Mind And Nature Essays On Time And Subjectivity:

Mind and Nature Jason Brown, 2000-04-07 This collection of essays extends the microgenetic theory of the mind brain state to basic problems in process psychology and philosophy of mind The author's microtemporal model of brain activity and psychological events which was originally based on clinical studies of patients with focal brain damage is here extended to such topics as the concept of the moment in Buddhist philosophy conscious and unconscious thought the nature of the self subjective time and aesthetic perception The author develops a highly original psychology of mental process actually a cognitive metaphysics which is grounded in brain physiology and clinical psychopathology A central theme is that the natural categories that arise in the extensibility of temporal data are continuous with conceptual structures in the human mind

The Microgenetic Theory of Mind and Brain Jason W. Brown, 2024-12-06 This book asks where ideas objects and feelings come from and how they arise via an exploration of the nature of subjective experience and its relation to the world Seeking an explanation for the experience of subjective duration and the present and in contrast to the conception of mental events as non temporal logical solids it explores a diachronic processual theory founded on psychological data and clinical observation that provides an explanatory system of thought adequate to the phenomena it is called on to explain The author focuses on the intra psychic sources and nature of subjective experience with the intent of examining a variety of phenomena from the standpoint of microgenetic theory The chapters deal with the origins of human subjectivity and the epochal nature of time and duration change and the relevance of a theory of the mental state to dream and the waking present Based on speculative psychology that flows from case studies in neuropsychology and concepts in process philosophy it advances a theory of mind and brain that brings together previous fragmentary research studies on this topic Neuropsychology and Philosophy of Mind in Process Maria Pachalska, Michel Weber, 2013-05-02 This volume celebrates the life achievements of

Jason W Brown who along with Jean Piaget Heinz Werner Alexander Luria and the W rzburg school has significantly contributed to the development of a process based theory of brain mind capable of challenging the currently fashionable modularist or cybernetic approaches to understanding human thought and feeling As a paradigm Brown's microgenetic theory is thus applicable in both brain science where Brown was inspired by the pioneering work of Schilder and Pick and the philosophy of mind where the influence of Bergson Whitehead Cassirer and Merleau Ponty can be seen Essays with a range of focus as wide as Brown's expertise have been collected in such diverse areas as neuropsychology microstructure of action symptomatology neuro rehabilitation neurolinguistics locationism theoretical psychology consciousness hypnosis morphogenesis personality development psychoanalysis Buddhist psychology mysticism and philosophy of mind evolutionary epistemology emergence novelty creativity subjectivity will and action Whiteheadian process philosophy **Process Approaches to Consciousness in Psychology, Neuroscience, and Philosophy of Mind** Michel Weber, Anderson

Weekes, 2009-11-18 This collection opens a dialogue between process philosophy and contemporary consciousness studies

Approaching consciousness from diverse disciplinary perspectives philosophy psychology neuroscience neuropathology psychotherapy biology animal ethology and physics the contributors offer empirical and philosophical support for a model of consciousness inspired by the process philosophy of Alfred North Whitehead 1861 1947 Whitehead's model is developed in ways he could not have anticipated to show how it can advance current debates beyond well known sticking points This has trenchant consequences for epistemology and suggests fresh and promising new perspectives on such topics as the mind body problem the neurobiology of consciousness animal consciousness the evolution of consciousness panpsychism the unity of consciousness epiphenomenalism free will and causation

