among period totalitarian authorities and their symbols across Europe Section editors frame synthesize and moderate essays that explore fascism's afterlife how the physical legacy of the regime has been altered and preserved and what it means now This critical history of interpretations of fascist era architecture and urban projects broadens our understanding of the relationships among politics identity memory and place This companion will be of interest to students and scholars in a range of fields including Italian history architectural history cultural studies visual sociology political science and art history *European Planning History in the 20th Century* Max Welch Guerra, Abdellah Abarkan, María A. Castrillo Romón, Martin Pekár, 2022-08-11 The history of Europe in the 20th century is closely tied to the history of urban planning Social and economic progress but also the brute treatment of people and nature throughout Europe were possible due to the use of urban planning and the other levels of spatial planning Thereby planning has constituted itself in Europe as an international subject Since its emergence through intense exchange but also competition despite country differences planning has developed as a European field of practice and scientific discipline Planning is here much more than the addition of individual histories however historiography has treated this history very selective regarding geography and content This book searches for an understanding of the historiography of planning in a European dimension Scholars from Eastern and Western Southern and Northern Europe address the issues of the public led production of city and

the social functions of urban planning in capitalist and state socialist countries The examined examples include Poland and USSR Czech Republic and Slovakia UK Netherlands Germany France Portugal and Spain Italy and Sweden The book will be of interest to students and scholars for Urbanism Urban Town Planning Spatial Planning Spatial Politics Urban Development Urban Policies Planning History and European History of the 20th Century The Open Access version of this book available at www.taylorfrancis.com has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license

Digital Fabrication in Architecture, Engineering and Construction Luca Caneparo, 2013-10-02 Digital technologies are changing the relationship between design and construction with computer models CAD CAM and prototyping designers can gain direct control of building and construction processes The ability to digitally model designs and thus to use those models directly in the context of production creates a synthesis between design and construction in keeping with the tradition of the close relationship between design and craftsmanship between the quality of the design and the rules of the craft The evolution of the culture of design and construction is the underlying theme of this book The aim is to discuss the direction that innovation

is now taking with a particular focus on today's cutting edge architectures. The method addresses the ways in which different societies have dealt with the issues of their age regarding design and construction, the different contributions provided by various techniques and with them the meanings expressed by the architecture. As building design using digital tools requires specific skills in the fabrication processes and in the languages used by information technology, the book also offers a practical guide to new methods and techniques of managing and controlling fabrication for AEC. A systematic analysis of new skills used in the design process presents an overview of opportunities for architects and engineers. By collecting information on significant projects and analyzing them, the book explores the technical and artistic potential of digital technology. The cases studied are the outcomes of groundbreaking projects which were able to give form and significance to technological research. They show that digital tools are not the exclusive prerogative of large firms but can also be adopted by teams working across small and medium sized firms, firms which have been able to use informed research to link innovative design with the possibilities offered by digital fabrication in architecture.

Guida all'architettura di Milano 1954-2014 Marco Biraghi, 2013-11-18T00:00:00+01:00. Con la costruzione della Torre Velasca e del Grattacielo Pirelli attorno alla met degli anni Cinquanta s'inaugura la via milanese alla modernità architettonica. Ai nomi di Gio Ponti e dei BBPR si aggiungono di lì a poco quelli di Ignazio Gardella, Luigi Caccia Dominioni e Vico Magistretti, capifila di un gruppo di ottimi professionisti che nel volgere di un decennio realizzano abitazioni, uffici, impianti sportivi, parcheggi, dotando Milano delle strutture adeguate a una città dalle aspirazioni europee, oltre a renderla un museo a cielo aperto dell'architettura moderna. Il volume ripercorre la vicenda dell'architettura attraverso le schede critiche illustrate con immagini realizzate per l'occasione dei 160 edifici più significativi degli ultimi sessant'anni, segnalando molti altri degni di nota. Nella parte finale una chiara e utile cartografia permette al lettore di orientarsi e di tracciare i propri itinerari di visita.

