**Mind Shift** John Parrington, 2021 Does any other animal experience the richness of our inner lives our ability to imagine to hope to dream to create imaginary worlds John Parrington answers no and considers how we came to be so different even from our nearest primate relatives In this book he argues that a mind shift occurred during our evolution in which tool use and especially the invention of language transformed our brains which not only became larger but subtly altered in their structure and function making them more plastic and open to external influences Words could be used for inner dialogue too leading to the emergence of a sense of self of conscious awareness as a product of brain biology and social interaction An outpouring of art music literature science and technology has been the result but also suffering delusions and despair when this symphonic brain activity goes wrong Parrington considers the evidence for this language and culture driven view of human consciousness and its implications for our mental health Book jacket **Queen, Speak Out** Christine H.
