**The Borders of Nightmare** Michael Hurley, 1992-12-15 John Richardson was Canada's first native born poet, novelist, and The Father of Canadian Literature. Michael Hurley offers the first detailed account of Richardson's fiction rather than of his life or sociological importance. Hurley makes a convincing case for Richardson as an important early cartographer of the Canadian imagination and the originator of Southern Ontario Gothic. He explores Richardson's influence on James Reaney, Alice Munro, Robertson Davies, Christopher Dewdney, Frank Davey, and Marian Engel. Arguing that *Wacousta* and *The Canadian Brothers* hold central places in our literature, Hurley shows how these two works established a set of boundaries that our national literary discourse has largely kept hidden. Focusing on the protean concept of the border in the fiction of this man from the periphery, *The Borders of Nightmare* underlines the importance of boundaries, margins, shifting edges, and the coincidence of equally matched opposites in necessary balance to both Richardson and subsequent writers. In an age of postmodernism, these novels riddled as they are with discontinuities, paradoxes, ambiguity, and unresolved dualities that problematize the whole notion of a stable, coherent national or personal identity, anticipate and define a number of concerns that preoccupy us today.

*Gender and Nonverbal Behavior* C. Mayo, N. M. Henley, 2012-12-06 This book addresses two lively and active research communities: those concerned with issues of gender and those dealing with nonverbal behavior. The wide range of professional and popular interest in both these topics convinced us that presentations of current work by researchers who bring these two areas of research together would prove stimulating. These presentations not only address the state of current work on gender and nonverbal behavior but also suggest new avenues of investigation for those interested primarily in either topic. In other words, the questions that nonverbal communication researchers address when considering gender bring new directions to gender-related research, and a like effect can be expected when the questions raised in gender studies are applied to research in nonverbal behavior. Dispersion of ideas may take another form as well. Both gender and nonverbal behavior research are notably interdisciplinary. Perhaps because of their pervasive nature, both topics have attracted the attention of a diversity of scholars. Most of the contributions in the present volume are by psychologists, but their intended audience is broad. Linguists, sociologists, and anthropologists are among those who share similar research interests. Moreover, the ideas presented here are of interest to practitioners as well as scholars. From corporations to clinics, people are interested in the subtle expression and negotiation of sex roles through nonverbal communication.

These essays by profeminist men critique the surface ideals and underlying messages promoted by the men's movement. Is it a backlash against feminism, or does it respond to men's real needs independent of feminism? What does the movement say about the appropriate models of masculinity? While the movement may be more than a bunch of white, middle-aged men in war paint chanting and grunting in the forest, the profeminist men writing here express their explicit concern with both the
