Schulzke,2019-03-01 During combat soldiers make life and death choices dozens of times a day These individual decisions accumulate to determine the outcome of wars This work examines the theory and practice of military ethics in counterinsurgency operations Marcus Schulzke surveys the ethical traditions that militaries borrow from compares ethics in practice in the US Army British Army and Royal Marines Commandos and Israel Defense Forces and draws conclusions that may help militaries refine their approaches in future conflicts The work is based on interviews with veterans and military personnel responsible for ethics training review of training materials and other official publications published accounts from combat veterans and observation of US Army focus groups with active duty soldiers Schulzke makes a convincing argument that though military ethics cannot guarantee flawless conduct incremental improvements can be made to reduce war s destructiveness while improving the success of counterinsurgency operations **First Do No Harm** Adrienne Harris,Steven Botticelli,2011-01-19 At the outset of World War I the Great War Freud supported the Austro Hungarian Empire for which his sons fought But the cruel truths of that bloody conflict wrought on the psyches as much as the bodies of the soldiers returning from the battlefield caused him to rethink his stance and subsequently affected his theory Psychoanalysis a healing science could tell us much about both the drive for war and the ways to undo the trauma that war inherently breeds but its principles could just as easily serve the enemy s desires to inculcate its own brand of truth Even a century later psychoanalysis can still be used as much for the justifications of warfare and propaganda as it is for the defiance of and resistance to those same things But it is in the investigation of the motives and methods behind these uses that psychoanalysis proves its greatest strength To wit this edited collection presents published and unpublished material by analysts writers and activists who have worked at the front lines of psychic life and war from various stances Set at a point of tension and contradiction they illustrate the paradoxical relation of psychoanalysis as both a site of resistance and healing and a necessary aspect of warmaking propaganda and militarism In doing so we venture from the home front from the trauma of returning veterans to the APA s own complicity in CIA black sites across international borders from the treatment of women in Latin American dictatorships to the resistance to occupation in Palestine from mind control to an ethics of responsibility Throughout a psychoanalytic sensibility deconstructs the very opposition that it inhabits and seeks to reestablish psychoanalysis as the healing discipline it was conceived to be **Inside War** Fabio Armao,2016-02-22 The post Cold War era was characterised by both the recurrence of state wars and the spread of forms of organised violence other than wars Asymmetric warfare between alliances led by the USA and groups of insurgents such as those witnessed in Afghanistan and Iraq coexist alongside domestic conflicts such as that of former Yugoslavia and more recently Libya and Syria and still other conflicts involving gangs mafias or narco traffickers The massive military industrial complexes conceived in the context of the threat of nuclear Armageddon are still there of course but they now coexist with irregular armies of insurgents carrying out massacres through the use of light weapons and improvised explosives devices This book oppose the

idea that this situation prefigures the return to an anarchical pre political condition by assuming that new wars are rather the product of the blurring of the public private divide induced by the end of the Cold War together with globalisation As a consequence also the internal and external factors are blurred and ever more permeable and elusive is becoming even the border between war and crime Inside War goes beyond a state centered analysis and adopts an interdisciplinary and multilayered approach and is intended to foster the dialogue among researchers from different fields It places war at the core of analysis assuming that the reality of war is what we make of it and that the only insurmountable limit to our comprehension of war is our way of knowing and representing it Fabio Armao teaches courses in Politics and Globalisation Processes and Criminal Systems He has been Visiting Professor at Cornell University and co convenor of the Standing Group on Organized Crime European Consortium for Political Research Founding member of T wai Torino World Affair Institute he is also member of the Editorial Board of Global Crime His research interests and publications focus on international wars and geopolitics on violent non state actors and transnational organised crime and on urban security
