Minds On Fire How Role Immersion Games Transform College:

Minds on Fire Mark C. Carnes, 2014-09-15 A Choice Outstanding Academic Title of the Year In *Minds on Fire* Mark C. Carnes shows how role immersion games channel students competitive and sometimes mischievous impulses into transformative learning experiences His discussion is based on interviews with scores of students and faculty who have used a pedagogy called *Reacting to the Past* which features month long games set during the French Revolution Galileo's trial the partition of India and dozens of other epochal moments in disciplines ranging from art history to the sciences These games have spread to over three hundred campuses around the world where many of their benefits defy expectations *Minds on Fire* is Carnes's beautifully written apologia for this fascinating and powerful approach to teaching and learning in higher education If we are willing to open our minds and explore student centered approaches like *Reacting to the Past* we might just find that the spark of student engagement we have been searching for in higher education's mythical past can catch fire in the classrooms of the present James M Lang *Chronicle of Higher Education* This book is a highly engaging and inspirational study of a new technique that just might change the way educators bring students to learning in the 21st century D D Bouchard *Choice*

Playful Pedagogy in the Pandemic Emily K. Johnson, Anastasia Salter, 2022-08-26 Educational technology adoption is more widespread than ever in the wake of COVID 19 as corporations have commodified student engagement in makeshift packages marketed as gamification This book seeks to create a space for playful learning in higher education asserting the need for a pedagogy of care and engagement as well as collaboration with students to help us reimagine education outside of prescriptive educational technology Virtual learning has turned the course management system into the classroom and business platforms for streaming video have become awkward substitutions for lecture and discussion Gaming once heralded as a potential tool for rethinking our relationship with educational technology is now inextricably linked in our collective understanding to challenges of misogyny white supremacy and the circulation of misinformation The initial promise of games based learning seems to linger only as gamification a form of structuring that creates mechanisms and incentives but limits opportunity for play As higher education teeters on the brink of unprecedented crisis this book proclaims the urgent need to find a space for playful learning and to find new inspiration in the platforms and interventions of personal gaming and in turn restructure the corporatized surveilling classroom of a gamified world Through an in depth analysis of the challenges and opportunities presented by pandemic pedagogy this book reveals the conditions that led to the widespread failure of adoption of games based learning and offers a model of hope for a future driven by new tools and platforms for personal experimental game making as intellectual inquiry