Neuropsychological Foundations of Conscious

Experience Jason W. Brown, 2010-06 Neuropsychological Foundations of Conscious Experience retraces the growth of microgenetic theory from its beginnings in neuropsychology and aphasia in relation to other genetic models of cognition The account of the mind brain state and subjective time and change is explored in relation to psychoanalytic concepts of the unconscious as well as philosophical ideas on intentionality subjectivity and truth In a final chapter the theory aims to elucidate creative thinking and mystical experience The primary aim is to aid the reader to see the progression from clinical studies to theoretical speculation in a way that condenses more extensive and technical writings This book should appeal to both lay and professional readers with an interest in these topics It is the author's contention that microgenetic theory is the only available and fully coherent account of the mind that covers not only clinical disorders but normal cognition and metapsychological issues relating to an evolutionary brain model Jason W Brown for over 30 years Clinical Professor of Neurology at New York University is best known for his microgenetic theory The theory began with observations on language disorders and neuropsychological studies and was extended to problems in process theory especially that of time change and related issues in philosophy of mind The author lectures widely on various topics and has published 8 books and over 200 articles

Virginia Woolf's Microgenesis James Kearns, 2025-09-12 Virginia Woolf's Microgenesis engages with Virginia Woolf's writings in the context of her own unique methodological approach to mind to meaning and to making whole This volume argues that this preoccupation with the metaphysics of wholeness a dread indeed of both fragmentation and what endures as an organic unity places Woolf's writings alongside Jason Brown's microgenesis formulated as a formative emergent and dynamic process of cognitive activity However crucially it is not by assembling multiple flows of sense data into more complex constructions that we might perceive the objective world but by sculpting away the unfit to reveal the structure of the world as a surfacing reality In so many ways Woolf's novels represent an enactment of microgenetic theory demonstrating and alerting us to the mind brain state as a process of continual unfolding through progressive differentiation and discrimination to a distinct configuration albeit one which may be deemed imperfect That is not to say that Woolf's fictions should be understood as anticipating Brown's formulation of microgenetic theory as such but that they should be understood as illuminating the adaptive and evolutionary significance and signification of perceptual microgenesis in her

various modes of theorisation that is her processes of tunnelling and transmuting moments of being nonbeing and depth and surface If ontogeny individual development recapitulates phylogeny species development this volume demonstrates that Woolf provides the momentariness of microgenesis to her fictions a process which recapitulates both Virginia Woolf s Microgenesis is essential reading for researchers and students in Woolf Studies process philosophy new materialisms literary theory and modernist literature Art and the Brain Joseph Goguen,Erik Myin,1999 Science of art commentary on Ramachandran and Hirstein Art and the Brain The Emergence of Art and Language in the Human Brain Cave Art autism and the evolution of the human mind On aesthetic perception *Variations on Process Metaphysics* Alexander Haitos,Helmut Maaßen,2020-04-16 This book collects several essays on diverse aspects of Alfred North Whitehead s philosophy Ranging from comparative and historical studies to explorations of contemporary influence to possibilities for transforming future inquiry the topics covered here first and foremost point to the relevance of Whitehead s philosophy for our time From this core the essays in this volume highlight a range of issues to which process philosophy speaks profitably These include philosophical questions surrounding motion the notion of life and aesthetics as well as the conjunction of process philosophy with political science and with neuroscience Mysticism and Experience Alex S. Kohav,2020-08-31 Mysticism and Experience Twenty First Century Approaches embarks on an investigation of the concept of mysticism from the standpoint of academic fields including philosophy anthropology religious studies mysticism studies literary studies art criticism cognitive poetics cognitive science psychology medical research and even mathematics Scholars across disciplines observe that although it has experienced both cyclical approval and disapproval mysticism seems to be implicated as a key foundation of religion along with the highest forms of social cultural intellectual and artistic creations This book is divided into four sections The Exposure The Symbolic The Cognitive and The Scientific covering all fundamental aspects of the phenomenon known as mysticism Contributors taking advantage of recent advances in disciplinary approaches to understanding mystical phenomena address questions of whether progress can be made to systemically enrich expand and advance our understanding of mysticism **Process and the Authentic Life** Jason W. Brown,2013-05-02 The thesis advanced in this book is that feeling and cognition actualize through a process that originates in older brain formations and develops outward through limbic and cortical fields through the self concept and private space into as the world An iteration of this transition deposits acts objects feelings and utterances Value is a mode of conceptual feeling that depends on the dominant phase in this transition from desire through interest to object worth Among the topics covered are subjective time and change the epochal nature of objects and their temporal extensibility and the evolution of value from inorganic matter into organic form The theory of microgenesis informs this work According to this theory acts and objects evolve in milliseconds through phases that replicate patterns in forebrain evolution The progression in the actualization of the mind brain state is from archaic to recent in brain formation from unity to diversity from past to present and from mind to world An account is given of the

