sections for each disorder emphasizing the nurse's role in providing competent client care. Nursing Outcomes Classification (NOC) and Nursing Interventions Classification (NIC) have been identified in each Nursing Care Plan. A Case Study included in each chapter uses critical thinking questions to assist the user through the nursing process and to develop a customized plan of care for the client in the scenario. The last chapter, Integration, has been included to assist the user in understanding the complexity of human illness and how a disorder in one body system affects other body systems. Special features throughout the book are specially designed to emphasize specific information such as Life Cycle Considerations, Client Teaching, Infection Control, Safety, Community Home Health Care, Cultural Considerations, and Professional Tips. Critical Thinking Questions are included throughout the book to encourage the user to apply the chapter's content. At the end of each chapter, readers will find a Summary and Review Questions along with References, Suggested Readings, and Resources.

Clinical Nursing Calculations Susan Sienkiewicz, Sandra Megerdichian, 2024-02-13. *Clinical Nursing Calculations* Third Edition is an essential text for teaching dosage calculation to undergraduate nursing students. The text employs the CASE approach, which is a step-by-step method for performing dosage calculations. The author team draws from extensive experience across the continuum of care to bring readers a truly informative and dynamic resource. *Clinical Nursing Calculations* has been expertly organized into four sections for easy navigation: Mathematics Overview, Principles of Medication Administration, Basic Dosage and Intravenous Calculations, and Advanced Calculations. In addition to clinical calculation coverage, the text also features expanded content on nutrition, insulin calculations, and the legal implications of medication administration. The Joint Commission and the Institute for Safe Medication Practice guidelines regarding safe medication administration are also featured. To facilitate learning, students will find examples in both electronic medication administration record (eMAR) and electronic health record format. This text can be used as a primary text for a dosage calculations course or as a supplemental text within a nursing program or pharmacology course.

Prioritization & Clinical Judgment for the Next Generation NCLEX-RN® Christi D. Doherty, 2025-05-15. Over 1,000 questions across three sections prepare students to master the critical thinking and test-taking skills they need to excel on the clinical judgment, prioritization, and delegation questions on the Next Generation NCLEX-RN. The first section features individual and multiple client care-focused clinical judgment case study questions organized by disease process with rationales and test-taking hints. The second section features clinical judgment case studies with open-ended NCLEX-style questions. The third section is a comprehensive 100-question exam.