Conserving 20th-Century Architecture Maria Paola Borgarino, Davide Del Curto, 2023-03-30. This book offers an international overview of how to apply the Conservation Management Plan (CMP) to the 20th century architectural heritage. Although the CMP is universally considered a fundamental tool for sustainable management of the built heritage, the application to 20th century buildings is still limited. The book illustrates selected case studies from different countries to discuss how best to preserve the authenticity of the original materials, manage changes in use, engage users and stakeholders in this process and make conservation and sustainability work together. *Conserving 20th*

Cultural, Theoretical, and Innovative Approaches to Contemporary Interior Design Crespi, Luciano, 2020-02-07 Interior design can be considered a discipline that ranks among the worlds of art design and architecture and provides the cognitive tools to operate innovatively within the spaces of the contemporary city that require regeneration Emerging trends in design combine disciplines such as new aesthetic in the world of art design in all its ramifications interior design as a response to more than functional needs and as the demand for qualitative and symbolic values to be added to contemporary environments Cultural Theoretical and Innovative Approaches to Contemporary Interior Design is an essential reference source that approaches contemporary project development through a cultural and theoretical lens and aims to demonstrate that designing spaces interiors and the urban habitat are activities that have independent cultural foundations Featuring research on topics such as contemporary space mass housing and flexible design this book is ideally designed for interior designers architects academics researchers industry professionals and students **Sustainable Lina** Annette Condello, Steffen Lehmann, 2016-08-30 This essential book unravels the link between regional cultures adaptive reuse of existing buildings and sustainability It concentrates on the social dimensions relating to Brazilian architect Lina Bo Bardi's late adaptive reuse projects and works from the 1960s to the early 1990s interpreting her themes technical sources and design strategies of the creation of luxury as sustainability The edited book charts how Lina Bo Bardi invented her own version of sustainability introduced this concept through her landscape and adaptive reuse designs and through ideas about cross cultures in Brazil The book offers a critical reflection exploration and demonstration of the importance of adaptive reuse in the landscape and related themes for researchers and provides researchers and students new material on sustainability for further study In the context of the plurality of revisions of Lina Bo Bardi's work this book brings about a

refreshed interpretation of her integrative approach to adaptive reuse of buildings and landscapes as a significant contribution to the sustainability debate. It offers new insights into the construction of discourses about sustainability from the perspective of one of the key architects in the period to operate in the interface between modernity and tradition. Dr Fabiano Lemes de Oliveira, Senior Lecturer, University of Portsmouth, UK. Adaptability is one of the most important words in sustainable architecture today. From this perspective, this book looks at the work of a master of Brazilian modernism with lessons to be learnt on how to qualify indoor and outdoor spaces in social, environmental and architectural terms. Adaptive strategies as those seen throughout the work of Lina Bo Bardi are key instrument tools concept to sustainable buildings and cities. Professor Joana Carla Soares Goncalves, FAU, University of Sao Paulo, Brazil. The year 2015 marked the centenary of Lina Bo Bardi. This book is looking at Bardi's work through the perspective of adaptive reuse. Bringing together specialists on sustainability with specialists of Lina's work, the book generates an interesting new layer of discussion on the work of an architect that was never shy of controversy. Associate Professor Fernando Luiz Lara, University of Texas at Austin, USA. This collection of essays makes a very important and engaging contribution to suggest that to take Lina as an inspiration is to deal with her contradictions and to evaluate the stakes of what she struggled with in a 21st century world. What the authors gathered here and have laid out is a very timely invitation to discern lessons from Lina in relationship to today's pressing issues of architecture and environment, sustainability, recycling and developing an ethical design position in a world of diminishing resources and escalating challenges. Prof Barry Bergdoll, Columbia University and MoMA, New York, USA. The book features a Foreword by Barry Bergdoll, Winner of the Curtin University Humanities Research Award 2017 for Best Book of the Year, Oct 2017. Here the judges appraise: An elegantly conceptualised and carefully crafted volume that represents the work of the twentieth-century Brazilian architect Lina Bo Bardi through the lens of urgent contemporary questions of sustainability, adaptive reuse and ethical design. The book brings together a multidisciplinary and international collection of authors and addresses a global readership. It is beautifully presented and intelligently edited. Jury Book Award 2017, Winner of the Curtin University Humanities Research Award 2017 for Best Chapter of the Year, Sept 2017. Annette Condello, Chapter 3, 'Salvaging the Site's Luxuriance', Lina Bo Bardi, Landscape Architect. Here the judges appraise: A richly textured investigation of Lina Bo Bardi, a complex, fascinating and important Italian-born Brazilian architect, designer and co-founder of the magazine *Habitat*. This chapter is a thoughtful and respectful but also critical piece combining thorough research with deft analysis and carefully selected images and the publication has been highly recommended by leading academics and curators. Jury Book Award 2017.