diversity of felt experience avoiding the reductionist moves characteristic of biological materialism and the inherent dualism of psychoanalytic and related theories This book is intended for any reader interested in the psychology of the inner life and philosophy of mind including philosophers psychologists psychiatrists and others with an interest in problems of value and moral feeling *Essays on Hegel's Philosophy of Subjective Spirit* David S. Stern, 2013-01-01 The first English language collection devoted to Hegel's Philosophy of Subjective Spirit

Margaret Cavendish and the Exiles of the Mind Anna Battigelli, 2021-10-21 Margaret Cavendish duchess of Newcastle 1623 1673 led a dramatic life that brought her into contact with kings queens and the leading thinkers of her day The English civil wars forced her into exile accompanying Queen Henrietta Maria and her court to Paris From this vantage point she began writing voluminously responding to the events and major intellectual movements of the mid seventeenth century Cavendish published twenty three volumes in her lifetime including plays romances poetry letters biography and natural philosophy In them she explored the political scientific and philosophical ideas of her day While previous biographers of Cavendish have focused almost exclusively on her eccentric public behavior Anna Battigelli is the first to explore in depth her intellectual life She dismisses the myth of Cavendish as an isolated and lonely thinker arguing that the role of exile was a rhetorical stance one that allowed Cavendish to address and even criticize her world She like others writing during the period after the English civil wars focused squarely on the problem of finding the proper relationship between mind and world This volume presents Cavendish's writing self the self she treasured above all others

Consciousness and Subjectivity Sofia Miguens, Gerhard Preyer, 2013-05-02 Issues of subjectivity and consciousness are dealt with in very different ways in the analytic tradition and in the idealistic phenomenological tradition central to continental philosophy This book brings together analytically inspired philosophers working on the continent with English speaking philosophers to address specific issues regarding subjectivity and consciousness The issues range from acquaintance and immediacy in perception and apperception to the role of agency in bodily mineness to self determination Selbstbestimmung through free action Thus involving philosophers of different traditions should yield a deeper vision of consciousness and subjectivity one relating the mind not only to nature or to first person authority in linguistic creatures questions which in the analytic tradition are sometimes treated as exhausting the topic but also to many other aspects of mind's understanding of itself in ways which disrupt classic inner outer boundaries

Subjectivity and Identity Peter V. Zima, 2015-06-18 Subjectivity and Identity is a philosophical and interdisciplinary study that critically evaluates critically the most important philosophical sociological psychological and literary debates on subjectivity and the subject Starting from a history of the concept of the subject from modernity to postmodernity from Descartes and Kant to Adorno and Lyotard Peter V Zima distinguishes between individual collective mythical and other subjects Most texts on subjectivity and the subject present the topic from the point of view of a single discipline philosophy sociology psychology or theory of literature In Subjectivity and Identity Zima links philosophical approaches to those of

