Teacher as Researcher: Action Research by Elementary Teachers Jay Feng, 2012-12-21 A collection of action research reports by elementary classroom teachers

Test Fraud Neal Kingston, Amy Clark, 2014-06-27 There has been an increase in awareness and perhaps occurrence of individual and organized cheating on tests Recent reports of widespread problems with state student accountability tests and teacher certification testing have raised questions about the very validity of assessment programs While there are several books that specifically detail the issues of test security cheating on assessments few outline the statistical procedures used for detecting various types of potential test fraud and the associated research findings Without a significant research literature base the

new generation of researchers will have little opportunity or incentive to improve on existing methods Enlisting a variety of experts and scholars in different fields of testing this edited volume expands on the current literature base by including examples of detailed research findings arrived at by statistical methodology It also provides a synthesis of the current state of the art with regard to the statistical detection of testing infidelity particularly for large scale assessments By presenting methods currently used by testing organizations and research on new methods the volume offers an important forum for expanding the literature in this area