sociology psychology and literary criticism The link between philosophy and sociology is social philosophy e g Althusser Marcuse Habermas the link between philosophy and literary criticism is aesthetics e g Adorno Lyotard Vattimo Philosophy and psychology can be related thanks to the psychological implications of several philosophical concepts of subjectivity Hobbes Stirner Sartre *Subjectivity* Dominique Chateau,2025-10-01 Subjectivity is a central concept in film theory philosophy and cultural studies It was also a key term in the reception of the Nouvelle Vague film movement in France and Italy from the start of 1945 This timely volume explores the ways in which the concept of subjectivity has made its way into film theory history practice and criticism as well as the confrontations of the subject with this rapidly changing medium Contributors to this timely study include Francesco Casetti Gregory Currie Marina Grzinic Maria Klonaris and Katerina Thomadaki Jacinto Lageira Jos Moure Pere Salabert C line Scemama Karl Sierek Vivian Sobchack and Pierre Taminiaux Their illuminating essays are a testimony to their profound involvement in the subjectivity debate enriching our perception of film history and our understanding of the medium **Krishna Sobti's Views on Literature and the Poetics of Writing** Rosine-Alice Vuille,2022-10-03 How does a writer discuss her creative process and her views on a writer s role in society How do her comments on writing relate to her works The Hindi writer Krishna Sobti 1925 2019 is known primarily as a novelist However she also extensively wrote about her views on the creative process the figure of the writer historical writing and the position of writers within the public sphere This study is the first to examine in detail the relationship between Sobti s views on poetics as exposed in her non fictional texts and her own literary practice The writer s self representation is analysed through her use of metaphors to explain her creative process Sobti s construction of the figure of the writer is then put in parallel with her idiosyncratic use of language as a representation of the heterogeneous voices of her characters and with her conception of literature as a space where time and memory can be held At the same time by delving into Sobti s position in the debate around women s writing especially through the creation of a male double the failed writer Hashmat and into her views on literature and politics this book also reflects on the literary debates of the post Independence Hindi literary sphere *Trials of the Visionary Mind* John Weir Perry,1999-01-01 A comprehensive summary of the author s revolutionary approach to psychosis *New Essays on the Nature of Legal Reasoning* Mark McBride,James Penner,2022-05-19 This is the first book to bring together distinguished jurisprudential theorists as well as up and coming scholars to critically assess the nature of legal reasoning The volume is divided into 3 parts The first part General Jurisprudence and Legal Reasoning addresses issues at the intersection of general jurisprudence those pertaining to the nature of law itself and legal reasoning The second part Rules and Reasons addresses two concepts central to two prominent types of theory of legal reasoning The essays in the third and final part Doctrine and Practice delve into the mechanics of legal practice and doctrine from a legal reasoning perspective *Subjective, Intersubjective, Objective* Donald Davidson,2001-09-27 Subjective Intersubjective Objective is the long awaited third volume of philosophical writings by

Donald Davidson whose influence on philosophy since the 1960s has been deep and broad His first two collections published by OUP in the early 1980s are recognized as contemporary classics Now Davidson presents a selection of his work on knowledge mind and language from the 1980s and the 1990s We all have knowledge of our own minds knowledge of the contents of other minds and knowledge of the shared environment Davidson examines the nature and status of each of these three sorts of knowledge and the connections and differences among them Along the way he has illuminating things to say about truth human rationality and the relations among language thought and the world This new volume offers a rich and rewarding feast for anyone interested in philosophy today and is essential reading for anyone working on its central topics

Between Mind and Nature Roger Smith, 2013-06-01 From William James to Ivan Pavlov John Dewey to Sigmund Freud the W rzburg School to the Chicago School psychology has spanned centuries and continents Today the word is an all encompassing name for a bewildering range of beliefs about what psychologists know and do and this intrinsic interest in knowing how our own and other s minds work has a story as fascinating and complex as humankind itself In *Between Mind and Nature* Roger Smith explores the history of psychology and its relation to religion politics the arts social life the natural sciences and technology Considering the big questions bound up in the history of psychology Smith investigates what human nature is whether psychology can provide answers to human problems and whether the notion of being an individual depends on social and historical conditions He also asks whether a method of rational thinking exists outside the realm of natural science Posing important questions about the value and direction of psychology today *Between Mind and Nature* is a cogently written book for those wishing to know more about the quest for knowledge of the mind
